Preface — V

List of contributing authors — XV

Yandri Yandri, Nurmala Nurmala, Tati Suhartati, Heri Satria, and Sutopo Hadi

1	The stability increase of α-amylase enzyme from <i>Aspergillus fumigatus</i> using dimethyladipimidate — 1
1.1	Introduction — 1
1.2	Materials and method — 2
1.2.1	Materials and instrumentations — 2
1.2.2	Procedure — 3
1.3	Results and discussion — 3
1.3.1	Production and isolation of α -amylase — 3
1.3.2	α -Amylase purification — 4
1.3.3	Characterization of native and modified enzymes — 5
1.3.4	Native and modified enzymes — 6
1.3.5	Determination of the native and modified enzymes' thermal stability — 7
1.3.6	Constants of thermal inactivation at k_i , half-life ($t_{1/2}$), and energy Gibbs changes due to denaturation (ΔG_i) of the native and modified enzymes — 7
1.4	Conclusions — 8
	References — 9

Yakubu Ali, Joseph O. Odey, Giwa A and K. A Bello

2	A novel application of synthesised based squarylium dyes on nylon 6, and silk woven fabrics — 11
2.1	Introduction — 11
2.1.1	Results and discussion — 13
2.1.2	Synthesis of squaric acid — 13
2.1.3	General procedure for synthesis of squarylium dyes — 14
2.1.4	Synthesis of dye A, B, C, D and E — 14
2.1.5	Physical properties of the synthesized dyes — 14
2.2	Discussion — 14
2.2.1	Physical characteristics of the synthesised dye — 14
2.2.2	Infra-red analysis of the synthesized dyes — 16
2.2.3	Mass spectroscopy of the synthesised dyes — 16
2.3	Solvatochromism — 18
2.3.1	Molar extinction coefficient (ϵ) — 18
2.3.2	Dye exhaustion for nylon 6 and silk — 19

2.3.3	Effect of pH —	20
2.3.4	Effect of time —	20
2.3.5	Effect of carrier concentration —	20
2.3.6	Effect of temperature —	21
2.3.7	Wash fastness —	21
2.3.8	Light fastness —	22
2.3.9	Perspiration fastness —	23
2.4	Fastness to hot pressing —	23
	References —	26

Siphumelele Thandokwazi Mkhondwane and Viswanadha Srirama Rajasekhar Pullabhotla

3 Cyclohexane oxidation using advanced oxidation processes with metals and metal oxides as catalysts: a review — 29

3.1	Introduction —	29
3.2	AOPs for cyclohexane oxidation —	31
3.2.1	Photocatalysis —	32
3.2.2	Photocatalysis in oxidation of cyclohexane —	34
3.2.3	Fenton oxidation process —	39
3.3	Heterogeneous Fe Fenton catalysts —	41
3.3.1	Ferrihydrite —	41
3.3.2	Ferrites —	41
3.3.3	Hematite —	42
3.3.4	Pyrite —	42
3.3.5	Magnetite —	43
3.3.6	Fenton oxidation of cyclohexane —	43
3.3.7	Ozonation —	49
3.3.8	Ozonation of cyclohexane —	52
3.4	Conclusion and outlook —	55
	References —	56

Ivayla Pantcheva, Nikolay Petkov, Svetlana Simova, Rumyana Zhorova, and Petar Dorkov

4 Alkaline-earth metal(II) complexes of salinomycin – spectral properties and antibacterial activity — 65

4.1	Introduction —	65
4.2	Experimental —	67
4.2.1	Materials —	67
4.2.2	Preparation of complexes 1–4 —	67
4.2.3	Methods —	67
4.2.4	Antimicrobial activity assay —	68

4.3	Results and discussion —	68
4.3.1	Spectral properties of complexes 1–4 —	69
4.3.2	Structure of complexes 1–4 —	72
4.3.3	Antimicrobial activity of complexes 1–2 —	73
4.4	Conclusions —	75
	References —	75

