Preface — V

List of contributors — IX

Francesco Gamardella, Silvia De la Flor, Xavier Ramis, Àngels Serra

1 Toward the recyclability of thermosetting polymers — 1

Iuliana Cota

2 Ring-opening polymerization of cyclic esters using lanthanide complex catalysts for obtention of polymers with biomedical applications: complete survey of the last two decades — 47

Monissa Pederes, Deepak Ahirwal, Susana Fernandez Prieto

3 Natural and synthetic polymers in fabric and home care applications — 85

Bartosz Tylkowski, Anna Trojanowska, Martyna Nowak, Lukasz Marciniak, Renata Jastrzab

4 Applications of silver nanoparticles stabilized and/or immobilized by polymer matrixes — 117

Bartosz Tylkowski, Anna Trojanowska, Magdalena Olkiewicz, Iuliana Cota, Adrianna Nogalska, Ricard Garcia Valls, Marta Giamberini, Josep M. Montornes

5 Polymer chemistry in development of encapsulation technologies — 143

Maciej Staszak

6 Modeling and simulation of membrane process — 177

Alireza Zare, Xavier Montané, José Antonio Reina, Marta Giamberini

7 Applications of membranes in sustainable energy systems: energy production and storage — 219

Karolina Wieszczycka, Katarzyna Staszak

8 Polymers in separation processes — 249

Julia Genova, Maria Dencheva-Zarkova, Iuliana Cota, Magdalena Olkiewicz,
Josep M. Montornes, Marcin Luczak, Anna Bajek, Szymon Roszkowski,
Katarzyna Bialczyk, Grazyna Zukowska, Bartosz Tylkowski, Irene Tsibranska

**9 Application of polymers for separation/filtration of biologically active
compounds — 309**

Index — 329
