# Complexity and Artificial Markets

# Contents

## Part I Market Mechanisms

<b>1</b>	<b>Zero-Intelligence Trading Without Resampling</b>	<b>3</b>
	Marco LiCalzi and Paolo Pellizzari	
1.1	Introduction	3
1.2	The Model	4
1.3	Results	7
1.3.1	Test 1: Does Resampling Matter?	7
1.3.2	Test 2: Which Protocol Performs Better Under Zero Intelligence?	8
1.3.3	Test 3: Does Learning Make a Difference?	9
1.4	Conclusions	13
	References	14
<b>2</b>	<b>Understanding the Price Dynamics of a Real Market Using Simulations: The Dutch Auction of the Pescara Wholesale Fish Market</b>	<b>15</b>
	Gianfranco Giulioni and Edgardo Bucciarelli	
2.1	Introduction	15
2.2	Market Description	16
2.3	Modeling the Buyers' Bidding Behavior	17
2.4	Simulations and Validation	20
2.5	Discussion and Conclusions	23
2.6	Appendix	24
2.6.1	The Bidding Threshold	24
2.6.2	Simulations Settings	24
	References	25

**3 Market Behavior Under Zero-Intelligence Trading and Price Awareness** . . . . . 27

Lucia Milone

3.1 Introduction . . . . . 27

3.2 The Model . . . . . 28

3.2.1 Behavioral Assumptions . . . . . 29

3.2.2 Open and Closed Book Scenarios . . . . . 30

3.2.3 Experimental Design . . . . . 30

3.3 Results . . . . . 31

3.3.1 Outcome Variables . . . . . 31

3.3.2 Efficiency . . . . . 32

3.3.3 Volume . . . . . 33

3.3.4 Transaction Prices . . . . . 35

3.4 Conclusions . . . . . 36

References . . . . . 37

**Part II Evolution and Decision Making**

**4 Evolutionary Switching between Forecasting Heuristics: An Explanation of an Asset-Pricing Experiment** . . . . . 41

Mikhail Anufriev and Cars Hommes

4.1 Introduction . . . . . 41

4.2 Laboratory Experiment . . . . . 42

4.2.1 Findings of the Experiment . . . . . 44

4.2.2 Discussion . . . . . 44

4.3 Evolutionary Model . . . . . 46

4.3.1 Forecasting Heuristics . . . . . 47

4.3.2 Evolutionary Switching . . . . . 48

4.3.3 Model Initialization . . . . . 49

4.4 Simulations of the Model . . . . . 50

4.5 Conclusion . . . . . 52

References . . . . . 52

**5 Prospect Theory Behavioral Assumptions in an Artificial Financial Economy** . . . . . 55

Marco Raberto, Andrea Teglio, and Silvano Cincotti

5.1 Introduction . . . . . 56

5.2 The Model . . . . . 57

5.3 Results and Discussion . . . . . 60

5.4 Conclusions . . . . . 65

References . . . . . 66

13.1 Introduction . . . . .	159
13.2 Individual-Based Methods . . . . .	161
13.3 System Theories . . . . .	162
13.4 Mathematical Biology and Game Theory . . . . .	163
13.5 Simulation Methods . . . . .	164

13.6 AI in Computer Games ..... 165

13.7 Conclusions ..... 168

References ..... 169

**Part V Invited Speakers**

**14 Computational Evolution ..... 175**

Peter A. Henning

14.1 Introduction ..... 175

14.2 Catastrophic Events in Macro Evolution ..... 177

14.3 Variations of Micro Evolution ..... 181

14.3.1 Evolution Strategy for Throwing ..... 183

14.3.2 Other Examples for Micro Evolution ..... 186

14.4 Bottom-Up Evolution by Digital Biochemistry ..... 187

14.5 Summary and Outlook ..... 191

References ..... 192

**15 Artificial Markets: Rationality and Organisation ..... 195**

Alan Kirman

15.1 Introduction ..... 195

15.2 Relationships in Markets ..... 197

15.3 The Marseille Fish Market (Saumaty) ..... 199

15.4 A Simple Market Model ..... 201

15.5 Trading Relationships Within the Market ..... 202

15.6 A Little Formal Analysis ..... 203

15.7 An Artificial Market Based on a Simpler Modelling Approach ... 209

15.8 Other Forms of Market Organisation ..... 216

15.9 MERITAN a Market Based on Dutch Auctions ..... 217

15.10 The Empirical Evidence ..... 219

15.11 Price Dynamics ..... 219

15.12 Loyalty Again ..... 221

15.13 Comparison Between Auctions and the Decentralised Market  
in an Agent-Based Model ..... 223

15.14 Common Features ..... 224

15.15 The Auction Market ..... 225

15.16 Profit Generated by the Rules ..... 227

15.17 Simulations ..... 227

15.18 Results with a Large Supply ..... 228

15.19 Results with a Limited Supply ..... 231

15.20 The Market when Both Sides Learn ..... 231

15.21 Conclusion ..... 231

References ..... 233
