## Computer Engineering and Information Technology

|                                                                                                                           |    |
|---------------------------------------------------------------------------------------------------------------------------|----|
| Simple Message Passing Framework for Multicore Programming<br>Development and Transformations .....                       | 1  |
| <i>Prabin R. Sahoo</i>                                                                                                    |    |
| Critical Variable Partitioning for Reconfiguration of Mobile Devices ....                                                 | 10 |
| <i>Shweta Loonkar and Lakshmi Kurup</i>                                                                                   |    |
| A Markov Model Based Cache Replacement Policy for Mobile<br>Environment .....                                             | 18 |
| <i>Hariram Chavan, Suneeta Sane, and H.B. Kekre</i>                                                                       |    |
| Data Hiding in Gray-Scale Images Using Pixel Value Differencing .....                                                     | 27 |
| <i>Shrikant S. Agrawal and Rahul M. Samant</i>                                                                            |    |
| Halftone Image Data Compression Using Kekre's Fast Code Book<br>Generation (KFCG) Algorithm for Vector Quantization ..... | 34 |
| <i>H.B. Kekre, Tanuja K. Sarode, Sanjay R. Sange, Shachi Natu, and<br/>Prachi Natu</i>                                    |    |
| Designing a Dynamic Job Scheduling Strategy for Computational<br>Grid .....                                               | 43 |
| <i>Varsha Wangikar, Kavita Jain, and Seema Shah</i>                                                                       |    |
| Network Clustering for Managing Large Scale Networks .....                                                                | 49 |
| <i>Sandhya Krishnan, Richa Maheshwari, Prachi Birla, and<br/>Maitreya Natu</i>                                            |    |
| Sectorization of DCT-DST Plane for Column Wise Transformed Color<br>Images in CBIR .....                                  | 55 |
| <i>H.B. Kekre and Dharendra Mishra</i>                                                                                    |    |
| Construction of Test Cases from UML Models .....                                                                          | 61 |
| <i>Vinaya Sawant and Ketan Shah</i>                                                                                       |    |
| Genetic Algorithmic Approach for Personnel Timetabling .....                                                              | 69 |
| <i>Amol Adamuthe and Rajankumar Bichkar</i>                                                                               |    |
| Financial Market Prediction Using Feed Forward Neural Network .....                                                       | 77 |
| <i>P.N. Kumar, G. Rahul Seshadri, A. Hariharan,<br/>V.P. Mohandas, and P. Balasubramanian</i>                             |    |
| An Efficient Compression-Encryption Scheme for Batch-Image .....                                                          | 85 |
| <i>Arup Kumar Pal, G.P. Biswas, and S. Mukhopadhyay</i>                                                                   |    |

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Improving Performance of XML Web Services .....                                                                                                            | 91  |
| <i>Girish Tere and Bharat Jadhav</i>                                                                                                                       |     |
| Image Retrieval Using Texture Patterns Generated from<br>Walsh-Hadamard Transform Matrix and Image Bitmaps .....                                           | 99  |
| <i>H.B. Kekre, Sudeep D. Thepade, and Varun K. Banura</i>                                                                                                  |     |
| Cache Enabled MVC for Latency Reduction for Data Display on<br>Mobile.....                                                                                 | 107 |
| <i>Sylvan Lobo, Kushal Gore, Prashant Gotarne, C.R. Karthik,<br/>Pankaj Doke, and Sanjay Kimbahune</i>                                                     |     |
| An Approach to Optimize Fuzzy Time-Interval Sequential Patterns<br>Using Multi-objective Genetic Algorithm.....                                            | 115 |
| <i>Sunita Mahajan and Alpa Reshamwala</i>                                                                                                                  |     |
| Signaling Architectures for Efficient Resource Utilization in NGN<br>End-to-End QoS .....                                                                  | 121 |
| <i>Seema A. Ladhe and Satish R. Devane</i>                                                                                                                 |     |
| Application of Software in Mathematical Bioscience for Modelling<br>and Simulation of the Behaviour of Multiple Interactive Microbial<br>Populations ..... | 128 |
| <i>B. Sivaprakash, T. Karunanithi, and S. Jayalakshmi</i>                                                                                                  |     |
| Effect of Different Target Decomposition Techniques on Classification<br>Accuracy for Polarimetric SAR Data .....                                          | 138 |
| <i>Varsha Turkar and Y.S. Rao</i>                                                                                                                          |     |
| Audio Steganography Using Differential Phase Encoding .....                                                                                                | 146 |
| <i>Nikhil Parab, Mark Nathan, and K.T. Talele</i>                                                                                                          |     |
| Audio Steganography Using Spectrum Manipulation.....                                                                                                       | 152 |
| <i>Mark Nathan, Nikhil Parab, and K.T. Talele</i>                                                                                                          |     |
| The Study on Data Warehouse Modelling and OLAP for Birth<br>Registration System of the Surat City .....                                                    | 160 |
| <i>Desai Pushpal and Desai Apurva</i>                                                                                                                      |     |
| Fingerprint Matching by Sectorized Complex Walsh Transform of Row<br>and Column Mean Vectors .....                                                         | 168 |
| <i>H.B. Kekre, Tanuja K. Sarode, and Rekha Vig</i>                                                                                                         |     |
| A Decision-Making Methodology for Automated Guided Vehicle<br>Selection Problem Using a Preference Selection Index Method .....                            | 176 |
| <i>V.B. Sawant, S.S. Mohite, and Rajesh Patil</i>                                                                                                          |     |
| Development of a Decision Support System for Fixture Design .....                                                                                          | 182 |
| <i>Manisha Yadav and Suhas Mohite</i>                                                                                                                      |     |

