I **Diagnosis and Treatment: General Principles**

1	Clinical Approach to Inborn Errors of Metabolism in Paediatrics	3
	<i>Jean-Marie Saudubray and Ángeles García-Cazorla</i>	
1.1	Simplified Classification of IEM in 3 Groups.....	6
1.1.1	Group 1. Small Molecule Disorders (► Chaps. 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, and 34).....	6
1.1.2	Group 2. Complex Molecule Disorders (► Chaps. 35, 36, 37, 38, 39, 40, 41, 42, 43, and 44)	7
1.1.3	Group 3: Disorders Involving Energy Metabolism (► Chaps. 5, 6, 7, 8, 9, 10, 11, 12, and 13)	8
1.1.4	Clinical Approach.....	9
1.2	Antenatal and Congenital Presentations.....	9
1.2.1	Classification of Antenatal Manifestations in Three Major Clinical Categories.....	9
1.2.2	Clinical Circumstances of Presentations	14
1.3	Presentation in Neonates and Infants (<1 Year)	14
1.3.1	Neurological Deterioration (Coma, Lethargy): Metabolic Encephalopathy.....	15
1.3.2	Seizures	15
1.3.3	Hypotonia	21
1.3.4	Other Severe Motor Dysfunctions	22
1.3.5	Hepatic Presentations.....	22
1.3.6	Congenital Diarrhoeal Disorders (CDD)	23
1.3.7	Cardiac and Vascular Presentations (See Also Later Presentations 1.4.8)	23
1.3.8	Neonatal Onset Multisystemic, Chronic Inflammation Disease (NOMID).....	24
1.3.9	Initial Approach and Protocol for Investigation at the Bedside	24
1.3.10	According to this Bedside Protocol Most Patients with Neurological Findings Can Be Classified into One of Six Metabolic Types (■ Table 1.4)	25
1.4	Later Onset Emergencies: Acute and Recurrent Attacks (Early Childhood and Beyond)	27
1.4.1	Coma, Strokes and Attacks of Vomiting with Lethargy (■ Table 1.6).....	29
1.4.2	Recurrent Attacks of Ataxia (■ Table 1.7) for Adult Presentations See ► Chap. 2	33
1.4.3	Acute Psychiatric Symptoms (■ Table 1.8) for Adult Presentations See ► Chap. 2.....	33
1.4.4	Dehydration (■ Table 1.9).....	35
1.4.5	Reye Syndrome, Sudden Unexpected Death in Infancy (SUDI) and Near-Miss.....	35
1.4.6	Exercise Intolerance and Rhabdomyolysis (Recurrent Myoglobinuria) (See Also ► Sect. 2.3.10 Adult Presentations)	37
1.4.7	Abdominal Pain (Recurrent Attacks)	38
1.4.8	Cardiac Failure, Cardiac Arrhythmias and Cardiomyopathy (■ Tables 1.11 and 1.12)	38
1.4.9	Liver Failure, Ascites, Oedema	41
1.4.10	Pain in Extremities and Bone Crisis.....	41
1.4.11	Metabolic Derangements and Diagnostic Tests	42
1.4.12	Metabolic Acidosis (■ Fig. 1.2)	42
1.4.13	Ketosis (■ Fig. 1.3).....	43
1.4.14	Hyperlactataemia.....	44
1.4.15	Hypoglycaemia	45
1.4.16	Hyperammonaemia	47
1.4.17	Hyperuricaemias and Hypouricaemias	48
1.4.18	Isolated Elevated Transaminases	48
1.4.19	Glucosuria	48
1.5	Chronic and Progressive Neurological Symptoms (Mental Retardation, Developmental Delay, Epilepsy, Neurological Deterioration and Psychiatric Symptoms).....	48

