

Contents

Preface	vii
1. Introduction	1
2. History of Stapedectomy	3
3. Expected Difficulties during Stapes Surgery	5
4. Otosclerosis: Clinical Histopathology	7
5. Clinical Aspect of Otosclerosis	9
6. Imaging before Stapedectomy	13
7. Surgical Treatment of Otosclerosis	15
8. Innovation in Stapes Surgery	17
9. Contraindications for Surgery	19
10. Preoperative Counseling	21
11. Otosclerosis and Vertigo	23
12. Otosclerosis with Tinnitus	25
13. Instruments	27
14. Prosthesis	29
15. Anesthesia for Stapedotomy	31
16. Incision	35
17. Basic Principles of Stapes Surgery	37
18. Reverse Stapedotomy	59
19. Postoperative Treatment	61
20. Microdrill for Stapedotomy: An Essential Tool	63
21. Large Fenestra versus Small Fenestra	73
22. Reconstruction of the Stapedius Muscle	75

23. Loose Piston Over the Incus	77
24. Problems during Stapedectomy	81
25. Operation in the Second Ear	115
26. Revision Stapedectomy	117
27. Perilymph Fistula	125
28. Far-Advanced Otosclerosis	127
29. Otosclerosis and Pregnancy	129
30. Stapedectomy and Air Travel	131
31. Sensorineural Hearing Loss Following Stapedectomy	133
32. Indications for Hearing Aid in Otosclerosis	135
33. Laser Stapedotomy	137
34. Endoscopic Stapes Surgery	149
35. Robot-Based Surgery for Otosclerosis	153
36. Stapedectomy and Abnormal Facial Nerve	155
37. Stapedotomy in Children	163
38. Stapedotomy Following Tympanoplasty	165
Index	167
