

# Contents

Foreword	5
----------	---

## **Part A Introduction**

1 The Evolution of Multi-storey Timber Construction	8
2 Wood as a Resource	14
3 Solid Wood and Wood-based Products	18
4 Life Cycle Analysis	24
5 Indoor Air Quality – The Influence of Timber Construction	32

## **Part B Structural Systems**

1 Structures and Load-bearing Systems	42
2 Construction Components and Elements	56

## **Part C Construction**

1 Protective Functions	78
2 Thermal Insulation in Summer – A Question of Planning	94
3 The Layer Structure of Building Envelopes	98
4 The Layer Structure of Interior Construction Components	126
5 Building Services Technology – Particularities of Timber Construction	136

## **Part D Process**

1 Planning	146
2 Digitalisation in Timber Construction	154
3 Timber Production	158
4 Prefabrication	162
5 Solutions for Modernising and Expanding Existing Buildings	172

## **Part E Examples of Buildings in Detail**

Joinery in Detail	184
Project Examples	190

## **Appendix**

Authors	298
Bibliography	300
Glossary	302
DIN Standards	306
Image Credits	308
Project Participants	310
Index	311
Supporters/Sponsors	312
