Introduction	15
Main objectives of the study	15
Method	17
State of the art	18
Structure	20
Part I: Kant's theory of schematism and its context	21
1. The notion of schema before Kant	23
1.1 Ancient times	24
1.2 Middle Ages	26
1.3 Modern Ages	28
1.3.1 Tetens's conception of schema	34
1.4 Conclusion	40
2. Kant's pre-critical notion of schema	41
2.1 The metaphysical notion of schema in the <i>Nova Dilucidatio</i>	45
2.2 The new significance of schema in the Dissertation from 1770. A first reference to the problem of objectivity	46
2.2.1 Schema and the forms of the worlds	47
2.2.2 The novelty of the account of space and time as schemata in the Dissertation: Comparison with Newton and Leibniz	52
2.2.3 The limitations of Kant's Dissertation and the need of a further solution to the question of objectivity	54
3. The introduction of the transcendental forms in the <i>Critique of Pure Reason</i>	57
3.1 The doctrine of sensibility	58
3.2 The doctrine of the understanding	63

4. Analysis of the schematism chapter	73
4.1 The Transcendental Doctrine of Judgement	74
4.2 Time-mediation	78
4.3 Schemata and their faculty	80
4.4 Schemata: images or concepts?	82
4.5 The table of schemata	84
4.6 Schemata as conditions of the significance of the pure concepts	89
5. Debates over the schematism chapter in Kantian scholarship	95
5.1 Main criticisms of the schematism chapter	96
5.1.1 A redundant addition within the <i>Critique of Pure Reason</i>	96
a) Zschocke's focus on the Transcendental Aesthetic	96
b) Curtius: the schematism chapter and § 24	98
5.1.2 Schematism's obscure terminology	100
a) Curtius: difficulties concerning the notion of subsumption	100
b) Walsh: schemata and concepts	103
c) Guyer: incongruences in the relation between categories and schemata	104
d) Allison: difficulties concerning the distinctions among faculties and the variety of schemata's definitions	106
5.1.3 The priority ascribed to time over space	109
a) Zschocke's criticism of time as being the only mediating function	109
b) Walsh's introduction of "organic" schemata	109
c) Guyer: Schemata and temporality	110
5.2 In response to the criticisms of the schematism chapter	113
5.2.1 The necessity of schematism in the <i>Critique of Pure Reason</i>	113
a) The distinction between the function of the Transcendental Deduction and the task of the schematism chapter	113
b) "Knowing that and knowing how"	116

5.2.2 The obscurity of the chapter	122
a) Subsumption	122
b) “To be” and “to do”: defining schemata	125
c) The distinction between categories and forms of intuition	128
d) Categories and schemata	130
e) Schemata and principles	132
f) Schemata and ideas	134
g) Judgement and its role between reason and understanding ..	138
5.2.3 Space and time	141
a) Time, at least	141
b) Dynamic schemata	142
c) Difficulties within Kant’s text	142
Part II: After Kant	147
1. The philosophical reception and criticism of the schematism chapter	149
1.1 The earliest receptions of Kant’s schematism chapter	150
1.2 Idealism and post-Kantianism	152
1.3 From the late nineteenth to the early twentieth century	159
2. Kant’s distinction between philosophy and psychology	177
2.1 Philosophy as a system of concepts	178
2.2 Psychology: a doctrine of the inner sense	186
2.3 Is Kant a transcendental psychologist?	194
3. Kant’s notion of a schema in twentieth-century psychology	201
3.1 Schema theories	201
3.2 Frederic Bartlett	206
3.2.1 A pioneer of applied psychology	207
3.2.2 Experimental method	208
3.2.3 The topics of experiments	209
3.2.4 Remembering	210
3.2.5 Schematic settings	210

3.2.6	Meaning	214
3.2.7	Conclusion	217
3.3	Jean Piaget's interpretation of Kant's notion of a schema	219
3.3.1	An interest in both theoretical and empirical studies	220
3.3.2	A "philosophical shock"	222
3.3.3	Piaget's notion of schemata	224
3.3.4	An example of a schema: the object	226
3.3.5	Experience as an organisation through schemata. Piaget's perspective between empiricism and apriorism	232
3.3.6	Piaget's novelty and difference from Kant's view	234
3.4	Lawrence Barsalou's reception of Kant's transcendental schematism	238
3.4.1	Cognitive psychology	239
3.4.2	Categorisation	240
3.4.3	Modal theory versus amodal theory	241
3.4.4	Properties	244
	a) Neural representations	244
	b) Schematic perceptual symbols	244
	c) Multimodal symbols	245
	d) Simulators	245
	e) Frames	247
	f) Linguistic indexing and control	248
3.4.5	Barsalou and Kant	249
3.4.6	Psychology and philosophy	250
	Conclusion	253
	Schema: the history of an idea	253
	The function of schematism	255
	Schematism's legacy between philosophy and psychology	258
	New perspectives	264
