Volume 1 (From Construction Materials to Technical Gases)

Preface — V

List of contributors — XV

1 Construction materials and coatings — 1

- 1.1 Basics of cement chemistry — **1**
Peter Boos
- 1.2 Inorganic insulation materials — **21**
Rainer Pöttgen, Thomas Fickenscher
- 1.3 Conservation: silicon chemistry in building protection — **29**
Markus Boos
- 1.4 Inorganic pigments — **47**
Sascha Broll, Rainer Pöttgen, Cristian A. Strassert
- 1.5 Anodized aluminum and particle coatings — **59**
Thomas Jüstel, Konstantin Lider
- 1.6 Vitreous enamel — **78**
Jörg Wendel
- 1.7 Flame retardants — **96**
Andreas Termath

2 Metals and intermetallics — 113

- 2.1 Resources: ores, recycling and urban mining — **113**
Martin Bertau
- 2.2 Special steels and alloys for industrial use — **123**
Rainer Behrens
- 2.3 Metallic light-weight alloys: Al, Ti, Mg — **158**
Oliver Janka

- 2.4 Copper and copper alloys — 174**
Bernd E. Langner
- 2.5 Solder materials in electronics — 192**
Jörg Trodler
- 2.6 Metallic coatings — 207**
Ralf Feser
- 2.7 Be and Be alloys — 221**
Magnus Buchner, Oliver Janka
- 2.8 Metals for implants and prosthesis — 229**
Detlef Behrend, Mareike Warkentin
- 2.9 Precious metals — 237**
Egbert Lox, Oliver Niehaus
- 2.10 Shape memory alloys — 255**
Stefan Engel, Oliver Janka
- 2.11 Bulk metallic glasses — 265**
Stefan Engel, Oliver Janka

3 Technical glasses — 271

- 3.1 Ultra-strong glasses and glass-ceramics and bioactive materials — 271**
Hellmut Eckert, Martin Letz
- 3.2 Special glasses for optical and electrical device applications — 294**
Martin Letz, Hellmut Eckert
- 3.3 Glass fibers — 316**
Florian Winter

4 Technical gases — 331

Martin V. Dewalsky, Rainer Pöttgen

Subject index — 347

Formula index — 357

Volume 2 (From Energy Storage to Photofunctional Materials)

5 Energy storage and conversion

- 5.1 Battery materials
Michael Ghidui, Theodoor Hendriks, Wolfgang Zeier
- 5.2 Magnetocaloric materials
Yaroslav Mudryk, Vitalij K. Pecharsky
- 5.3 Materials for thermoelectric devices
Ananya Banik, Matthias Agne, Wolfgang Zeier
- 5.4 Hydrogen storage materials
Holger Kohlmann, Leonhard Yuuta Dorsch
- 5.5 Solar cell materials
Konrad Mertens
- 5.6 Thermal energy storage materials
Thomas Bauer
- 5.7 High-energy materials
Thomas M. Klapötke
- 5.8 Nuclear materials
Nils Haneklaus

6 Ionic solids

- 6.1 Ressources: minerals, recycling and urban mining
Martin Bertau, Peter Fröhlich, Sandra Pavón
- 6.2 Phosphates
Robert Glaum, Thomas Staffel
- 6.3 Borate applications
Hubert Huppertz, Raimund Ziegler
- 6.4 Slags as materials ressource
Oliver Janka, Martin Bertau, Rainer Pöttgen

6.5 Salts in nutrition products
Heiko Hayen

6.6 Fertilizers
Robert Glaum

6.7 Natural and synthetic gemstones
Lothar Ackermann, Tom Stephan

7 Catalytic and active framework materials

7.1 Homogeneous catalysis
Markus Seifert, Jan J. Weigand

7.2 Heterogeneous catalysts
Klaus Stöwe

7.3 Zeolites for ion exchange, adsorption and catalysis
Hubert Koller

7.4 Metal-organic frameworks
Christoph Janiak

8 Photofunctional materials

8.1 Solid state lighting materials
Thomas Jüstel, Florian Baur

8.2 Upconverters
Florian Baur, Thomas Jüstel

8.3 Organometallic Ir(III) and Pt(II) complexes in phosphorescent
OLEDs – an industrial perspective
Ilona Stengel, Stefan Schramm

8.4 Luminescent thermometry materials
Miroslav Dramicanin

8.5 Crystals for solid-state lasers
Christian Kränkel

8.6 NLO materials

Shilie Pan, Wenqi Jin, Zhihua Yang

8.7 Excimer, mercury and sodium dischargers

Manfred Salvermoser

8.8 Inorganic scintillators

Florian Baur, Thomas Jüstel
