

Bogdan Povh Mitja Rosina

Scattering and Structures

Essentials and Analogies
in Quantum Physics

Translated by Martin Lavelle

 Springer

Contents

1	Photon Scattering	1
1.1	Compton Effect	1
1.2	Thomson Scattering	3
1.2.1	Classical Derivation	3
1.2.2	Quantum Mechanical Derivation	5
1.2.3	Quantum Mechanical Interpretation of r_e	7
1.3	Form Factor	8
1.3.1	Geometrical Interpretation of the Form Factor	8
1.3.2	Dynamical Interpretation of the Form Factor	10
1.4	Recoilless Scattering Off Crystals	11
1.5	Photon Scattering Off Free Electrons	12
	Literature	14
2	Lepton Scattering	15
2.1	Electron-Quark Scattering	15
2.1.1	Mott Scattering	16
2.1.2	Inclusion of Quark Spin	20
2.2	Electron-Nucleon Scattering	20
2.2.1	Nucleon Radius	21
2.2.2	Nucleon Form Factor	21
2.3	Neutrino-Electron Scattering	22
2.4	Neutrino-Quark Scattering	24
2.4.1	Weak Potential	25
	Literature	26
3	Quasi-elastic Lepton-Quark Scattering	27
3.1	Virtual Weizsäcker-Williams Photons	28
3.2	Virtual Bjorken-Feynman Partons	31

3.2.1	Electron Scattering Off Quarks	32
3.2.2	Neutrino Scattering Off Quarks	34
3.2.3	Gluon Bremsstrahlung	37
3.3	Coupling Constants	40
3.3.1	Electromagnetic Coupling Constant α	41
3.3.2	Strong Coupling Constant α_s	43
3.3.3	Weak Coupling Constant α_w	44
	Literature	44
4	The Hydrogen Atom	45
4.1	Level Diagram	45
4.1.1	Semiclassical	45
4.1.2	Dirac Level Diagram	47
4.1.3	Zitterbewegung	49
4.1.4	Spin-Orbit Splitting	51
4.2	Lamb Shift	52
4.2.1	Zero-Point Oscillation	53
4.3	Hyperfine Structure	55
4.4	Hydrogen-Like Atoms	56
4.4.1	Muonic Atoms	57
	Literature	59
5	Many Electron Atoms	61
5.1	Binding Energies	61
5.1.1	The Helium Atom	61
5.1.2	Correlations	62
5.1.3	The Negative H^- Ion	62
5.1.4	The 2s, 2p Shells	63
5.2	Atomic Radii	64
5.2.1	Hydrogen and Helium	64
5.2.2	Thomas-Fermi Model	66
5.2.3	Alternative Definitions	69
5.3	Atoms with Magnetic Moment	70
5.4	Ferromagnetism and Antiferromagnetism	71
	Literature	73
6	Hadrons	75
6.1	Quarkonia	75
6.2	Hadrons from Light Quarks	78
6.2.1	Nonrelativistic Quark Model	78

6.3	Chiral Symmetry Breaking	80
6.3.1	Constituent Quark	82
6.3.2	The Pion	87
6.3.3	Generalisation to $m_0 > 0$ and Two Quark Flavours	88
6.3.4	The Pion as a Collective State	89
Literature		93
7	Covalent and Ionic Bonding	95
7.1	The Covalent Bond	95
7.1.1	The Hydrogen Molecule – A Case of Broken Symmetry	96
7.1.2	An Analogy	99
7.1.3	Covalent Bond in the (2s, 2p) Shells	100
7.1.4	Energy Source Oxygen	101
7.2	Ionic Bonds	101
Literature		102
8	Intermolecular Forces	103
8.1	Van der Waals Interaction	103
8.1.1	Van der Waals Interaction Between an Atom and a Conducting Wall	104
8.1.2	Van der Waals Interaction Between Two Atoms	104
8.1.3	Van der Waals Interaction and the Casimir Effect	105
8.1.4	Wall–Wall Interaction	107
8.2	Hydrogen Bridge Bond	109
8.2.1	Water	109
8.2.2	Water Molecule	109
8.2.3	Model of the Hydrogen Bridge Bond	110
8.2.4	Ice	111
8.2.5	Specific Heat	112
8.3	Hydrogen Bridge Bond in Biology	112
8.3.1	Primary Structures	112
8.3.2	Secondary Structure	113
8.3.3	α Helix	113
8.3.4	β -Pleated Sheet	113
8.3.5	Tertiary Structure and Higher Levels	115
Literature		115

