Preface — VII

1	Distribution function and decreasing rearrangement — 1
1.1	Distribution function — 1
1.2	Decreasing rearrangement — 4
1.3	Maximal function of a convolution — 32
1.4	Problems — 40
2	Lorentz spaces — 42
2.1	Lorentz spaces — 42
2.2	Normability — 52
2.3	Completeness — 60
2.4	Separability — 62
2.5	Duality — 65
2.6	Space $L_1 + L_\infty$ — 75
2.7	$L \exp$ and $L \log L$ spaces — 80
2.8	Interpolation — 84
2.9	Problems — 115
2.10	Further studies — 117
3	Multidimensional Lorentz spaces — 119
3.1	Two-dimensional decreasing rearrangement — 119
3.1.1	Hardy–Littlewood inequality for the two-dimensional decreasing rearrangement — 142
3.1.2	Two-dimensional decreasing rearrangement as an iterated rearrangement — 149
3.2	The multidimensional Lorentz spaces $\Lambda_2^p(w)$ — 156
3.2.1	The spaces $\Lambda_2^p(w)$ and the rearrangement-invariant spaces — 157
3.2.2	$\Lambda_2^p(w)$: embeddings, quasinormability, and completeness — 160
3.3	Problems — 179
3.4	Further studies — 181
3.4.1	Multiplication operators — 181
3.4.2	Composition operators — 181
3.4.3	Weight composition operators — 182

Bibliography — 185

Index — 189

Glossary — 191

Greek Alphabet — 193
