Zusammenfassung	IX
Abstract	XI
1 Introduction	1
2 Safety Performance Assessment Simulation Framework	7
2.1 Safety System Concept: AEB in Frontal Collisions	9
2.2 Scenario Simulation	10
2.2.1 Scenario Generation Method and Simulation Model	10
2.2.2 Simulation Output	11
2.3 Pre-Crash Occupant Simulation	12
2.3.1 Simulation Setup	12
2.3.2 Model Input	13
2.3.3 Simulation Output	15
2.4 Vehicle Crash Simulation	16
2.4.1 Simulation Setup	17
2.4.2 Model Input	18
2.4.3 Simulation Output	19
2.5 In-Crash Occupant Simulation	21
2.5.1 Simulation Setup	21
2.5.2 Model Input	22
2.5.3 Simulation Output	22
2.6 Safety Performance Assessment	23
3 Surrogate Modeling	27

3.1	Physics-based Models	28
3.1.1	Simplified FEM Model	29
3.1.2	Lumped Parameter Models	29
3.2	Data-driven Regression Models	31
3.2.1	Linear Regression	34
3.2.2	Kernel Methods	35
3.2.3	Support Vector Regression	37
3.2.4	Gaussian Process Regression	38
3.2.5	Neural Networks	39
3.2.6	Decision Tree Regression	44
3.2.7	Data-driven Model Order Reduction	45
3.2.8	Model Ensemble Techniques	49
3.3	Hybrid Models	50
3.4	Data Generation	51
3.4.1	Sampling methods	53
3.5	Validation	56
3.5.1	Mathematical Metrics	57
3.5.2	Vehicle Safety Metrics	58
3.6	Sensitivity Analysis and Error Propagation	59
3.6.1	Sensitivity Analysis	59
3.6.2	Error Propagation with Interval Predictor Models	61
4	Surrogate Models in the Simulation Framework	65
4.1	Pre-Crash Occupant Surrogate Model	65
4.1.1	Training Data	66
4.1.2	Surrogate Models	67
4.1.3	Results	68
4.2	Vehicle Crash Surrogate Model	72
4.2.1	Training Data	72
4.2.2	Surrogate Models	74

4.2.3	Comparison and Results	81
4.2.4	Correlation OLC to Injury Values	85
4.2.5	Variation of Vehicle Type and Loading	87
4.3	In-Crash Occupant Surrogate Model	90
4.3.1	Training Data	90
4.3.2	Surrogate Models	93
4.3.3	Results and Comparison	94
5	Surrogate Model-enhanced Safety Performance Assessment	97
5.1	Surrogate Model-enhanced Simulation Framework	97
5.2	Scenario-based Safety Performance Assessment	98
5.3	Restraint System Optimization	100
5.4	Validation	102
5.5	Error Propagation	103
6	Discussion	105
6.1	Scenario Simulation	106
6.2	Pre-Crash Occupant Surrogate Model	106
6.3	Vehicle Crash Surrogate Model	107
6.4	In-Crash Occupant Surrogate Model	108
6.5	Safety Performance Assessment	110
6.6	Validation	111
6.7	Summary of Practical Knowledge for Future Applications	112
7	Conclusion	115
	Abbreviations, Symbols, and Notation	117
	Bibliography	123
