

Content

1. Heidelberg – City of Astronomy	7
2. 500 years of astronomy in Heidelberg and the Electoral Palatinate (Kurpfalz)	10
2.1 The printing of Johannes Kepler’s “Astronomia Nova” in Heidelberg in 1609	10
2.2 Jacob Christmann and his telescopes	13
2.3 First observatories in Heidelberg	15
2.4 Observatory in Schwetzingen	17
2.5 Christian Mayer’s successful memorandum of 1771	19
2.6 Spectral analysis of the sun – Gustav Kirchhoff and Robert Bunsen (1859)	23
2.7 The beginning of astrophysics	26
3. Astronomical institutes in Heidelberg	31
3.1 State Observatory (LSW)	31
3.2 Astronomical Computing Institute (ARI)	33
3.3 Institute for Theoretical Astrophysics (ITA)	34
3.4 Max Planck Institute for Astronomy (MPIA)	35
3.5 Max Planck Institute for Nuclear Physics (MPIK)	37
3.6 Heidelberg Institute for Theoretical Studies (HITS)	40
3.7 Center for Astronomy Education and Outreach – “House of Astronomy” (HdA)	40
4. Researchers and sponsors	42
4.1 Gustav Kirchhoff (1824–1887)	42
4.2 Max Wolf (1863–1932)	43
4.3 Hans Elsässer (1929–2003)	46
4.4 Walter Fricke (1915–1988)	48
4.5 Carl Bosch (1874–1940)	49
4.6 Klaus Tschira (1940–2015)	50

5. Astronomical research today	52
5.1 Early universe	54
5.2 Milky Way	55
5.3 Star formation	57
5.4 Search for planets around other stars	60
5.5 Planet formation	63
5.6 Numerical simulations.....	66
5.7 Outlook	67
5.8 Study of astronomy	69
 6. An astronomical science walk through Heidelberg	 71
6.1 Old town	71
6.2 Excursions to the outer districts and the surrounding region.....	86
 7. Chronological table of astronomy in Heidelberg and the Electoral Palatinate	 91
 8. Heidelberg astronomers in the sky of small planets	 92
 9. Literature for further reading and references	 94
