Preface — V

1 Preliminaries — 1

- 1.1 Structure of $\mathfrak{g}$ — 1
- 1.2 The flag variety — 1
- 1.3 Finite-dimensional and highest weight representations — 2
- 1.4 Symmetric subgroups of G — 4
- 1.5 Harish–Chandra modules and differential operators on G/B — 5
- 1.6 Nilpotent orbits and orbital varieties — 7

2 Polynomial representations and the flag variety — 10

- 2.1 Schur modules — 10
- 2.2 Identification and irreducibility of the modules V^λ — 14
- 2.3 Defining equations of the flag variety — 16
- 2.4 Cohomology of the flag variety — 19
- 2.5 Symplectic groups — 24
- 2.6 Orthogonal groups — 24
- 2.7 The general case and line bundles — 26

3 Associated, characteristic, and orbital varieties — 27

- 3.1 Definitions of the characteristic variety and moment map — 27
- 3.2 K -orbits in X — 29
- 3.3 The closure order on K -orbits — 33
- 3.4 Orbital varieties and Springer fibers — 37

4 Singularities of orbit closures — 46

- 4.1 Smooth and rationally smooth points — 46
- 4.2 Criterion for rational smoothness — 47
- 4.3 Symmetric varieties — 50

5 Kazhdan–Lusztig polynomials and the Hecke algebra — 53

- 5.1 The Hecke algebra and the R -polynomials — 53
- 5.2 Kazhdan–Lusztig polynomials — 55
- 5.3 Another construction — 58
- 5.4 Inverse KL polynomials — 60
- 5.5 Cones, cells, and W -graphs — 61
- 5.6 Applications to representation theory — 65
- 5.7 Applications to geometry — 72

6	Lusztig–Vogan polynomials and Harish-Chandra modules — 77
6.1	$\mathbb{Z}/2\mathbb{Z}$ data — 77
6.2	Circle and cross actions — 80
6.3	The Hecke module — 82
6.4	Applications — 85

7	Pattern avoidance and singularities of orbit closures — 88
7.1	Pattern avoidance for classical Schubert varieties — 88
7.2	Root subsystem pattern avoidance — 90
7.3	Pattern avoidance for symmetric varieties — 94
7.4	Richardson varieties and symmetric orbits in type $A///$ — 99
7.5	Interval pattern avoidance — 101

8	Springer fibers — 105
8.1	The two-column case — 105
8.2	Particular components — 107
8.3	Cohomology of Springer fibers — 110
8.4	Orbital varieties in general — 111

Bibliography — 115

Index — 123