1.5.1	Infants (Before 1 year).....	49
1.5.2	Early Childhood to Adolescence (>1 year to 18 years)	55
1.5.3	Onset in Adulthood (>15 years to >70 years)	87
1.5.4	Deafness.....	89
1.5.5	Head Circumference, Cephalhematomas, Subdural Hematomas (■ Table 1.22)	89
1.5.6	Neuroimaging Signs.....	89
1.5.7	Neuro-ophthalmological Signs (■ Tables 1.28 and 1.29)	89
1.5.8	Neurophysiological Signs.....	95
1.5.9	Recommended Laboratory Tests in Neurological Syndromes.....	98
1.6	Specific Organ Signs and Symptoms	98
1.6.1	Cardiology.....	98
1.6.2	Dermatology.....	98
1.6.3	Endocrinology (■ Table 1.35)	104
1.6.4	Gastroenterology and Nutritional Findings.....	107
1.6.5	Haematology	107
1.6.6	Hepatology	112
1.6.7	Immunology (See Also Neutropenia ■ Table 1.38)	114
1.6.8	Myology.....	115
1.6.9	Nephrology (■ Table 1.40).....	115
1.6.10	Neurology and Psychiatry.....	117
1.6.11	Ophthalmologic Signs.....	117
1.6.12	Orthopaedic Signs (■ Table 1.43)	117
1.6.13	Pneumology.....	120
1.6.14	Psychiatry.....	120
1.6.15	Rheumatology.....	120
1.6.16	Stomatology.....	121
	References.....	121
2	Inborn Errors of Metabolism in Adults: A Diagnostic Approach to Neurological and Psychiatric Presentations	125
	<i>Fanny Mochel and Frédéric Sedel</i>	
2.1	Differences Between Paediatric and Adult Phenotypes	126
2.2	General Approach to IEM in Adulthood	128
2.2.1	Accumulation of Small Molecules.....	128
2.2.2	Deficiency of Small Molecules.....	130
2.2.3	Accumulation of Complex Molecules.....	130
2.2.4	Deficiency of Complex Molecules.....	130
2.2.5	Disorders of Energy Metabolism	130
2.3	Specific Approaches to Neurometabolic Presentations in Adults	131
2.3.1	Encephalopathies/Comas	131
2.3.2	Strokes and Pseudo-Strokes.....	131
2.3.3	Movement Disorders	132
2.3.4	Peripheral Neuropathies.....	134
2.3.5	Leukoencephalopathies	136
2.3.6	Epilepsy.....	136
2.3.7	Psychiatric Disorders.....	136
2.3.8	Spastic Paraparesis.....	138
2.3.9	Cerebellar Ataxia	140
2.3.10	Myopathy.....	140
2.3.11	Sensorial Disorders.....	143
	References.....	144
3	Diagnostic Procedures	147
	<i>Guy Touati, Fanny Mochel, and Rafael Artuch</i>	
3.1	Basal Metabolic Investigation	148
3.1.1	Amino and Organic Acids	148

3.1.2	Metabolic Profile over the Course of the Day	148
3.2	Functional Tests	158
3.2.1	Fasting Test	158
3.2.2	Oral Glucose Loading Test.....	161
3.2.3	Glucagon Test	161
3.2.4	Exercise Test.....	162
3.3	Metabolomic Analyses for Diagnosis of IEM	162
3.4	Next Generation Sequencing and Gene Panels	163
3.5	Postmortem Protocol	164
3.5.1	Cells and Tissues for Enzyme Assays	164
3.5.2	Cells and Tissues for Chromosome and DNA Investigations.....	164
3.5.3	Skin Fibroblasts.....	164
3.5.4	Body Fluids for Chemical Investigations.....	164
3.5.5	Autopsy.....	164
	References.....	165
4	Emergency Treatments	167
	<i>Manuel Schiff, Fanny Mochel, and Carlo Dionisi-Vici</i>	
4.1	General Principles	168
4.1.1	Supportive Care	168
4.1.2	Nutrition	168
4.1.3	Specific Therapies.....	168
4.1.4	Extracorporeal Procedures for Toxin Removal.....	169
4.2	Emergency Management of Particular Clinical Presentations	169
4.2.1	Neurological Deterioration.....	169
4.2.2	Liver Failure	173
4.2.3	Neonatal Hypoglycaemia.....	173
4.2.4	Cardiac Failure	174
4.2.5	Primary Hyperlactataemia	174
4.2.6	Intractable Seizures	174
4.3	Final Considerations	175
	References.....	175

