

# Contents

**Preface — V**

**List of contributing authors — XI**

Biswa Mohan Sahoo, Bimal Krishna Banik, Abhishek Tiwari, Varsha Tiwari, Adya Jain  
and Preetismita Borah

## **1 Synthesis and application of organotellurium compounds — 1**

- 1.1 Introduction — 1
- 1.2 Synthesis of organotellurium compounds — 3
- 1.3 Application of organotellurium compounds — 11
  - 1.3.1 Applications of tellurium compounds in diagnosis and therapy — 11
  - 1.3.2 Applications of tellurium compounds in biology — 11
- 1.4 Conclusions — 23
- References — 23

Monika Kamboj

## **2 Chemistry of tellurium containing macrocycles — 27**

- 2.1 Introduction — 27
- 2.2 Advantage of adding tellurium in macrocycle — 28
- 2.3 Types of tellurium macrocycles — 29
  - 2.3.1 Telluraporphyrinoid — 29
  - 2.3.2 Cryptand — 37
  - 2.3.3 Macrocyclic Telluroether — 38
  - 2.3.4 Metallomacrocycles — 39
  - 2.3.5 Mixed Donor (O/N/S/Te) Macrocycles — 41
- 2.4 Conclusions — 50
- References — 50

Aparna Das and Bimal Krishna Banik

## **3 Semiconductor characteristics of tellurium and its implementations — 55**

- 3.1 Introduction — 55
- 3.2 Recent developments in Te- semiconductor research — 58
  - 3.2.1 Te based Photoconductors — 60
  - 3.2.2 Te-based Infrared acousto-optic deflectors — 65
  - 3.2.3 Te-based Field effect transistors — 65
  - 3.2.4 Te-based self-developing holographic recording devices — 66
  - 3.2.5 Te-based radiative cooling devices — 66
  - 3.2.6 Te-based Topological insulators — 68
  - 3.2.7 Te-based photodetectors — 68
  - 3.2.8 Te-based thermoelectric materials — 69

|          |                                                  |            |
|----------|--------------------------------------------------|------------|
| <b>6</b> | <b>Toxicity of tellurium and its compounds —</b> | <b>135</b> |
| 6.1      | Introduction —                                   | 136        |
| 6.1.1    | Exposure of Tellurium —                          | 137        |
| 6.1.2    | Metabolism of Tellurium and its compounds —      | 139        |
| 6.1.3    | Distribution —                                   | 140        |
| 6.1.4    | Toxicity of elemental tellurium —                | 141        |
| 6.1.5    | Toxicity of tellurium compounds —                | 142        |
| 6.1.6    | Treatment of tellurium poisoning —               | 146        |
| 6.2      | Conclusions —                                    | 146        |
|          | References —                                     | 146        |

Garima Pandey and Sangeeta Bajpai

|          |                                                                |            |
|----------|----------------------------------------------------------------|------------|
| <b>7</b> | <b>Assessing the environmental impact of tellurium metal —</b> | <b>151</b> |
| 7.1      | Introduction —                                                 | 151        |
| 7.2      | Where does tellurium come from? sources of tellurium —         | 152        |

|       |                                                  |
|-------|--------------------------------------------------|
| 7.3   | How do we use tellurium? — 153                   |
| 7.4   | Assessment studies on effects of tellurium — 153 |
| 7.5   | Effects of tellurium — 155                       |
| 7.5.1 | Potential environment impacts — 155              |
| 7.5.2 | Potential health impacts — 155                   |
| 7.6   | Concluding remarks — 158                         |
|       | References — 158                                 |

Bubun Banerjee, Aditi Sharma, Gurpreet Kaur, Anu Priya, Manmeet Kaur and Arvind Singh

|          |                                                                                          |
|----------|------------------------------------------------------------------------------------------|
| <b>8</b> | <b>Latest developments on the synthesis of bioactive organotellurium scaffolds — 163</b> |
| 8.1      | Introduction — 163                                                                       |
| 8.2      | Synthesis of organotellurium scaffolds — 165                                             |
| 8.2.1    | Synthesis of diaryl tellurides — 165                                                     |
| 8.2.2    | Synthesis of alkenyl vinyl tellurides — 167                                              |
| 8.2.3    | Synthesis of tellurodibenzoic acids — 168                                                |
| 8.2.4    | Synthesis of 5-(aryltellanyl)pyrimidine-2,4(1H,3H)-diones — 171                          |
| 8.2.5    | Synthesis of <i>Te,N</i> -heterocycles — 173                                             |
| 8.2.6    | Synthesis <i>Te,O</i> -heterocycles — 174                                                |
| 8.2.7    | Synthesis of organotellurium substituted-heterocycles — 174                              |
| 8.3      | Conclusions — 177                                                                        |
|          | References — 177                                                                         |
