

Translators' Preface ix

Preface xiii

Introduction xv

1 The Problem 1

1.1 The Physicists' Conception of Progress 2

1.2 The Legacy of the Philosophers 12

1.3 The Program 22

References 30

2 Physical Theories 35

2.1 Analysis of an Example 37

2.2 Logical and Set-Theoretical Background 45

2.3 Physical Theories 52

2.4 Concepts of a Theory 64

References 68

3 Corroboration and Empirical Progress 71

3.1 Hypothetico-Deductive Corroboration 72

3.2 Consideration of Measurement Inaccuracies 83

3.3 Empirical Progress 90

References 96

4 Exact Reductions 97

4.1 Direct Generalisations 98

4.2 Equivalences 109

4.3 Indirect Generalisations (Embeddings) 119

4.4 Refinements 126

4.5 Extensions and Improper Generalisations 141

4.6 Unifications (Multiple Reductions) 148

References 152

5	Approximate Reductions	155
5.1	Asymptotic Reductions	157
5.2	Limiting Case Reductions	171
5.3	Local Reductions	182
	References	190
6	Partial Reductions	191
6.1	The Closed Reduction Square	193
6.2	The Open Reduction Square	197
