

Table of Contents

Part 1: Computational Visualization and Optimization

Visual Immersive Haptic Mathematics in Shared Virtual Spaces	1
<i>Alexei Sourin, Olga Sourina, Lei Wei, and Paul Gagnon</i>	
The Voronoi Diagram of Circles and Its Application to the Visualization of the Growth of Particles	20
<i>François Anton, Darka Mioc, and Christopher Gold</i>	
Designing Aircraft Cockpit Displays: Borrowing from Multimodal User Interfaces	55
<i>Mladjan Jovanovic, Dusan Starcevic, and Zeljko Obrenovic</i>	
Parallel Optimal Weighted Links	66
<i>Ovidiu Daescu, Yam K. Cheung, and James D. Palmer</i>	
Parallel Simulation of Oil Reservoirs on a Multi-core Stream Computer	82
<i>Fadi N. Sibai and Hashir Karim Kidwai</i>	

Part 2: Computational Methods for Model Design and Analysis

Efficient Reversible Logic Design of BCD Subtractors	99
<i>Himanshu Thapliyal, Hamid R. Arabnia, and M.B. Srinivas</i>	
Missing Data Analysis: A Kernel-Based Multi-Imputation Approach	122
<i>Shichao Zhang, Zhi Jin, Xiaofeng Zhu, and Jilian Zhang</i>	
The Average Solution of a Stochastic Nonlinear Schrodinger Equation under Stochastic Complex Non-homogeneity and Complex Initial Conditions	143
<i>Magdy A. El-Tawil</i>	
Neural Network Representation for the Forces and Torque of the Eccentric Sphere Model	171
<i>Mostafa Y. Elbakry, Mohammed El-Helly, and Mahmoud Y. Elbakry</i>	
Author Index	185
