## Part I Foundations of Stochastic Geometry

---

|          |  |     |
|----------|--|-----|
| <b>2</b> | <b>Random Closed Sets</b> .....                    | 17  |
| 2.1      | Random Closed Sets in Locally Compact Spaces ..... | 17  |
| 2.2      | Characterization of Capacity Functionals .....     | 22  |
| 2.3      | Some Consequences of Choquet's Theorem .....       | 31  |
| 2.4      | Random Closed Sets in Euclidean Space .....        | 37  |
| <b>3</b> | <b>Point Processes</b> .....                       | 47  |
| 3.1      | Random Measures and Point Processes .....          | 48  |
| 3.2      | Poisson Processes .....                            | 58  |
| 3.3      | Palm Distributions .....                           | 70  |
| 3.4      | Palm Distributions – General Approach .....        | 79  |
| 3.5      | Marked Point Processes .....                       | 82  |
| 3.6      | Point Processes of Closed Sets .....               | 95  |
| <b>4</b> | <b>Geometric Models</b> .....                      | 99  |
| 4.1      | Particle Processes .....                           | 100 |
| 4.2      | Germ-grain Processes .....                         | 109 |
| 4.3      | Germ-grain Models, Boolean Models .....            | 117 |
| 4.4      | Processes of Flats .....                           | 124 |
| 4.5      | Surface Processes .....                            | 140 |
| 4.6      | Associated Convex Bodies .....                     | 145 |

---

**Part II Integral Geometry**

---

|          |   |     |
|----------|---|-----|
| <b>5</b> | <b>Averaging with Invariant Measures</b> .....              | 167 |
| 5.1      | The Kinematic Formula for Additive Functionals .....        | 168 |
| 5.2      | Translative Integral Formulas .....                         | 180 |
| 5.3      | The Principal Kinematic Formula for Curvature Measures .... | 190 |
| 5.4      | Intersection Formulas for Submanifolds .....                | 203 |
| <b>6</b> | <b>Extended Concepts of Integral Geometry</b> .....         | 211 |
| 6.1      | Rotation Means of Minkowski Sums .....                      | 211 |
| 6.2      | Projection Formulas .....                                   | 220 |
| 6.3      | Cylinders and Thick Sections .....                          | 223 |
| 6.4      | Translative Integral Geometry, Continued .....              | 228 |
| 6.5      | Spherical Integral Geometry .....                           | 248 |
| <b>7</b> | <b>Integral Geometric Transformations</b> .....             | 265 |
| 7.1      | Flag Spaces .....   | 266 |
| 7.2      | Blaschke–Petkantschin Formulas .....                        | 270 |
| 7.3      | Transformation Formulas Involving Spheres .....             | 287 |

---

**Part III Selected Topics from Stochastic Geometry**

---

|           |  |     |
|-----------|--|-----|
| <b>8</b>  | <b>Some Geometric Probability Problems</b> .....           | 293 |
| 8.1       | Historical Examples .....                                  | 293 |
| 8.2       | Convex Hulls of Random Points .....                        | 298 |
| 8.3       | Random Projections of Polytopes .....                      | 328 |
| 8.4       | Randomly Moving Bodies and Flats .....                     | 335 |
| 8.5       | Touching Probabilities .....                               | 349 |
| 8.6       | Extremal Problems for Probabilities and Expectations ..... | 359 |
| <b>9</b>  | <b>Mean Values for Random Sets</b> .....                   | 377 |
| 9.1       | Formulas for Boolean Models .....                          | 379 |
| 9.2       | Densities of Additive Functionals .....                    | 393 |
| 9.3       | Ergodic Densities .....                                    | 404 |
| 9.4       | Intersection Formulas and Unbiased Estimators .....        | 413 |
| 9.5       | Further Estimation Problems .....                          | 429 |
| <b>10</b> | <b>Random Mosaics</b> .....                                | 445 |
| 10.1      | Mosaics as Particle Processes .....                        | 446 |
| 10.2      | Voronoi and Delaunay Mosaics .....                         | 470 |
| 10.3      | Hyperplane Mosaics .....                                   | 484 |
| 10.4      | Zero Cells and Typical Cells .....                         | 493 |
| 10.5      | Mixing Properties .....                                    | 515 |

|  |     |
|--|-----|
| <b>11 Non-stationary Models</b> .....            | 521 |
| 11.1 Particle Processes and Boolean Models ..... | 522 |
| 11.2 Contact Distributions .....                 | 534 |
| 11.3 Processes of Flats .....                    | 543 |
| 11.4 Tessellations .....                         | 550 |

---

**Part IV Appendix**

---

|   |     |
|---|-----|
| <b>12 Facts from General Topology</b> .....         | 559 |
| 12.1 General Topology and Borel Measures .....      | 559 |
| 12.2 The Space of Closed Sets .....                 | 563 |
| 12.3 Euclidean Spaces and Hausdorff Metric .....    | 570 |
| <b>13 Invariant Measures</b> .....                  | 575 |
| 13.1 Group Operations and Invariant Measures .....  | 575 |
| 13.2 Homogeneous Spaces of Euclidean Geometry ..... | 581 |
| 13.3 A General Uniqueness Theorem .....             | 593 |
| <b>14 Facts from Convex Geometry</b> .....          | 597 |
| 14.1 The Subspace Determinant .....                 | 597 |
| 14.2 Intrinsic Volumes and Curvature Measures ..... | 599 |
| 14.3 Mixed Volumes and Inequalities .....           | 610 |
| 14.4 Additive Functionals .....                     | 617 |
| 14.5 Hausdorff Measures and Rectifiable Sets .....  | 633 |
| <b>References</b> .....                             | 637 |
| <b>Author Index</b> .....                           | 675 |
| <b>Subject Index</b> .....                          | 681 |
| <b>Notation Index</b> .....                         | 689 |