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Capacity Increase for Information Hiding Using Maximum Edged Pixel Value Differencing .....                                                           | 190 |
| <i>H.B. Kekre, Pallavi Halarnkar, and Karan Dhamejani</i>                                                                                             |     |
| A Review of Handoff Optimization Techniques in Data Networks.....                                                                                     | 195 |
| <i>Kushal Adhvaryu and Vijay Raisinghani</i>                                                                                                          |     |
| A Review of Congestion Control Mechanisms for Wireless Sensor Networks .....                                                                          | 201 |
| <i>Shivangi Borasia and Vijay Raisinghani</i>                                                                                                         |     |
| Image Retrieval Using Texture Features Extracted as Vector Quantization Codebooks Generated Using LBG and Kekre Error Vector Rotation Algorithm ..... | 207 |
| <i>H.B. Kekre, Tanuja K. Sarode, Sudeep D. Thepade, and Srikanth Sanas</i>                                                                            |     |
| Palm Print Identification Using Fractional Coefficients of Sine/Walsh/Slant Transformed Palm Print Images .....                                       | 214 |
| <i>H.B. Kekre, Sudeep D. Thepade, Arvind Viswanathan, Ashish Varun, Pratik Dhwoj, and Nikhil Kamat</i>                                                |     |
| Image Compression Using Halftoning and Huffman Coding .....                                                                                           | 221 |
| <i>H.B. Kekre, Sanjay R. Sange, Gauri S. Sawant, and Ankit A. Lahoty</i>                                                                              |     |

## Electronics and Telecommunication

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| Dual Band H-Shape Microstrip Antennas .....                                                              | 227 |
| <i>A.A. Deshmukh, K.P. Ray, P. Thakkar, S. Lakhani, and M. Joshi</i>                                     |     |
| Higher Accuracy of Hindi Speech Recognition Due to Online Speaker Adaptation.....                        | 233 |
| <i>Ganesh Sivaraman, Swapnil Mehta, Neeraj Nabar, and K. Samudravijaya</i>                               |     |
| ECG Feature Extraction Using Wavelet Based Derivative Approach ....                                      | 239 |
| <i>Anita P. and K.T. Talele</i>                                                                          |     |
| Designing and Implementing Navigation and Positioning System for Location Based Emergency Services ..... | 248 |
| <i>Sonal N. Parmar</i>                                                                                   |     |
| A New Method for Matching Loop Antenna Impedance with the Source for ISM Band .....                      | 254 |
| <i>K.P. Ray, Uday P. Khot, and L.B. Deshpande</i>                                                        |     |
| Optimized Carry Look-Ahead BCD Adder Using Reversible Logic.....                                         | 260 |
| <i>Kanchan Tiwari, Amar Khopade, and Pankaj Jadhav</i>                                                   |     |

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| System Design and Implementation of FDTD on Circularly Polarized Squared Micro-Strip Patch Antenna .....          | 266 |
| <i>Kanchan V. Bakade</i>                                                                                          |     |
| Digital Signal Transmission Using a Multilevel NRZ Coding Technique .....                                         | 272 |
| <i>Vaishali Kulkarni, Pranay Naresh Arya, Prashant Vilas Gaikar, and Rahul Vijayan</i>                            |     |
| Compact Size Helical Loaded Cavity Backed Antenna by Helical Resonator Filter .....                               | 278 |
| <i>Vinittkumar Jayaprakash Dongre and B.K. Mishra</i>                                                             |     |
| <b>Technology Management</b>                                                                                      |     |
| A Review for Supplier Selection Criteria and Methods .....                                                        | 283 |
