

Table of Contents

Introduction: Impact of GP's Scientific Work	1
<i>Solomon Marcus</i>	

I General Computing

Knowing All Optimal Solutions Does Not Help for TSP Reoptimization	7
<i>Hans-Joachim Böckenhauer, Juraj Hromkovič, and Andreas Sprock</i>	
A Recurrent Enumeration of Free Hypermultisets	16
<i>Vincenzo Manca</i>	
Context Insertions	24
<i>Paolo Bottoni, Radu Gramatovici, Anna Labella, Florin Manea, and Victor Mitran</i>	
A General Framework for Regulated Rewriting Based on the Applicability of Rules	35
<i>Rudolf Freund, Marian Kogler, and Marion Oswald</i>	

II Grammar Systems

CD Grammar Systems: Competence and Confidence	57
<i>Erzsébet Csuhaj-Varjú</i>	
Cooperating Distributed Grammar Systems: Components with Nonincreasing Competence	70
<i>Maurice H. ter Beek, Erzsébet Csuhaj-Varjú, Markus Holzer, and György Vaszil</i>	
On the Expressive Power of Valences in Cooperating Distributed Grammar Systems	90
<i>Henning Fernau and Ralf Stiebe</i>	
Generative Power of Eco-Colonies	107
<i>Alica Kelemenová and Šárka Vavrečková</i>	

III Membrane Systems

Selected Topics in Computational Complexity of Membrane Systems ...	125
<i>Petr Sosík</i>	
A Temporal Logic for Mutual Mobile Membranes with Objects on Surface	138
<i>Bogdan Aman and Gabriel Ciobanu</i>	
Computing the Maximum Bisimulation with Spiking Neural P Systems	151
<i>Rodica Ceterchi and Alexandru I. Tomescu</i>	
P Colonies and their Extensions	158
<i>Luděk Cienciala and Lucie Ciencialová</i>	
On the Parallelizability of Languages Accepted by P Automata	170
<i>György Vaszil</i>	

IV Inspirations from Natural Computing

On Some Biologically Motivated Control Devices for Parallel Rewriting	181
<i>Arto Salomaa</i>	
Reaction Systems with Duration	191
<i>Robert Brijder, Andrzej Ehrenfeucht, and Grzegorz Rozenberg</i>	
Nanomachine Computing by Quorum Sensing	203
<i>Jiří Wiedermann</i>	
Author Index	217
