

Inhaltsverzeichnis – Band II

VEHICLE TECHNOLOGY

Individualization of the drive types with the overall vehicle concept for small commercial vehicles	3
Jürgen Erhardt	
Blockchain-based Test Management in Full Vehicle Testing.	11
Oliver Braun and Johannes Eckstein	
U-Shift II Vision and Project Goals.	18
Marco Münster, Mascha Brost, Tjark Siefkes, Gerhard Kopp, Elmar Beeh, Frank Rinderknecht, Stephan Schmid, Manuel Osebek, Sebastian Scheibe, Robert Hahn, David Heyner, Philipp Klein, Giovanni Piazza, Christian Ulrich, Werner Kraft, Franz Philipps, Lennart Köhler, Michael Buchholz, Thomas Wodtke, Klaus Dietmayer, Michael Frey, Fabian Weitz, Frank Gauterin, Hannes Stoll, Marc Schindewolf, Houssein Guissouma, Felix Krauter, Eric Sax, Jens Neubeck, Sven Müller, Sven Eberts, Michael Göldner, Stephan Teichmann, Jochen Kiebler, Miralem Saljanin, Michael Bargende, and Andreas Wagner	

E-MOBILITY

The Development of a Heat Pump Based EV Thermal Management System	35
Y. Guo, C. Wei, Y. Wang, H. Sheng, J. Wu, and Z. Guo	
Well-to-Wheel Evaluation of Conventional and Alternative Powertrains for Municipal Refuse Collection Vehicles	45
Nicolas Hummel, Patrick Noone, Christian Beidl, and Niklas Kirschner	

HYBRID II

Intelligent Data Analytics with Artificial Intelligence for Hybrid Engine Restart	61
Florian Schuchter, Katharina Bause, and Albert Albers	

AUTOMATION I

Novel Approach for Vehicle-Self-Localization	75
Jochen Kiebler, Miralem Saljanin, Sven Müller, Smiljana Todorovic, Jens Neubeck, and Andreas Wagner	

Virtual Validation of Automated, Autonomous and Connected Mobility at the University Campus of Stuttgart	89
Ralf Frotscher, Frank Beutenmüller, Andreas Kirstädter, Dan Keilhoff, and Hans-Christian Reuss	

AUTOMATION II

Situation Awareness Management for Driver Take Over from Level 4 . . .	101
Christian Pfeifer, Philipp Pomiersky, and Wolfram Remlinger	

User-Oriented Development of Autonomous Vehicles using Immersive Visualization Tools	112
Lars Everding, Christian Raulf, Melanie Klapprott, and Thomas Vietor	

ELECTRIC MOTORS

Contribution of Fully Non-Magnetic Metal Materials to The Efficiency Enhancement of Electric Engines	127
Stefan Lindner	

Calculation and Experimental Characterization of the Stiffness of Laminated Back Iron for Rotors of Axial Flux Machines	137
M. Fuchslocher, T. Albrecht, S. Henzler, M. Bargende, and M. Raible	

Synergetic 1D–3D Reduced Order Modeling Techniques for Electric Motor Design Analysis	152
Dig Vijay and Nils Framke	

DRIVING RESISTANCE

Investigations into the Aerodynamic Influence of Trailers Towed by Battery Electric Passenger Cars.	171
Etienne Pudell and Christopher Edelmann	

Sensatorq, a New Approach for Measure the Forces at Wheels and Apply these to Vehicle Dynamics Control of the Future Mobility. . . .	183
Christian Schotte	

On the Importance of Highly Resolved Wind Forecasts for Range Estimation	187
Rafael Abel, Lutz Pegel, and Andreas Waldmann	

TEST & VALIDATION II

Breaktor™ Battery Disconnect Unit: Advanced Protection and Power Distribution for High Voltage Circuits in Electric Vehicles. 199
Mike Lau and Kevin Calzada

A Modular Co-Simulation Framework with Open Source Software and Automotive Standards. 207
Dominik Salles, Lukas Lang, Martin Kehrler, and Hans-Christian Reuss

The Use of Modern IT Architectures in Complex Test Scenarios of Systems Engineering. 224
Björn Hansen and Thomas Rönpage

TEST & VALIDATION I

Method for the Automatic Generation of Vehicle-Specific Individual Test Sequences 231
Hans Christian Reuss

Virtual World Meets Reality – Validation of Advanced Driver Assistance Systems 246
Rolf Magnus and Björn Butting

EMISSIONS I

Empirical Temperature Modelling of the Diesel Oxidation Catalyst. 263
Andreas Schneider, Jan Klingenstein, Hans-Jürgen Berner, and Michael Bargende

Remote Sensing Measurements and Simulations for Real Driving Emission Characterization of Vehicles 277
Justin Plogmann, Ariane Gubser, and Panayotis Dimopoulos Eggenschwiler

Simulation of Particle-Agglomerate Transport in a Particle Filter using Lattice Boltzmann Methods 292
Nicolas Hafen, Mathias J. Krause, and Achim Dittler

EMISSIONS II

Modeling of NO and CO Raw Emissions Based on Mixture Inhomogeneities in SI Engines. 307
Daniel Ismail Mir, Michael Grill, Michael Bargende, Fabian Steeger, Marco Günther, and Stefan Pischinger

A Model Approach to Simulate Exhaust Gas Temperatures of Diesel Oxidation Catalysts. 323
Tobias Stoll, Jan Klingenstein, Andreas Schneider, Michael Bargende, and Hans-Jürgen Berner

COMPONENTS I

Auditory perceived quality of manual-mechanical control elements in cars 337
Michael Tondera, Florian Reichelt, Lutz Fischer, Franziska Kern,
Jonathan Kiessling, Daniel Holder, and Thomas Maier

Answering Challenges in Oil Filter Systems for e-Axles and modern high efficient Transmissions 350
Claudia Wagner, Richard Bernewitz, Marius Panzer, Anna-Lena Winkler,
and Alexander Wöll

Automatic Bearing Damage Detection on Commercial Vehicle Cardan Shafts 359
Chris Auer and Hans-Christian Reuss

COMPONENTS II

Towards an Emission-Neutral Vehicle by Integrating a Particulate Filter System into the Frontend 371
E. Thébault, V. Raimbault, B. Junginger, M. Dos Santos Ascensao,
Q. Montaigne, D. Chalet, G. Opperbeck, and F. Keller

Novel, More Climate-Friendly, Multifunctional Light Metal Parts for Multidisciplinary Applications 387
Eugen Pfeifer

Volume Forecasts of Passenger Car Sales and Correspondding Metallic Components of VW Group Until 2030 400
Mathias Liewald and Nicolas Rose

VEHICLE DYNAMICS II

Method for the Determination of Objective Evaluation Criteria Using the Example of Combined Dynamics 427
Justus Raabe, Fabian Fontana, Jens Neubeck, and Andreas Wagner

A Validated Set of Objective Steering Feel Parameters Focusing on Non-Redundancy and Robustness 443
Erik Ketzmerick, Patrick Zösch, Hendrik Abel, Thomas Enning,
Christian Schimme, and Günther Prokop

Correction to: 22. Internationales Stuttgarter Symposium C1
Michael Bargende, Hans-Christian Reuss and Andreas Wagner

Autorenverzeichnis 467
