

Contents

1 Comparative Genomic Analysis of Pathogenic Yeasts and the Evolution of Virulence	1
David A. Fitzpatrick and Geraldine Butler	
2 Molecular Epidemiology of <i>Candida</i> Species	19
Gary P. Moran, Brenda A. McManus, David C. Coleman, and Derek J. Sullivan	
3 <i>Candida</i> Infections and Modelling Disease	41
Donna M. MacCallum	
4 <i>Candida albicans</i> Cell Wall Mediated Virulence	69
Carol Munro	
5 Secreted <i>Candida</i> Proteins: Pathogenicity and Host Immunity	97
Julian R. Naglik and Bernhard Hube	
6 Yeast Biofilms	121
Gordon Ramage, Eilidh Mowat, Craig Williams, and Jose Lopez-Ribot	
7 <i>Cryptococcus</i>: Spectrum of Disease and Treatment	145
Tihana Bicanic and Thomas Harrison	
8 Typing Species of <i>Cryptococcus</i> and Epidemiology of Cryptococcosis	167
Thomas G. Mitchell and Anastasia P. Litvintseva	
9 Environmental Stress-Sensing and Pathogenicity in <i>Cryptococcus neoformans</i>	191
Fritz A. Mühlschlegel, Man-Shun Fu, and Rebecca A. Hall	

10 Malassezia 209
H. Ruth Ashbee and Annika Scheynius

11 Emerging Systemic Yeast Pathogens 231
Mary S. Mathews and H. Ruth Ashbee

12 Yeast Pathogens of Domestic Animals 253
F. J. Cabañes

13 Laboratory Diagnosis of Yeast Infections 281
Richard Barton

14 Antifungal Susceptibility Testing and Therapy 311
Manuel Cuenca-Estrella and Juan Luis Rodriguez-Tudela

15 Mechanisms of Multidrug Resistance in Fungal Pathogens 327
Sélène Ferrari and Dominique Sanglard