9	Cold Neutron Scattering	117
9.1	Dispersion Relations for Crystals	118
9.1.1	Sodium Crystal	120
9.1.2	Potassium Bromide Crystal	121
9.2	Localised Vibrational Mode	121
9.3	Dispersion Relations for Amorphous Substances . . .	125
9.4	Specific Heat	126
9.4.1	Crystalline Substances	126
9.4.2	Amorphous Substances	128
	Literature	129
10	The Nuclear Force and the Deuteron	131
10.1	The Nuclear Force	131
10.1.1	Repulsion at Short Distances	132
10.1.2	Attraction	133
10.2	The Deuteron	134
10.3	^3H , ^3He , ^4He	135
	Literature	137
11	Quantum Gases	139
11.1	Fermi Gas	141
11.1.1	Fermi Energy, Fermi Momentum, Fermi Temperature	141
11.1.2	Transition to a Degenerate Fermi Gas	142
11.2	Bosonic Gas	143
11.2.1	Bose-Einstein Condensation	143
	Literature	146
12	Quantum Liquids	149
12.1	Normal Liquid ^3He	149
12.2	Superfluid ^4He	151
12.3	Superfluid Helium Droplets	155
12.4	Superfluid ^3He	156
	Literature	157
13	Metals	159
13.1	Metallic Bond	159
13.1.1	Metallic Hydrogen	159
13.1.2	Normal Metals	162
13.2	Electrical Conductivity	164

13.3 Cooper Pairs	164
13.4 Diamagnetism in Superconductors	168
13.5 Macroscopic Quantum Interference	170
13.6 Thermal Conductivity	173
Literature	176
14 Nuclei – Droplets of a Fermi Liquid	177
14.1 Global Properties – the Fermi-Gas Model	178
14.2 Individual Properties – Shell Model	179
14.3 Collective Excitations	181
14.3.1 Vibrational States	181
14.3.2 Model	182
14.3.3 Deformation and Rotational States	186
14.3.4 Deformation Versus Cooper Pairs	188
Literature	189
15 Stars, Planets, and Asteroids	191
15.1 The Sun and Sun-Like Stars	191
15.1.1 Equation of State	192
15.1.2 Virial Theorem	193
15.1.3 Size and Temperature	194
15.1.4 Proton Energy	194
15.1.5 Electron Energy	195
15.1.6 White Dwarfs	195
15.1.7 Brown Dwarfs	196
15.2 Energy Production in the Sun	197
15.2.1 Proton-Proton Cycle	198
15.2.2 $3\alpha \rightarrow {}^{12}\text{C}$ -Process	203
15.3 Stars More Massive than the Sun	206
15.3.1 Neutron Stars	206
15.3.2 Black Holes	207
15.3.3 Element Abundance	207
15.4 Planets and Asteroids	209
Literature	211

16 Elementary Particles	213
16.1 Families of Particles	213
16.1.1 $W^\pm$ Boson Decays	213
16.1.2 Parity Violation and Weak Isospin	216
16.1.3 $K^0-\bar{K}^0$, $B^0-\bar{B}^0$ Oscillations and CP Violation	218
16.1.4 Neutrino Oscillations	220
16.2 Weak Quark Decays	224
16.2.1 Top Quark Decay	225
16.3 Z^0 and the Photon	226
16.4 Higgs ex Machina	228
16.5 Proton Decay	233
Literature	237
17 The Early Universe	239
17.1 The Three Pillars of the Big Bang Model	241
17.1.1 The Expanding Universe	241
17.1.2 Cosmic Microwave Background Radiation	244
17.1.3 Primordial Abundance of the Elements	246
17.2 Some Problems with the Big Bang Model	248
17.2.1 Particle–Antiparticle Asymmetry	249
17.2.2 Dark Matter	250
17.2.3 Physics at the Planck Scale	251
Literature	252
Physical Constants	255
Index	257
