

Anthony C. Fischer-Cripps

Introduction to Contact Mechanics

Second Edition

Springer

Contents

Preface..... ix

List of Symbols..... xvii

History..... xix

Chapter 1. Mechanical Properties of Materials..... 1

 1.1 Introduction..... 1

 1.2 Elasticity 1

 1.2.1 Forces between atoms 1

 1.2.2 Hooke's law 2

 1.2.3 Strain energy 4

 1.2.4 Surface energy..... 4

 1.2.5 Stress..... 5

 1.2.6 Strain 10

 1.2.7 Poisson's ratio..... 13

 1.2.8 Linear elasticity (generalized Hooke's law) 14

 1.2.9 2-D Plane stress, plane strain..... 16

 1.2.10 Principal stresses..... 18

 1.2.11 Equations of equilibrium and compatibility..... 23

 1.2.12 Saint-Venant's principle..... 24

 1.2.13 Hydrostatic stress and stress deviation..... 25

 1.2.14 Visualizing stresses..... 26

 1.3 Plasticity 26

 1.3.1 Equations of plastic flow 27

 1.4 Stress Failure Criteria 28

 1.4.1 Tresca failure criterion 28

 1.4.2 Von Mises failure criterion..... 29

References..... 30

Chapter 2. Linear Elastic Fracture Mechanics.....	31
2.1 Introduction.....	31
2.2 Stress Concentrations.....	31
2.3 Energy Balance Criterion	32
2.4 Linear Elastic Fracture Mechanics	37
2.4.1 Stress intensity factor	37
2.4.2 Crack tip plastic zone	40
2.4.3 Crack resistance	41
2.4.4 K_{IC} , the critical value of K_I	41
2.4.5 Equivalence of G and K	42
2.5 Determining Stress Intensity Factors.....	43
2.5.1 Measuring stress intensity factors experimentally.....	43
2.5.2 Calculating stress intensity factors from prior stresses.....	44
2.5.3 Determining stress intensity factors using the finite-element method	47
References.....	48
Chapter 3. Delayed Fracture in Brittle Solids.....	49
3.1 Introduction.....	49
3.2 Static Fatigue	49
3.3 The Stress Corrosion Theory of Charles and Hillig	51
3.4 Sharp Tip Crack Growth Model	54
3.5 Using the Sharp Tip Crack Growth Model.....	56
References.....	59
Chapter 4. Statistics of Brittle Fracture.....	61
4.1 Introduction.....	61
4.2 Basic Statistics	62
4.3 Weibull Statistics.....	64
4.3.1 Strength and failure probability.....	64
4.3.2 The Weibull parameters	66
4.4 The Strength of Brittle Solids.....	68
4.4.1 Weibull probability function.....	68
4.4.2 Determining the Weibull parameters	69
4.4.3 Effect of biaxial stresses	71
4.4.4 Determining the probability of delayed failure.....	73
References.....	75

Chapter 5. Elastic Indentation Stress Fields	77
5.1 Introduction.....	77
5.2 Hertz Contact Pressure Distribution	77
5.3 Analysis of Indentation Stress Fields	78
5.3.1 <i>Line contact</i>	79
5.3.2 <i>Point contact</i>	80
5.3.3 <i>Analysis of stress and deformation</i>	82
5.4 Indentation Stress Fields.....	83
5.4.1 <i>Uniform pressure</i>	84
5.4.2 <i>Spherical indenter</i>	87
5.4.3 <i>Cylindrical roller (2-D) contact</i>	92
5.4.4 <i>Cylindrical (flat punch) indenter</i>	92
5.4.5 <i>Rigid cone</i>	96
References.....	100
Chapter 6. Elastic Contact.....	101
6.1 Hertz Contact Equations	101
6.2 Contact Between Elastic Solids.....	102
6.2.1 <i>Spherical indenter</i>	103
6.2.2 <i>Flat punch indenter</i>	107
6.2.3 <i>Conical indenter</i>	108
6.3 Impact	108
6.4 Friction.....	110
References.....	114
Chapter 7. Hertzian Fracture.....	115
7.1 Introduction.....	115
7.2 Hertzian Contact Equations	115
7.3 Auerbach's Law	116
7.4 Auerbach's Law and the Griffith Energy Balance Criterion.....	117
7.5 Flaw Statistical Explanation of Auerbach's Law	118
7.6 Energy Balance Explanation of Auerbach's Law	118
7.7 The Probability of Hertzian Fracture.....	124
7.7.1 <i>Weibull statistics</i>	124
7.7.2 <i>Application to indentation stress field</i>	125
7.8 Fracture Surface Energy and the Auerbach Constant.....	129
7.8.1 <i>Minimum critical load</i>	129
7.8.2 <i>Median fracture load</i>	132

7.9 Cone Cracks.....	133
7.9.1 Crack path.....	133
7.9.2 Crack size.....	134
References.....	135
Chapter 8. Elastic-Plastic Indentation Stress Fields	137
8.1 Introduction.....	137
8.2 Pointed Indenters	137
8.2.1 Indentation stress field	137
8.2.2 Indentation fracture.....	141
8.2.3 Fracture toughness.....	143
8.2.4 Berkovich indenter.....	145
8.3 Spherical Indenter.....	145
References.....	149
Chapter 9. Hardness	151
9.1 Introduction.....	151
9.2 Indentation Hardness Measurements.....	151
9.2.1 Brinell hardness number	151
9.2.2 Meyer hardness	152
9.2.3 Vickers diamond hardness.....	153
9.2.4 Knoop hardness.....	153
9.2.5 Other hardness test methods	155
9.3 Meaning of Hardness.....	155
9.3.1 Compressive modes of failure	156
9.3.2 The constraint factor	157
9.3.3 Indentation response of materials.....	157
9.3.4 Hardness theories.....	159
References.....	173
Chapter 10. Elastic and Elastic-Plastic Contact.....	175
10.1 Introduction.....	175
10.2 Geometrical Similarity.....	175
10.3 Indenter Types	176
10.3.1 Spherical, conical, and pyramidal indenters	176
10.3.2 Sharp and blunt indenters	179
10.4 Elastic-Plastic Contact.....	180
10.4.1 Elastic recovery.....	180
10.4.2 Compliance.....	183
10.4.3 The elastic-plastic contact surface.....	184

10.5 Internal Friction and Plasticity	186
References.....	188
Chapter 11. Depth-Sensing Indentation Testing	189
11.1 Introduction.....	189
11.2 Indenter	189
11.3 Load-Displacement Curve	191
11.4 Unloading Curve Analysis.....	192
11.5 Experimental and Analytical Procedures	194
11.5.1 Analysis of the unloading curve	194
11.5.2 Corrections to the experimental data.....	195
11.6 Application to Thin-Film Testing.....	197
References.....	199
Chapter 12. Indentation Test Methods.....	201
12.1 Introduction.....	201
12.2 Bonded-Interface Technique	201
12.3 Indentation Stress-Strain Response	203
12.3.1 Theoretical.....	203
12.3.2 Experimental method.....	204
12.4 Compliance Curves.....	207
12.5 Inert Strength	209
12.6 Hardness Testing	212
12.6.1 Vickers hardness.....	212
12.6.2 Berkovich indenter	214
12.7 Depth-sensing (nano) Indentation	215
12.7.1 Nanoindentation instruments	215
12.7.2 Nanoindentation test techniques	215
12.7.3 Nanoindentation data analysis.....	217
12.7.4 Nanoindentation test standards.....	217
References.....	218
Index	219