II Disorders of Energy Metabolism

5	The Glycogen Storage Diseases and Related Disorders	179
	<i>John H. Walter, Philippe Labrune, and Pascal Laforêt</i>	
5.1	Hepatic Glycogenoses	181
5.1.1	Glycogen Synthase 2 Deficiency (GSD 0a)	181
5.1.2	Glycogen Storage Disease Type I (GSD I)	183
5.1.3	Glycogen Storage Disease Type III (GSD III)	186
5.1.4	Glycogen Storage Disease Type IV (GSD IV)	187
5.1.5	Glycogen Storage Disease Type VI (GSD VI)	188
5.1.6	Glycogen Storage Disease Type IX (GSD IX).....	189
5.1.7	Fanconi-Bickel Syndrome.....	190
5.2	Muscle and Cardiac Glycogenoses	190
5.2.1	Glycogen Storage Disease Type V (Myophosphorylase Deficiency, McArdle Disease).....	190
5.2.2	Disorders of Glycolysis.....	191
5.2.3	Glycogen Storage Disease Type II (Pompe Disease)	191
5.2.4	Danon Disease (LAMP-2 Deficiency)	193
5.2.5	Glycogen Depletion Syndromes: Muscle Glycogen Synthase Deficiency (Muscle GSD Type 0, GSD 0b) and Glycogenin 1 Deficiency	193
5.2.6	Muscle and Cardiac Glycogenosis with Polyglucosan Bodies Due to <i>RBCK1</i> and <i>GYG1</i> Mutations	195
5.2.7	AMP-Activated Protein Kinase (AMPK) Deficiency	195

5.3	Brain Glycogenoses	196
5.3.1	Lafora Disease (Neuronal Laforin/Malin Defects)	196
5.3.2	Adult Polyglucosan Body Disease	196
	References.....	197
6	Congenital Hyperinsulinism and Genetic Disorders of Insulin Resistance and Signalling	201
	<i>Jean-Baptiste Arnoux and Pascale de Lonlay</i>	
6.1	Clinical Presentation	203
6.2	Metabolic Derangement.....	204
6.3	Genetics.....	204
6.4	Diagnostic Tests	205
6.5	Treatment.....	206
6.6	Prognosis.....	207
	References.....	207
7	Disorders of Glycolysis and the Pentose Phosphate Pathway	209
	<i>Mirjam M. C. Wamelink, Vassili Valayannopoulos, and Barbara Garavaglia</i>	
7.1	Muscle Phosphofructokinase (PFKM) Deficiency.....	212
7.1.1	Clinical Presentation	212
7.1.2	Metabolic Derangement	212
7.1.3	Genetics.....	214
7.1.4	Diagnostic Tests	214
7.1.5	Treatment and Prognosis	214
7.2	Aldolase A (ALDOA) Deficiency	214
7.2.1	Clinical Presentation	214
7.2.2	Metabolic Derangement	214
7.2.3	Genetics.....	214
7.2.4	Diagnostic Tests	214
7.2.5	Treatment and Prognosis	214
7.3	Triosephosphate Isomerase (TPI) Deficiency.....	215
7.3.1	Clinical Presentation	215
7.3.2	Metabolic Derangement	215
7.3.3	Genetics.....	215
7.3.4	Diagnostic Tests	215
7.3.5	Treatment and Prognosis	215
7.4	Phosphoglycerate Kinase (PGK) Deficiency	215
7.4.1	Clinical Presentation	215
7.4.2	Metabolic Derangement	215
7.4.3	Genetics.....	216
7.4.4	Diagnostic Tests	216
7.4.5	Treatment and Prognosis	216
7.5	Phosphoglycerate Mutase (PGAM) Deficiency.....	216
7.5.1	Clinical Presentation	216
7.5.2	Metabolic Derangement	216
7.5.3	Genetics.....	216
7.5.4	Diagnostic Tests	217
7.5.5	Treatment and Prognosis	217
7.6	Enolase Deficiency	217
7.6.1	Clinical Presentation	217
7.6.2	Metabolic Derangement	217
7.6.3	Genetics.....	217
7.6.4	Diagnostic Tests	217
7.6.5	Treatment and Prognosis	217
7.7	Lactate Dehydrogenase (LDH) Deficiency	217

