FOREWORD	13
----------	----

PART A: PHILOSOPHY

CHAPTER I: TRULY-STOCHASTIC AND QUASI-STOCHASTIC SYSTEMS	19
1 RATIONALE FOR THE COMPLEMENTARITY PRINCIPLE	20
1.1 Definitions	20
1.2 Philosophy and Algebra: Assembling Operation	21
1.3 Assembling Operation and Complementarity Principle	23
1.4 Complementarity: the Property of Object or Observer?	25
2 BEING, NON-BEING, INFINITY AND TIME	28
3 BEING, EXISTENTIAL TRIADS AND ENMORPHYA	32
3.1 Being and Existential Triads	32
3.2 Enmorphya	35
3.3 Stochastic and Deterministic Processes	43
3.4 Enmorphya for Truly-Stochastic Systems	46
3.4.1 Physics	46
3.4.1.1 Enmorphyon	49
3.4.2 Communication (on the example of natural language)	53
3.5 Enmorphya for Quasi-Stochastic Systems	56
3.5.1 Education	59
3.5.2 Law	64
3.5.3 Society	69
3.6 Evolution and Self-Destruction of Quasi-Stochastic Systems	78
3.6.1 Self-Destruction of Quasi-Stochastic Systems	78
3.6.2 Evolution of Quasi-Stochastic Systems	84
3.7 Role of Enmorphya in Systems' Variativity	86
3.7.1 Variativity of Truly-Stochastic Systems	86
3.7.2 Variativity of Quasi-Stochastic Systems	88
4 ANNEXES	95
4.1 Conjunction of Systems in a System Hierarchy	95

4.2	Frequently Encountered Categorical Complementarities	103
CHAPTER II: THE HUMAN. THE ANIMATE. THE INANIMATE		111
1	ENMORPHYA OF LIVING BEINGS	112
1.1	Enmorphya of Self-Awareness	112
1.2	Principles of the Enmorphya of Living Beings	114
1.3	Variativity and Attributes of the Enmorphya of Self-Awareness	121
1.4	Enmorphotype and Artificial Intelligence	130
1.5	Terminological Dilemma: Soul, Spirit, Conscience	132
2	THE INANIMATE – THE ANIMATE – THE HUMAN	138
2.1	Living and Non-Living Systems	138
2.2	Free Will	147
2.3	Overview: the Inanimate – the Animate – the Human	155
3	CONCLUSION	161
3.1	The Animate or the Inanimate: Practical Application of System Approach	161
3.2	The Animate or the Inanimate: Theoretical Value of System Approach	163
CHAPTER III: COGNITION AND KNOWLEDGE		167
1	DEFINITION OF BASIC CONCEPTS	167
2	COGNITION AS SYSTEM PROPERTY	171
3	ADEQUATE, SOCIETATIVE AND INDIVIDUAL KNOWLEDGE	177
4	PRACTICAL APPLICATION AND ADVANTAGES	183
4.1	The Classical Knowledge Analysis	183
4.2	The Edmund Gettier Problem	184
4.3	The Alvin Goldman Problem	185
4.4	Bertrand Russell: Othello and Co.	187
5	PRACTICAL APPLICATION: THE FACTORS OF EFFICIENT COMMUNICATION	189
6	CONCLUSION	196
GLOSSARY		199

PART B: SOCIOLOGY

CHAPTER IV: THE THRIFTINESS OF NATURE AND THE STABILITY OF SOCIETY	217
1 STRATIFICATION OF SOCIETY AS A STATISTICAL NECESSITY	217
2 CONFUCIUS, HEIDEGGER AND THE SELF-IDENTIFICATION OF A PERSON	222
3 COGNITIVE EMPATHY	227
4 NORM-SETTING IN A SOCIUM AND THE ROLE OF SOCIAL NETWORKS	229
5 CONCLUSION	233
6 ANNEX	235
 CHAPTER V: POLITICAL SYSTEMS: THEIR ROOTS AND EVOLVEMENT	 237
1 INDIVIDUAL PSYCHOLOGY: PRELIMINARY CONSIDERATIONS	237
2 WHAT DOES THE MOMENTARY STATE OF A POLITICAL SYSTEM ENTAIL?	238
3 WHAT DOES THE DIACHRONIC DEVELOPMENT OF A POLITICAL SYSTEM ENTAIL?	243
4 THE LEGISLATIVE – THE JUDICIARY – THE EXECUTIVE – THE EDUCATIVE	249
5 HOW IS AUTHORITY GIVEN TO STATE POWERS?	251
6 POLITICAL IMPLICATIONS	253
7 CONCLUSION	256
 GLOSSARY	 259

