

V. I. Feodosiev

Advanced Stress and Stability Analysis

Worked Examples

Translated by S. A. Voronov and S. V. Yaresko

With 487 Figures

Contents

Part I. Problems and Questions	
---------------------------------------	--

1. Tension, Compression and Torsion	3
2. Cross-Section Geometry Characteristics: Bending	17
3. Complex Stress State, Strength Criteria, Anisotropy	33
4. Stability	41
5. Various Questions and Problems	63

Part II. Answers and Solutions	
---------------------------------------	--

1. Tension, Compression and Torsion	81
2. Cross-Section Geometry Characteristics. Bending	127
3. Complex Stress State, Strength Criteria, Anisotropy	195
4. Stability	219
5. Various Questions and Problems	359