7.7.1	Clinical Presentation	217
7.7.2	Metabolic Derangement	217
7.7.3	Genetics	217
7.7.4	Diagnostic Tests	218
7.7.5	Treatment and Prognosis	218
7.8	Glycerol Kinase Deficiency (GKD)	218
7.8.1	Clinical Presentation	218
7.8.2	Metabolic Derangement	218
7.8.3	Genetics	218
7.8.4	Diagnostic Tests	218
7.8.5	Treatment and Prognosis	219
7.9	Ribose-5-Phosphate Isomerase (RPI) Deficiency	219
7.9.1	Clinical Presentation	219
7.9.2	Metabolic Derangement	219
7.9.3	Genetics	219
7.9.4	Diagnostic Tests	220
7.9.5	Treatment and Prognosis	220
7.10	Transaldolase (TALDO) Deficiency	220
7.10.1	Clinical Presentation	220
7.10.2	Metabolic Derangement	220
7.10.3	Genetics	220
7.10.4	Diagnostic Tests	220
7.10.5	Treatment and Prognosis	221
7.11	Transketolase (TKT) Deficiency	221
7.11.1	Clinical Presentation	221
7.11.2	Metabolic Derangement	221
7.11.3	Genetics	221
7.11.4	Diagnostic Tests	222
7.11.5	Treatment and Prognosis	222
7.12	Sedoheptulokinase (SHPK) Deficiency	222
7.12.1	Clinical Presentation	222
7.12.2	Metabolic Derangement	222
7.12.3	Genetics	222
7.12.4	Diagnostic Tests	222
7.12.5	Treatment and Prognosis	222
	References.....	222
8	Disorders of Glucose and Monocarboxylate Transporters	225
	<i>René Santer and Joerg Klepper</i>	
8.1	Congenital Glucose/Galactose Malabsorption (SGLT1 Deficiency)	228
8.1.1	Clinical Presentation	228
8.1.2	Metabolic Derangement	228
8.1.3	Genetics	228
8.1.4	Diagnostic Tests	229
8.1.5	Treatment and Prognosis	229
8.2	Renal Glucosuria (SGLT2 Deficiency)	229
8.2.1	Clinical Presentation	229
8.2.2	Metabolic Derangement	229
8.2.3	Genetics	229
8.2.4	Diagnostic Tests	229
8.2.5	Treatment and Prognosis	229
8.3	Glucose Transporter-1 Deficiency Syndrome (GLUT1DS)	230
8.3.1	Clinical Presentation	230
8.3.2	Metabolic Derangement	230
8.3.3	Genetics	230
8.3.4	Diagnostic Tests	230

