Acknowledgments — VII

About the author — XIII

Chapter 1

Introduction — 1

- 1.1 Introduction to nanomaterials in foods — 1
- 1.2 A brief history of nanotechnology — 2
- 1.3 Nanotechnology in foods — 4
- 1.4 Nature of food nanomaterials — 5
 - 1.4.1 Inorganic nanomaterials — 8
 - 1.4.2 Organic nanomaterials — 8
- 1.4.3 Preparation of nanoparticles — 10
- 1.5 Unique properties of nanomaterials — 12
- 1.6 Conclusions — 14
- References — 15

Chapter 2

Nanomaterial properties and their characterization — 19

- 2.1 Introduction — 19
- 2.2 Nanomaterial composition — 20
 - 2.2.1 Importance — 20
 - 2.2.2 Characterization — 22
- 2.3 Particle concentration — 23
 - 2.3.1 Importance — 23
 - 2.3.2 Characterization — 23
- 2.4 Nanomaterial shape, aggregation state, and organization — 24
 - 2.4.1 Importance — 24
 - 2.4.2 Characterization — 25
 - 2.4.3 Practical considerations — 28
- 2.5 Particle size — 29
 - 2.5.1 Importance — 29
 - 2.5.2 Characterization — 32
 - 2.5.3 Practical considerations — 34
- 2.6 Particle charge — 34
 - 2.6.1 Importance — 34
 - 2.6.2 Characterization — 35
 - 2.6.3 Practical considerations — 36

2.7	Particle physical state — 37
2.7.1	Importance — 37
2.7.2	Characterization — 37
2.7.3	Practical considerations — 40
2.8	Structure-function relations — 40
2.9	Summary — 41
	References — 41

Chapter 3

Applications of nanotechnology in agriculture — 43

3.1	Introduction — 43
3.2	Nanoenabled pesticides — 43
3.2.1	Inorganic nanopesticides — 44
3.2.2	Organic nanopesticides — 47
3.2.3	Smart nanopesticide delivery systems — 48
3.3	Nanoenabled fertilizers — 50
3.4	Nanoenabled aquaculture and animal feed — 52
3.5	Nano-assisted precision agriculture — 54
3.6	Valorizing food and agricultural waste streams — 57
3.6.1	Advanced separation processes — 57
3.6.2	Manufacture of nano-enabled food ingredients — 58
3.6.3	Manufacture of biodegradable packaging materials — 60
3.6.4	Miscellaneous applications — 61
3.7	Conclusions — 61
	References — 62

Chapter 4

Applications in food and nutrition — 71

4.1	Introduction — 71
4.2	Improving food quality — 71
4.2.1	Appearance — 71
4.2.2	Texture — 73
4.2.3	Flavor — 77
4.2.4	Shelf life — 77
4.3	Improving food nutrition — 85
4.3.1	Modulation of macronutrient digestion — 85
4.3.2	Bioavailability — 86
4.3.3	Controlled or targeted delivery of bioactives — 89
4.4	Improving food safety — 90
4.5	Examples of nanostructured foods — 92
4.5.1	Soft drinks and other beverages — 92
4.5.2	Milk and milk analogs — 93

4.5.3	Chocolate —	95
4.5.4	Encapsulation and delivery systems —	96
4.6	Conclusions —	98
	References —	99

Chapter 5

Advanced nanomaterials for food and agriculture applications — 107

5.1	Introduction —	107
5.2	Nano-enabled sensor technologies —	107
5.2.1	Nanomaterials in surface-enhanced Raman spectroscopy —	108
5.2.2	Nanomaterials in electrochemical sensors —	109
5.2.3	Nanomaterials in colorimetric and fluorometric sensors —	109
5.3	Nano-enabled packaging materials —	110
5.3.1	Nanoencapsulation of film additives —	111
5.3.2	Nano-enabled additives used in packaging materials —	115
5.3.3	Application of nano-enabled packaging materials into foods —	122
5.4	Nano-enabled filters —	124
5.5	Miscellaneous applications —	125
5.6	Conclusions and future directions —	125
	References —	126

Chapter 6

Nanotoxicology: The potential risks of food nanotechnology — 137

6.1	Introduction —	137
6.2	Kinds of nanoparticles present in foods —	138
6.2.1	Inorganic nanoparticles —	138
6.2.2	Organic nanoparticles —	148
6.2.3	Plastic nanomaterials —	153
6.3	Characteristics of food nanoparticles —	154
6.3.1	Composition —	154
6.3.2	Dimensions —	155
6.3.3	Interfacial properties —	155
6.3.4	Aggregation state —	156
6.4	Influence of food matrix and gastrointestinal effects on nanoparticle behavior —	156
6.5	Potential causes of nanoparticle toxicity —	159
6.5.1	Alterations in gastrointestinal function —	159
6.5.2	Tissue accumulation —	160
6.5.3	Cytotoxicity —	160
6.5.4	Alteration in the site of release of bioactive substances —	161
6.5.5	Enhancement of oral bioavailability —	161

6.5.6	Increase in bioavailability of undesirable bioactive substances —	162
6.5.7	Interference with gut microbiota —	163
6.6	Monitoring nanoparticle gastrointestinal fate and potential toxicity —	163
6.6.1	<i>In vitro</i> mechanistic studies —	163
6.6.2	Cell culture models —	164
6.6.3	<i>In vivo</i> animal models —	165
6.6.4	Human studies —	166
6.7	Current status and future recommendations —	166
6.8	Conclusions —	167
	References —	168