PART C: PSYCHOLOGY

CHAPTER VI: PSYCHOLOGICAL TYPES: THE CONTINUATION	265
1 COMMUNICATIVE FUNCTIONS OF CONSCIOUSNESS	266
2 PSYCHOLOGICAL TYPES AS COMMUNICATIVE PERCEPTION OF PERSONALITIES	274
3 UNIVERSAL CLASSIFICATION SYSTEM OF PSYCHOLOGICAL TYPES	280
3.1 Carl Gustav Jung	281
3.1.1 Myers-Briggs (MBTI)	286
3.1.2 Socionics	293
3.2 Ernst Kretschmer	298
3.3 Fritz Riemann	305
3.4 The Existential Angst and Adaptation	313
3.5 Universal Classification System of Psychological Types	320
4 SUMMARY	323
GLOSSARY	325

PART D: PHYSICS

CHAPTER VII: EVOLUTION OF NATURE	333
1 ERGODIC HYPOTHESIS AND STRUCTURE OF TIME	333
1.1 Ergodic Hypothesis	333
1.2 Time-Ensemble Postulate: Time Progress Creates an Ensemble	334
1.3 Time Microstructure: Discreteness of 'Time Flow' and Existence of a Time Quant	335
1.4 Inferring the Ergodic Hypothesis	335
2 THE PRINCIPLE OF LEAST RESOURCES CONSUMPTION	336
2.1 Observability of States as an Effect of their Probabilistic Character	336
2.1.1 Definition of the Term 'Indeterminacy'	336
2.1.2 Indeterminacy and Entropy	337
2.1.2.1 Shannon-Entropy	337
2.1.2.2 Microcanonical Partition Function	338
2.1.2.3 Quantum Mechanical Entropy of a Macrostate	338
2.1.3 Indeterminacy and Action Quanta: Complementary Characters of the Past and the Future	339
2.1.4 Other Sense of the Heisenberg Uncertainty Principle	341
2.1.5 The Principle of Least Resources Consumption: Least Action and Most Entropy	342
2.2 Probabilistic Evolution of Nature: Information, Microstates, Alternatives and the Sense of Euler's Number	345
2.2.1 Information Value of a Macrostate	345
2.2.2 Alternatives: The Fundamental Approach	347
2.2.3 Distribution of Dimensions of Alternatives. The Sense of Euler's Number	349
2.3 Choice and Action. The Principle of Least Resources Consumption	352
2.3.1 Indeterminacy Operator and Evolution of Nature	352
2.3.2 Complementary Terms as Resource and the Principle of Least Resources Consumption	356
2.3.3 Universal Method for Description of a Nature	

	Phenomenon?	360
2.4	Nascency and Dissolution of Universes	361
2.5	Experimental Verification of the Time-ensemble Postulate	367
2.6	Global Irreversibility of Nature Evolution	367
3	SPACE MICROSTRUCTURE	369
3.1	Space Quanta	369
3.2	Space Translations	371
3.3	Representation of Elementary Particles	375
4	PHYSICAL THEORIES AS CONSEQUENCES OF THE PRINCIPLE OF LEAST RESOURCES CONSUMPTION	377
4.1	Classical Dynamics	379
4.2	Quantum Mechanics	380
4.3	Theories of Relativity	386
4.3.1	Special Theory of Relativity	389
4.3.2	General Theory of Relativity	390
4.4	Electrodynamics	394
4.5	Statistical Physics	397
5	SUMMARY	400
6	ANNEX	408
6.1	A.1: Entropy of a State Generator	408
6.2	A2: Geometry-neutral Phase Translation Equation	410
	REFERENCES	413