8.3.5	Treatment and Prognosis	231
8.4	Intellectual Developmental Disorder with Neuropsychiatric Features (PAST-A Deficiency)	231
8.4.1	Clinical Presentation	231
8.4.2	Metabolic Derangement	231
8.4.3	Genetics	232
8.4.4	Diagnostic Tests	232
8.4.5	Treatment and Prognosis	232
8.5	Fanconi-Bickel Syndrome (GLUT2 Deficiency)	232
8.5.1	Clinical Presentation	232
8.5.2	Metabolic Derangement	232
8.5.3	Genetics.....	233
8.5.4	Diagnostic Tests	233
8.5.5	Treatment and Prognosis	233
8.6	Other Defects of Glucose Transporters	233
8.7	Monocarboxylate Transporter-1 Deficiency (MCT1 Deficiency)	234
8.7.1	Clinical Presentation	234
8.7.2	Metabolic Derangement	234
8.7.3	Genetics.....	235
8.7.4	Diagnostic Tests	235
8.7.5	Treatment and Prognosis	235
8.8	Exercise-Induced Hyperinsulinism (β-Cell MCT1 Overexpression)	235
8.9	Allan-Herndon-Dudley Syndrome (MCT8 Deficiency)	235
8.9.1	Clinical Presentation	235
8.9.2	Metabolic Derangement	235
8.9.3	Genetics.....	235
8.9.4	Diagnostic Tests	235
8.9.5	Treatment and Prognosis	236
8.10	Familial Cataract, Microcornea Syndrome (MCT12 Deficiency)	236
	References.....	236
9	Disorders of Creatine Metabolism	239
	<i>Sylvia Stöckler-Ipsiroglu, Saadet Mercimek-Andrews, and Gajja S. Salomons</i>	
9.1	Clinical Presentation	241
9.1.1	Arginine: Glycine Amidinotransferase (AGAT) Deficiency	241
9.1.2	Guanidinoacetate Methyltransferase (GAMT) Deficiency	241
9.1.3	Creatine Transporter (CRTR) Deficiency	241
9.1.4	Autosomal Dominant Renal Fanconi syndrome and Kidney Failure Due to Partial AGAT Deficiency	242
9.2	Metabolic Derangement	242
9.3	Genetics	242
9.4	Diagnostic Tests	243
9.4.1	In Vivo Brain MRS and MRI	243
9.4.2	Metabolite Analysis	243
9.4.3	Molecular Genetic Investigations.....	243
9.4.4	Biochemical Functional Investigations.....	243
9.4.5	Prenatal Diagnosis	243
9.4.6	Newborn Screening	243
9.5	Treatment and Prognosis	244
9.5.1	AGAT Deficiency	244
9.5.2	GAMT Deficiency	244
9.5.3	CRTR Deficiency	244
9.5.4	Autosomal Dominant Renal Fanconi syndrome and Kidney Failure Due to Dominant <i>GATM</i> Variants.....	244
	References.....	244

10	Disorders of Oxidative Phosphorylation.....	247
	<i>Shamima Rahman and Johannes A. Mayr</i>	
10.1	Clinical Presentation	249
10.1.1	Neonatal and Infantile Presentations	250
10.1.2	Presentation in Childhood and Adolescence.....	255
10.1.3	Adult-Onset Disorders.....	256
10.2	Metabolic Derangement.....	257
10.3	Genetics.....	258
10.3.1	Mitochondrial DNA Mutations	258
10.3.2	Nuclear Gene Defects	258
10.3.3	Frequency of Mutations.....	261
10.4	Diagnostic Tests	261
10.4.1	Screening Tests.....	261
10.4.2	Muscle and Other Tissue Biopsies	262
10.4.3	Molecular Genetic Investigations.....	264
10.5	Treatment and Prognosis	265
10.5.1	Treatable Disorders.....	265
10.5.2	Supportive Management	265
10.5.3	Vitamin and Cofactor Cocktails	265
10.5.4	Experimental Approaches.....	266
10.5.5	Genetic Counselling and Prenatal and Preimplantation Genetic Diagnosis	266
10.5.6	Prognosis.....	266
	References.....	266
11	Disorders of Pyruvate Metabolism and the Tricarboxylic Acid Cycle.....	269
	<i>Michèle Brivet, Pauline Gaignard, and Manuel Schiff</i>	
11.1	Pyruvate Carboxylase (PC) Deficiency	273
11.1.1	Clinical Presentation	273
11.1.2	Metabolic Derangement	273
11.1.3	Genetics.....	274
11.1.4	Diagnostic Tests	274
11.1.5	Treatment and Prognosis	275
11.2	Phosphoenolpyruvate Carboxykinase (PEPCK) Deficiency	275
11.3	Pyruvate Dehydrogenase Complex (PDHC) Deficiency	276
11.3.1	Clinical Presentation	276
11.3.2	Metabolic Derangement	277
11.3.3	Genetics	277
11.3.4	Diagnostic Tests	278
11.3.5	Treatment and Prognosis	278
11.4	Dihydrolipoamide Dehydrogenase (DLD) Deficiency.....	279
11.4.1	Clinical Presentation	279
11.4.2	Metabolic Derangement	279
11.4.3	Genetics.....	279
11.4.4	Diagnostic Tests	279
11.4.5	Treatment and Prognosis	279
11.5	2-Ketoglutarate Dehydrogenase Complex (KDHC) Deficiency.....	279
11.5.1	Clinical Presentation	279
11.5.2	Metabolic Derangement	280
11.5.3	Genetics.....	280
11.5.4	Diagnostic Tests	280
11.5.5	Treatment and Prognosis	280
11.6	Succinyl-CoA Ligase (SUCL) Deficiency.....	280
11.7	Succinate Dehydrogenase (SDH) Deficiency	280
11.8	Fumarase (FH) Deficiency.....	281
11.9	Mitochondrial Aconitase (ACO) deficiency.....	281
11.10	Mitochondrial Isocitrate Dehydrogenase (IDH) deficiency.....	282