Mutiu Sowemimo and Adeleke Adeniyi

5	Synthesis and characterization of alkaloid derived hydrazones and their metal (II) complexes —	79
5.1	Introduction —	80
5.2	Materials and methods —	81
5.2.1	Chemicals and reagents —	81
5.2.2	Synthesis of ligands —	81
5.2.3	Synthesis of the metal complexes —	82
5.2.4	Physicochemical measurements —	82
5.2.5	Antimicrobial screening —	82
5.3	Results and discussion —	82
5.4	Conclusions —	90
	References —	90

Joseph C. Oguegbulu, Abedawn I. Khalaf, Colin J. Suckling, Margaret M. Harnett, and William Harnett

6	Lead optimisation efforts on a molecular prototype of the immunomodulatory parasitic protein ES-62 —	93
6.1	Introduction —	94
6.2	Methods —	97
6.2.1	<i>In silico</i> screening —	97
6.2.2	Synthetic methods —	97
6.2.3	HPLC method for LogP determination —	100
6.3	Results —	100
6.3.1	<i>In silico</i> Screening (selection of amines) —	100
6.3.2	Synthesis of compounds —	100
6.3.3	HPLC method for LogP determination —	102
6.4	Discussion —	102
6.4.1	Conclusions —	107
6.5	Experimental section —	107
6.5.1	General —	107
6.5.2	Synthesis of compounds —	108
	Abbreviations —	108
	References —	109

Emmanuel M. Halilu and Baraka Muhammad

7	Phytochemical and antioxidant studies of <i>Hibiscus Cannabinus</i> seed oil — 111
7.1	Introduction — 112
7.2	Methodology — 113
7.2.1	Collection, identification and preparation of seeds — 113
7.2.2	Physicochemical studies — 113
7.2.3	Extraction of oil — 113
7.2.4	Organoleptic examination of fixed oil — 113
7.2.5	Solubility testing — 113
7.2.6	Determination of specific gravity — 113
7.2.7	Oil analysis — 114
7.2.8	Qualitative phytochemical test — 114
7.2.9	Thin layer chromatography — 114
7.2.10	GC-MS analysis — 114
7.2.11	Toxicity studies — 114
7.2.12	Antioxidant assay using DPPH free radical — 114
7.3	Results and discussion — 115
7.3.1	Physicochemical evaluation — 115
7.3.2	Extraction, organoleptic evaluation, solubility studies on the oil — 116
7.3.3	Specific gravity, oil analysis and qualitative phytochemical screening — 116
7.3.4	Thin layer chromatography (TLC) — 117
7.3.5	GC-MS analysis of <i>Hibiscus cannabinus</i> oil — 118
7.3.6	Acute toxicity studies — 118
7.3.7	Free radical scavenging activity — 119
7.4	Conclusions — 120
	References — 120

Jamuna Bai Aswathanarayan and Ravishankar Rai Vittal

8	Small molecules as next generation biofilm inhibitors and anti-infective agents — 123
8.1	Introduction — 123
8.2	Biofilm formation—composition and mechanism — 124
8.2.1	Composition of biofilms and antibiotic tolerance — 124
8.2.2	Quorum sensing in biofilms — 125
8.3	Biofilm inhibition strategies — 125
8.3.1	Inhibition of bacterial surface adhesion — 127
8.3.2	Signal inhibitors — 129
8.3.3	Disruption and dispersal of mature biofilms — 131
8.4	Conclusion and future prospective — 132
	References — 132

Fatima Miles, Fayrouz Djellouli, Nourelhouda Bensiradj and Abdallah Dahmani

9 Pharmaceutical cocrystal consisting of ascorbic acid with p-aminobenzoic acid and paracetamol — 137

- 9.1 Introduction — 138
- 9.2 Experimental — 139
 - 9.2.1 Preparation of compounds — 139
 - 9.2.2 Characterization of Cocrystal — 139
- 9.3 Results and discussion — 140
 - 9.3.1 Cocrystal AB — 141
 - 9.3.2 Cocrystal AP — 142
 - 9.3.3 Results of DFT calculations — 143
 - 9.3.4 FT-IR spectral study — 146
 - 9.3.5 Dipole moment and frontier orbitals (HOMO and LUMO) — 146
 - 9.3.6 Thermodynamic properties — 147
- 9.4 Conclusion — 149
- References — 149

