

Contents

1	Introduction	1
1.1	Financial Time Series and the GARCH Model	1
1.2	The Limit of the Classical Statistical Analysis	3
1.3	An Alternative Approach: the Bootstrap Techniques	5
1.4	Structure of the Book	7
2	Bootstrap Does not Always Work	9
2.1	Estimation of Heteroscedasticity and Bootstrap	10
2.2	Result of a False Application: the VaR Model	13
3	Parametric AR(p)-ARCH(q) Models	19
3.1	Estimation Theory	19
3.2	Residual Bootstrap	37
3.3	Wild Bootstrap	52
3.4	Simulations	60
4	Parametric ARMA(p, q)- GARCH(r, s) Models	65
4.1	Estimation Theory	65
4.2	Residual Bootstrap	68
4.3	Wild Bootstrap	76
4.4	Simulations	80
5	Semiparametric AR(p)-ARCH(1) Models	85
5.1	Estimation Theory	85
5.2	Residual Bootstrap	98
5.3	Wild Bootstrap	115
5.4	Simulations	117
	Appendix	121
A	Central Limit Theorems	123
B	Miscellanea	125

Bibliography	127
Index	131
