Abstract i

Zusammenfassung ii

Contents iii

1 Introduction 1

1.1 Scope and Outline 2

2 Physical and Mathematical Fundamentals 5

2.1 Introduction to Differential Geometry in Three-Dimensional Space 5

2.2 Surface Tension and Capillarity 10

2.3 Governing Equations of Multiphase Flows with Surface Tension 17

3 Discretization and Numerical Methods 25

3.1 Finite Volume Methods 25

3.2 Overview of Numerical Methods for Multiphase Flows with Surface Tension 32

3.3 Volume-of-Fluid Methods 36

3.4 Piecewise Linear Interface Calculation (PLIC) 41

3.5 Height Function Method 47

4 Implementation 57

4.1 General procedure 57

4.2 Updating the geometry 58

4.3 Advection 64

4.4 SIMPLE-Type Solver 65

5 Results 67

5.1 Investigating the Height Function Approximations 67

5.2 Spurious Currents 80

5.3 Capillary Tube 87

5.4 Potting 90

6 Conclusion 93

Bibliography 95