Dorathy Chinasa Nwokonkwo and Emmanuel Ikechukwu Nwafor

10 Extraction, isolation and characterization of secondary metabolites in the leaves of *Morinda lucida* from Oshiegbe in Ebonyi State — 151

- 10.1 Introduction — 151
- 10.2 Materials and methods — 153
 - 10.2.1 Sample collection and authentication — 153
 - 10.2.2 Column chromatography — 154
 - 10.2.3 Structural determination of the bioactive compounds — 154
- 10.3 Results and discussion — 154
 - 10.3.1 Extract yield and phytochemical analysis — 154
 - 10.3.2 Structural elucidation of the isolated compounds — 156
- 10.4 Conclusions — 161
- References — 161

Francis Alfred Attah, Augustine E. Mbanu, Uche M. Chukwudulue, Ugochukwu J. Jonah, and Ngaitad S. Njinga

11 Ethnopharmacology, phytochemistry and a new chemotaxonomic marker in *Oldenlandia affinis* (Roem. & Schult.) DC. Rubiaceae — 165

- 11.1 Introduction — 166
- 11.2 Materials and methods — 168
- 11.3 Botanical description and geographical distribution — 168
- 11.4 Traditional uses and ethnopharmacology of *Oldenlandia affinis* — 169
 - 11.4.1 Traditional uses — 169
 - 11.4.2 Ethnopharmacology — 171

- 11.5 Documented metabolite profile in *Oldenlandia affinis* — 175
- 11.5.1 Nonpeptidic metabolites of *Oldenlandia affinis* — 175
- 11.5.2 Peptidic metabolites of *Oldenlandia affinis* — 176
- 11.5.3 Phytochemistry of cyclotides expressed in *Oldenlandia affinis* — 178
- 11.6 Taxonomic conflict and a new chemotaxonomic marker in *Oldenlandia affinis* — 180
- 11.7 Conclusion and future prospect — 181
- References — 182

Sarah Oni, Akinola Akinlabi, Abayomi Bamisaye and Josephine Ojo

12 Physico-chemical and nutraceutical properties of *Cola lepidota* seed oil — 187

- 12.1 Introduction — 187
- 12.2 Methodology — 188
- 12.2.1 Proximate analysis — 188
- 12.2.2 Boiling point — 188
- 12.2.3 pH determination — 188
- 12.2.4 Saponification value — 189
- 12.2.5 Peroxide value — 189
- 12.2.6 Iodine value — 189
- 12.2.7 Acid value — 189
- 12.2.8 Determination of specific gravity — 190
- 12.2.9 Percentage yield determination — 190
- 12.3 Results and discussion — 190
- 12.4 Conclusions — 193
- References — 194

Abolanle A. A. Kayode, Izuchukwu Emmanuel Eya and Omowumi Titilola Kayode

13 A short review on cancer therapeutics — 197

- 13.1 Introduction — 197
- 13.2 Some hallmarks of cancer — 198
- 13.2.1 Sustained proliferative signalling — 198
- 13.2.2 Evading growth suppressors — 199
- 13.2.3 Activating invasion and metastasis — 200
- 13.2.4 Enabling replicative immortality — 200
- 13.2.5 Resisting cell death — 200
- 13.2.6 Reprogramming energy metabolism — 201
- 13.2.7 Evading immune response — 201
- 13.3 Cancer therapeutics — 202
- 13.4 Cancer therapeutics on some of the hallmarks of cancer — 204
- 13.4.1 Therapeutics on sustained proliferation — 204

13.4.2	Therapeutics on cell death resistance —	205
13.4.3	Therapeutics on replicative immortality —	206
13.4.4	Therapeutics on evading immune response —	206
13.4.5	Therapeutics on growth suppressor evasion —	206
13.5	Conclusions —	206
	References —	207