III Small Molecule Disorders

14	Disorders of Galactose Metabolism	315
	<i>Gerard T. Berry, John H. Walter, and Judith L. Fridovich-Keil</i>	
14.1	Galactose-1-Phosphate Uridyltransferase (GALT) Deficiency	317
14.1.1	Clinical Presentation	317
14.1.2	Metabolic Derangement	318
14.1.3	Genetics	318

14.1.4	Diagnostic Tests	318
14.1.5	Treatment and Prognosis	319
14.2	Uridine Diphosphate Galactose 4'-Epimerase (GALE) Deficiency	321
14.2.1	Clinical Presentation	321
14.2.2	Metabolic Derangement	321
14.2.3	Genetics.....	322
14.2.4	Diagnostic Tests	322
14.2.5	Treatment and Prognosis	322
14.3	Galactokinase (GALK) Deficiency	322
14.3.1	Clinical Presentation	322
14.3.2	Metabolic Derangement	322
14.3.3	Genetics.....	322
14.3.4	Diagnostic Tests	323
14.3.5	Treatment and Prognosis	323
14.4	Galactose Mutarotase (GALM) Deficiency	323
14.5	Fanconi-Bickel Syndrome	324
14.6	Portosystemic Venous Shunting and Hepatic Arteriovenous Malformations	324
	References.....	324
15	Disorders of Fructose Metabolism	327
	<i>Beat Steinmann and René Santer</i>	
15.1	Essential Fructosuria	329
15.1.1	Clinical Presentation	329
15.1.2	Metabolic Derangement	329
15.1.3	Genetics.....	329

43.3.2	GM2 Synthase Deficiency (B4GALNT1- CDG)	828
43.3.3	PIGA Deficiency (PIGA-CDG)	828
43.4	Defects in Multiple Glycosylation Pathways and in Other Pathways Including Dolicholphosphate Biosynthesis	828
43.4.1	Hereditary Inclusion Body Myopathy (GNE-CDG)	828
43.4.2	Congenital Myasthenic Syndrome-12 (GFPT1-CDG)	828
43.4.3	Steroid 5- α -Reductase Deficiency (SRD5A3-CDG)	829
43.4.4	COG6 Deficiency (COG6-CDG)	829
43.4.5	Autosomal Recessive Cutis Laxa Type 2 (ATP6V0A2-CDG)	829
43.4.6	Phosphoglucomutase 1 Deficiency (PGM1-CDG)	830
43.4.7	Golgi Homeostasis Disorders: TMEM199 and CCDC115 Deficiencies	830
43.4.8	Manganese and Zinc Transporter Defect: SLC39A8 Deficiency	830
43.5	Congenital Disorders of Deglycosylation (CDDG)	830
43.5.1	N-glycanase 1 (NGLY1) Deficiency	830
43.5.2	Lysosomal Storage Disorders	830
