

Contents

1	Introduction	1
1.1	What is “the” Blockchain Technology?	4
1.2	What now is Blockchain Technology?	7
1.2.1	Use of Blockchain Technology	9
1.2.2	Simple (Best Practice)	10
1.2.3	Agile Working or Scrum	12
1.3	Characteristics of Blockchain	15
1.4	Decentralization	17
1.5	Blockchain Types and Protocols	19
1.6	Summary	22
	References	23
2	Consensus Models	25
2.1	Proof of Work (PoW)	27
2.2	Proof of Space (PoS)	30
2.3	Proof of Stake (POS)	31
2.4	Proof of Believability (POB)	33
2.5	Delegated Byzantine Fault Tolerance (dBFT)	34
2.6	Proof of Authority (PoA)	35
2.7	Proof of Activity (PoAc)	36
2.8	Proof of Importance (PoI)	37
2.9	Proof of Reputation (PoR)	37
2.10	Proof of Elapsed Time (PoET)	38
2.11	Proof of Burn (PoB)	38
2.12	Zero-Knowledge-Proof (ZKP)	39
2.13	Ripple	41
2.14	Summary	41
2.15	Conclusion	45
	References	46

3	Further Elements in the Blockchain System	49
3.1	Cryptography	49
3.2	Smart Contracts	52
3.3	Digital Currencies and Other Examples of Applications	55
3.4	Security Aspects	61
3.5	Blockchain “Value”	62
3.6	Conclusion	63
	References	64
4	“Tools of Action” (Process Analysis)	67
4.1	Preparation	68
4.2	Gap Analysis (Gap Analysis)	69
4.3	Options	71
4.4	Stakeholder Analysis	72
4.5	Products and Services Map	77
4.6	Decision Path	81
4.6.1	Decision Path According to Birch-Brown-Parulava	81
4.6.2	Decision Path According to Suichies	83
4.6.3	Decision Path According to IBM	85
4.6.4	Decision Path According to Lewis	85
4.6.5	Decision Path According to Meunier	88
4.6.6	Decision Path According to Wüst & Gervais	89
4.6.7	Decision Path According to Peck	91
4.6.8	Decision Path According to United States Department of Homeland Security (DHS)	93
4.6.9	Decision Path According to Mulligan	95
4.6.10	Gardner’s Decision-making Process	96
4.6.11	Decision Path According to Koens & Poll	98
4.6.12	Overview of the Decision Models	100
4.6.13	Summary Interim Conclusion	100
4.7	Value Analysis	103
4.8	The Morphological Box	106
4.9	Business Model Canvas	110
4.10	Individualized Blockchain Model	115
4.10.1	Blockchain Framework Conditions	115
4.10.2	Creating the First Prototype	123
4.10.3	Further Information	126
4.11	First Requirements for the Developer Formulate	129
4.12	Conclusion	131
	References	133

5	The Code is the Law	137
5.1	Test Networks and Libraries	142
5.1.1	Ethereum Blockchain	143
5.1.2	Geth	145
5.2	Decentralized Application (DApp)	146
5.3	Conclusion	147
	References	148
6	The Next Hype?	149
6.1	Initial Exchange Offering (IEO)	151
6.2	Initial Futures Offering (IFO)	152
6.3	Token Economy and New Business Areas	153
6.4	Token Typology	154
6.4.1	Payment Token or Digital Currency	155
6.4.2	Asset-Backed Token	157
6.4.3	Utility Token	157
6.4.4	Security Token	158
6.4.5	Non-Fungible-Token (NFT)	160
6.5	ERC20 in Connection with ERC721	161
6.6	Digital Central Bank Money (Central Bank Digital Currency; CBDC)	163
6.7	Dezentralized Finance (DeFi)	165
6.8	BaFin Regulation	168
6.9	Conclusion	170
	References	170
7	Theses for the Future	173
7.1	Thesis 1: Here to Stay	174
7.2	These 2: Liberalization of the Internet	176
7.3	These 3: Expansion of "Surveillance Capitalism"	177
7.4	These 4: Protection Against Hacker Attacks	178
7.5	These 5: Future on a Higher Logical Abstraction Level (Interview with Mathias Goldmann)	180
7.6	These 6: Blockchain and Mittelstandsfinanzierung (Interview with Axel von Goldbeck)	185
7.7	These 7: "Regulatory is in" or Blockchain Strategy of the Federal Government	188
	References	189
8	Outlook	191
	Glossary	195
