Preface — V

List of contributing authors — XIII

Adem Korkmaz, Lydia Rhyman and Ponnadurai Ramasami

**1 Synthesis, characterization, DFT and molecular docking studies of acetone
O-((2,5-dichlorophenyl)sulfonyl) oxime — 1**

- 1.1 Introduction — 1
- 1.2 Materials and methods — 2
 - 1.2.1 General — 2
 - 1.2.2 The synthesis of the acetone O-((2,5-dichlorophenyl)sulfonyl)
oxime — 2
 - 1.2.3 DFT study — 3
 - 1.2.4 Molecular docking study — 3
 - 1.2.5 ADME study — 4
- 1.3 Results and discussion — 4
- 1.4 Conclusions — 8
- References — 10

Ededet A. Eno, Hitler Louis, Tomsmith O. Unimuke, Ernest C. Agwamba, Anita T. Etim,
Justina I. Mbonu, Henry O. Edet, ThankGod Egemoye, Kayode A. Adegoke
and Umar S. Ameuru

**2 Photovoltaic properties of novel reactive azobenzoquinolines: experimental
and theoretical investigations — 13**

- 2.1 Introduction — 14
- 2.2 Experimental — 15
 - 2.2.1 Computational details — 16
- 2.3 Results and discussion — 17
 - 2.3.1 Synthetic Aspects — 17
 - 2.3.2 Quantum descriptors frontier molecular orbital (FMO) — 19
 - 2.3.3 Density of states (DOS) and energy gap of dye and titanium oxide
(TiO₂) — 21
 - 2.3.4 Molecular orbital composition analysis — 23
 - 2.3.5 Hole electron analysis — 24
- 2.4 Conclusions — 30
- References — 31

Chinda Worokwu and Kechinyere Chinda

3 Social media and learning in an era of coronavirus among chemistry students in tertiary institutions in Rivers State — 37

- 3.1 Introduction — 38
- 3.2 Types of learning — 39
- 3.2.1 Factors militating the use of social media in teaching and learning during the (COVID-19) — 42
- 3.2.2 Shift from classroom learning to virtual learning — 43
- 3.3 Finance — 43
- 3.4 Mental health — 43
- 3.5 Assessment and evaluation — 44
- 3.5.1 Review of empirical literature — 44
- 3.6 Statement of the problem — 45
- 3.7 Aim of the study — 45
- 3.8 Research questions — 46
- 3.9 Hypotheses — 46
- 3.10 Methodology — 46
- 3.11 Results — 47
- 3.12 Discussion — 49
- 3.13 Conclusion — 51
- 3.14 Suggestions — 51
- References — 52

Ponnadurai Ramasami

4 A conversation on the quartic equation of the secular determinant of methylenecyclopropene — 55

- 4.1 Background — 55
- 4.2 Act 1 — 56
- 4.3 Act 2 — 57
- 4.4 Conclusions — 63
- References — 63

Samuel Tetteh, Albert Ofori, Andrew Quashie, Sirpa Jääskeläinen and Sari Suvanto

5 Modification of kaolinite/muscovite clay for the removal of Pb(II) ions from aqueous media — 65

- 5.1 Introduction — 65
- 5.2 Materials and methods — 66
- 5.2.1 Materials — 66
- 5.2.2 Activation of the clay samples — 67
- 5.2.3 Characterization — 67
- 5.2.4 Adsorption studies — 67

5.3	Results and discussion — 67
5.3.1	Characterization — 67
5.3.2	FTIR Spectroscopy — 70
5.3.3	Adsorption kinetics — 72
5.3.4	Adsorption isotherm — 75
5.3.5	Adsorption kinetics — 78
5.4	Conclusions — 79
	References — 79

Theam Soon Lim and Yee Siew Choong

6	<i>In silico</i> design of ACE2 mutants for competitive binding of SARS-CoV-2 receptor binding domain with hACE2 — 83
6.1	Introduction — 83
6.2	Methodology — 84
6.3	Results and discussion — 85
6.4	Conclusions — 89
	References — 89

Shayeri Das, Prabhat Ranjan and Tanmoy Chakraborty

7	Computational study of Cu_nAgAu (<i>n</i> = 1–4) clusters invoking DFT based descriptors — 93
7.1	Introduction — 93
7.2	Computational details — 95
7.3	Results and discussion — 96
7.3.1	Electronic properties and DFT based descriptors — 96
7.4	Conclusions — 98
	References — 98

Misbaudeen Abdul-Hammed, Ibrahim Olaide Adedotun, Karimot Motunrayo Mufutau, Bamidele Toheeb Towolawi, Tolulope Irapada Afolabi and Christianah Otoame Irabor

8	Antibreast cancer activities of phytochemicals from <i>Annona muricata</i> using computer-aided drug design (CADD) approach — 103
8.1	Introduction — 103
8.2	Materials and methods — 105
8.2.1	Preparation of target receptor — 105
8.2.2	Identification and validation of active site — 105
8.2.3	Preparation of ligands and geometric optimization — 105
8.2.4	Analyses of drug-like compounds and ADMET profiling — 105
8.2.5	Oral bioavailability screening and prediction of activity spectra for substances (PASS) — 106
8.2.6	Molecular docking protocol — 106

