Zusammenfassung	1	Achriopterini GÜNTER, 1953	47
Abstract	1	Bacillidae BRUNNER VON WATTENWYL, 1893. . .	49
Contents	2	Heteropterygidae KIRBY, 1896	50
1 Introduction	2	Phylliidae BRUNNER VON WATTENWYL, 1893 ..	55
1.1 General	2	Heteronemiidae REHN, 1904	55
1.2 Tarsal morphology of insects.	2	Pseudophasmatidae REHN, 1904.	55
1.3 Tarsal morphology of Phasmatodea.	3	3.2 Euplantular microstructure in Embioptera . . .	62
1.4 Phylogenetic and functional relevance of attachment systems.	4	3.3 Euplantular microstructure: Summary	64
1.5 Aim of the study.	4	3.3.1 Phylogeny.	65
2 Material and methods	5	3.3.2 Euplantular microstructure and the type of oviposition	67
2.1 Species examined	5	3.3.3 Euplantular microstructure and the species' habitat	67
2.2 Habitat and oviposition techniques of the species.	5	3.4 Euplantula on tarsomere 5	67
2.3 Preservation of the samples.	5	4 Discussion.	68
2.4 Imaging	5	4.1 Analysis of attachment microstructure	68
3 Results.	6	4.1.1 Phylogeny.	68
3.1 Euplantular surface microstructure in Phasmatodea.	6	4.1.2 Habitat	71
Timematidae CAUDELL, 1903	6	4.1.3 Oviposition.	71
Agathemeridae BRADLER, 2003.	8	4.2 Presence of the euplantula on tarsomere 5.	72
Diapheromeridae KIRBY, 1904	9	4.3 Ontogenetical changes of adhesive micro- structures	73
Phasmatidae GRAY, 1835 excluding Lanceocercata	22	4.4 Functional aspects of euplantular micro- structures	73
Lanceocercata BRADLER, 2001.	30	4.5 Comparison with adhesive structures of Embioptera.	74
Stephanacridini Günther, 1953.	39	5 Conclusions.	75
Aschiphasmatidae BRUNNER VON WATTENWYL, 1893.	40	6 Outlook.	75
Damasippoididae ZOMPRO, 2004.	43	Acknowledgements.	76
Prisopodidae BRUNNER VON WATTENWYL, 1893.	45	References	76
Anisacanthidae GÜNTER, 1953	46	Appendix	83
