List of Tables	5
List of Figures	7
List of Abbreviations	11
Funding Acknowledgements	19
Introduction	21
A few words on methodology	23
The input of the humanities and social sciences	25
Chapter 1: Standard narrative on the history of green chemistry	31
1. Green chemistry: the story so far	33
2. What does the standard narrative really tell us about green chemistry?	37
2.1. Brown vs Green Chemistry	38
2.2. Green chemistry versus ‘command and control’ approach	44
Conclusions	47
Chapter 2: The formative 1990s	49
1. Green chemistry outside the Anglosphere in the late 1980s and early 1990s	50
2. Anastas’s green chemistry in the US before 1998	54

2.1. Preliminary remarks	54
2.2. <i>Benign by Design</i> (1994 book)	56
2.3. Green Chemistry. Designing Chemistry for the Environment (1996 book)	59
2.4. Laying down the foundations of green chemistry	61
3. Non-Anastas American green chemistries	63
3.1. Hancock's environmental green chemistry	63
3.2. Garrett's toxicological green chemistry	68
3.3. Concluding remarks	72
4. Sheldon's and Trost's green chemistry metrics	74
5. Clark's Green Chemistry	79
6. But what was practised as green chemistry in the 1990s?	82
6.1. Presidential Green Chemistry Challenge Award	82
6.2. First university courses in green chemistry	85
6.3. Canonical green chemistry symposia (1994, 1996)	89
6.4. Note on the American Chemical Society Symposia Series	92
Conclusions	93

Chapter 3: 12 principles of green chemistry and their proliferation	95
1. A short epistemological introduction	95
2. Completing and reformulating the 12 principles of green chemistry	99
3. Enthronement of green chemistry principles	110
3.1. Creating the legend	110
3.2. 12 principles in green chemistry education	113
3.3. Green chemistry's self-representation	115
Conclusions	117

Chapter 4: What is green chemistry? (normative approach)	119
1. Major controversies: chlorine sunset and fracking	119
2. Core problem: ionic liquids	125
3. Green chemistry metrics	129
Conclusions: Redrawing the boundaries	133
 Chapter 5: What is green chemistry? (descriptive approach) ...	 137
1. Methodology	138
2. Birth of the discipline (1996–2000)	141
3. Explosion of interest (2001–2005)	147
4. New publication venues (2006–2010)	151
5. Rise of Asia (2011–2015)	157
6. Solidifying change (2015–2020)	160
7. Concluding remarks	164
8. Side note on patents.	166
 Chapter 6: Biomass and doubly green chemistry	 173
1. Prehistory of principle 7	173
2. The French connection	176
3. Biomass and renewability in the foundational texts of green chemistry (late 1990s–early 2000s)	182
4. The growth of the place of biomass and renewability in the literature on green chemistry	185
 Chapter 7: Not only green: sustainable chemistry and past environmentally-friendly chemistries	 193
1. Forgotten alternatives	193

1.1. Solid state-chemistry with green ambitions: French chimie douce	195
1.2. Politically incorrect green chemistry: German sanfte Chemie	197
1.3. Alternative pollution prevention frameworks in Europe	201
2. Escaping the green: sustainable chemistry	206
2.1. Industrial ecology (and the life-cycle assessment)	208
2.2. 1998 OECD Sustainable Chemistry workshop	214
2.3. German connection	217
2.4. American trajectory: sustainable chemistry is green chemistry	222
2.5. Going beyond green: early years of sustainable chemistry (1998–2011)	226
2.6. Defining sustainable chemistry (2011–2017)	229
2.7. Formalising sustainable chemistry as a discipline on its own (2015–2021)	234
Conclusions	240

Chapter 8: New conceptual frontiers for chemistry and environment	243
1. New contenders to overthrow green chemistry	244
1.1. Conservative evolution and the risk of politicization of green chemistry debates	244
1.2. One-world chemistry	246
1.3. Circular chemistry	250
1.4. Concluding remarks on new alternative frameworks	258
2. New ideas for green chemistry	258
2.1. Systems thinking and green and sustainable chemistry	259
2.2. Green chemistry and social justice	263
Conclusions	267

General conclusions: green chemistry as history of scientific ideas	271
Bibliography	275
Index of Names	295