8.3	Results and discussion —	106
8.3.1	Macromolecular target elucidation and active-site validation —	106
8.3.2	Analyses of absorption, distribution, metabolism, excretion, and toxicity (ADMET) of studied compounds —	107
8.3.3	Drug-likeness analyses —	113
8.3.4	Molecular modeling analysis (molecular docking and molecular interactions) —	113
8.3.5	Oral-bioavailability radar analyses —	117
8.3.6	Prediction of biological activities of the selected compounds —	118
8.4	Conclusions —	119
	References —	119

Imee Su Martinez, Daniel Ashok Maria Innasi and Rohan P. Perera

9	Development of an online assessment system to evaluate knowledge on chemical safety and security —	123
9.1	Introduction —	123
9.1.1	Chemical safety and security —	123
9.1.2	The role of the OPCW in chemical safety and security —	124
9.1.3	The significance of an e-based questionnaire in chemical safety and security monitoring —	125
9.1.4	Brief background of web-based chemical safety and security exams —	125
9.2	Methodology —	127
9.2.1	Developing the software —	127
9.2.2	Scripting language —	128
9.2.3	Creating the question pool or database —	129
9.3	Results and analyses —	131
9.3.1	Description of the developed eQchemSS program and installation in the OPCW website —	131
9.3.2	User feedback —	133
9.4	Conclusions —	134
	References —	135

Linda Ouma, Agnes Pholosi and Martin Onani

10	Optimizing Cr(VI) adsorption parameters on magnetite (Fe₃O₄) and manganese doped magnetite (Mn_xFe_(3-x)O₄) nanoparticles —	137
10.1	Introduction —	137
10.2	Experimental —	139
10.2.1	Materials —	139
10.2.2	Methods —	139
10.3	Results and discussions —	140

10.3.1	Characterization — 140
10.3.2	Adsorption optimization — 142
10.4	Conclusions — 145
	References — 146

Liliana Mammino

11	The spontaneity of chemical reactions: challenges with handling the concept and its implications — 149
11.1	Introduction — 149
11.1.1	The perception of physical chemistry as a difficult area — 149
11.1.2	Key steps in the presentation of the spontaneity concept — 151
11.2	The context and the approaches — 152
11.3	The spontaneity concept in chemical thermodynamics — 157
11.3.1	Defining the concept and providing illustrative examples — 157
11.3.2	Entropy – an elusive physical quantity? — 160
11.3.3	The spontaneity criteria — 162
11.4	The spontaneity concept in electrochemistry — 163
11.4.1	Definitions and their implications — 163
11.4.2	The interpretation of experimental information — 166
11.5	Discussion and conclusions — 168
	References — 171

Liliana Mammino

12	Conformational preferences and intramolecular hydrogen bonding patterns of tetraflavaspidic acid BBBB – a tetrameric acylphloroglucinol — 175
12.1	Introduction — 175
12.2	Computational details — 178
12.3	Results and analyses — 178
12.3.1	Atom numbering and naming of conformers — 178
12.3.2	Conformational preferences and energetics — 185
12.3.3	Characteristics of the intramolecular hydrogen bonds — 188
12.3.4	Other molecular properties — 193
12.4	Discussion and conclusions — 193
	References — 194

Ededet A. Eno, Hitler Louis, Tomsmith O. Unimuke, ThankGod C. Egemonye, Stephen A. Adalikwu, John A. Agwupuye, Diana O. Odey, Abu Solomon Abu, Ishegbe J. Eko, Chukwudubem E. Ifeatu and Tabe N. Ntui

13	Synthesis, characterization, and theoretical investigation of 4-chloro-6(phenylamino)-1,3,5-triazin-2-yl)asmino-4-(2,4-dichlorophenyl)thiazol-5-yl-diazenyl)phenyl as potential SARS-CoV-2 agent — 197
13.1	Introduction — 198
13.2	Experimental and computational details — 199

13.2.1	Experimental —	199
13.2.2	Computational details —	200
13.3	Result and discussion —	200
13.3.1	Quantum chemical descriptors —	200
13.3.2	Aromaticity index —	202
13.3.3	Conceptual density functional theory (CDFT) —	204
13.3.4	Natural bond orbital (NBO) Analysis —	205
13.3.5	Atomic dipole moment corrected Hirshfeld (ADCH) charge —	205
13.3.6	NMR analysis —	206
13.3.7	Theoretical ADMET prediction (PKSCM) —	207
13.3.8	Molecular docking —	209
13.4	Conclusions —	211
	References —	212

Fawzia Narod and Vickren Narrainsawmy

14	Educators' reflections on the teaching and learning of the periodic table of elements at the upper secondary level: a case study —	217
14.1	Introduction —	217
14.2	Context —	218
14.3	Rationale —	219
14.4	Aims of the study —	219
14.5	Research questions —	220
14.5.1	Sub-questions —	220
14.6	Literature review —	220
14.7	Methodology —	221
14.7.1	Research design —	221
14.7.2	Sampling and participants —	222
14.7.3	Data collection —	222
14.7.4	Analysis of data —	222
14.8	Results and discussions —	222
14.9	Conclusions —	227
14.10	Recommendations —	228
	References —	229

Index — 233
