Optical Measurement Techniques

Innovations for Industry
and the Life Sciences

With 79 Figures

Contents

Preface	V
1 Introduction	1
2 Applied Optical Spectroscopy	3
2.1 Transmission Spectroscopy	4
2.2 Measurement of Turbidity of Liquids	9
2.3 Reflection Spectroscopy	11
2.3.1 Refractometer	11
2.3.2 Reflectometer with Wavelength Scanning Mode	12
2.4 Measurement of Diffuse Reflection from Porous Media	22
2.5 On Estimation of Optical Constants of Porous Media	24
2.6 Nonlinear Optical Spectroscopy	26
2.7 Conclusions	28
3 Machine Vision Systems	31
3.1 Inspection of Plastic Cover of Mobile Telephone	31
3.2 Diffractive Optical Element Based Machine Vision Gauge for Float Glass Thickness Measurement	32
3.2.1 Diffractive Optical Element	32
3.2.2 Float Glass	33
3.2.3 DOE as an On-Line Thickness Gauge of Float Glass ...	33
3.3 Machine Vision System for Monitoring Compressed Paper	36
3.4 Imaging Spectrometer	37
3.5 Conclusions	39
4 Optical Inspection of Surface Roughness and Gloss	41
4.1 Definition of Surface Roughness Parameters	42
4.2 Optical Inspection of Finishing Marks	45

4.3	Measurement of Surface Roughness Using Laser Beam as a Probe of Specular Reflection	47
4.4	Measurement of Surface Roughness Using Focused Laser Beam	52
4.5	Low Coherent Proximity Sensor for Surface Roughness Monitoring	55
4.6	Low Coherence Interferometer as a Surface Profilometer of Porous Media	56
4.7	Specular Gloss	58
4.8	Diffractive Optical Element Based Glossmeter	60
4.9	Statistical Parameters for Gloss Assessment	64
4.10	Conclusions	66
5	Measurement of Positions, Distances, and Displacement	67
5.1	Distance Measurement	68
5.1.1	Laser Pulse Time-of-Flight Distance Measurement	73
5.2	Laser Radar	79
5.3	Gated Imaging	81
5.4	Light Beam Position Measurement Using Position Sensitive Detector (PSD)	82
5.4.1	Resolution and Turbulence	86
5.5	Applications	88
5.5.1	Traffic Control Applications	88
5.5.2	Medical Applications	90
5.5.3	Industrial Applications	92
5.5.4	Monitoring of Bridges	95
5.5.5	Railway Track Measuring and Guidance of the Tamping Machine	97
5.5.6	Marksmanship Training	99
5.6	Conclusions	100
6	Laser Velocimetry	103
6.1	Laser Doppler Velocimetry	104
6.2	Long-Range Velocity Measurements and Wind Lidars	108
6.3	Laser Doppler Microscopes	111
6.4	Doppler Optical Coherent Tomographs	116
6.5	Laser Doppler Flowmeters and Perfusion Imagers	124
6.6	Particle Image Velocimeters (Including Capillaroscopes and Angiographers)	127
6.7	Conclusions	136
	References	137
	Index	151
