

Contents

Contents	I
Abbreviations	III
List of Figures	V
List of Tables	VII
1 Introduction	1
1.1 Wheat – a major crop	1
1.2 Distribution and symptoms of <i>Wheat dwarf virus</i> (WDV)	3
1.3 Characteristics of <i>Wheat dwarf virus</i> (WDV)	5
1.4 The virus vector <i>Psammotettix alienus</i>	7
1.5 Influence of cultural practices on the spread of WDV	8
1.6 Resistance to WDV	9
1.7 Characterization and measurement of WDV infection	10
1.8 Detection of QTLs for WDV resistance on the basis of dense SNP marker availability in wheat	11
2 Scientific aims	13
3 Material and methods	14
3.1 Plant material	14
3.2 Vector propagation and virus isolate	15
3.3 Greenhouse resistance tests	16
3.4 Gauze house resistance tests	17
3.5 Resistance phenotyping	18
3.6 Serological test for WDV	20
3.7 DNA extraction and concentration measurement	22
3.8 Linkage map construction	24
3.9 QTL mapping	24
3.10 Genome-wide association study	25
3.11 Statistical analysis	26
4 Results	27
4.1 Genetic mapping of partial WDV resistance in the winter wheat cultivar ‘Mv Vekni’	27
4.1.1 Phenotyping	27
4.1.2 Genetic linkage map and comparison to the physical wheat map	28
4.1.3 QTL for partial WDV resistance in the wheat variety ‘Mv Vekni’	33
4.2 Screening for WDV resistance in wheat accessions and genome-wide association analysis in hexaploid <i>Triticum</i> species	36
4.2.1 Identification of differences to WDV susceptibility within the screening panel	36

Contents

4.2.2	Phenotypic characterization of 250 hexaploid wheat accessions of different <i>Triticum</i> species infected by WDV and identified marker-trait associations	41
5	Discussion	51
5.1	Mapping of partial resistance to WDV in 'Mv Vekni'	51
5.1.1	Segregation ratio in the F ₂ population	51
5.1.2	Partial resistance to WDV in 'Mv Vekni' appears to be primarily influenced by a major QTL	53
5.2	Screening for WDV resistance sources in the wheat genepool and association study	56
5.2.1	Suitability of phenotyping WDV resistance by ELISA and effectivity of the inoculation method in the gauze houses	56
5.2.2	Huge variability in response to WDV infections	58
5.2.3	Marker-trait associations for WDV resistance	60
5.2.4	WDV resistance mechanisms	61
5.3	Comparison of the different approaches to identify WDV resistance in wheat and breeding perspectives	63
6	Conclusion	68
7	Summary	69
8	Zusammenfassung	70
9	References	72
10	Supplementary data	85
10.1	Appendix for the QTL mapping analysis	85
10.2	Appendix for the genome-wide association study	119
11	Acknowledgment	140
12	Curriculum vitae	141
13	Eidesstattliche Erklärung / Declaration under Oath	142
