

Table of Contents

- Executive Summary 1**
- Zusammenfassung 5**
- Introduction 9**
- Chapter 1: Theory, Data and Methods 13**
 - 1.1 Theoretical Foundation 13
 - 1.1.1 Capabilities Approach 13
 - 1.1.2 Decent Living Standards 16
 - 1.1.3 Energy Justice 18
 - 1.2 Data and methods 20
 - 1.2.1 Overview of datasets 22
 - 1.2.2 Overview of methods 23
- Chapter 2: Reflecting on the Status Quo 27**
 - 2.1 Energy Services 27
 - 2.2 Measurement Frameworks 28
 - 2.2.1 Multi-dimensional Energy Poverty Index (MEPI) 29
 - 2.2.2 Total Energy Access (TEA) 30
 - 2.2.3 Multi-tier Framework for Measuring Energy Access (MTF) 32
 - 2.3 Global Goals and National Targets 37
 - 2.3.1 Defining national energy access aggregates 37
 - 2.3.2 Adapting and simplifying the MTF 38
- Chapter 3: Measuring Supply and Consumption 43**
 - 3.1 Household electricity supply and consumption in rural Northern India 43
 - 3.1.1 Linking distinct electricity supply attributes and use 44
 - 3.1.2 Exploring energy services utilisation 47
 - 3.2 Productive electricity use among MSEs in rural Northern India 49
 - 3.2.1 Linking grid supply quality with MSE connection and use 50
 - 3.2.2 Describing rural MSE productive electricity use 53
 - 3.3 Capturing inequities: A case study in rural Nepal 56
 - 3.3.1 Distributional and recognition justice in energy access planning 56
 - 3.3.2 Measuring energy supply and use 57

3.3.3 Mapping energy supply inequities	62
Chapter 4: Aligning Measures with Capabilities	65
4.1 An alternative framework for measuring progress towards SDG 7.1 . .	65
4.1.1 Applying the alternative framework	67
4.1.2 Unmasking inequities	70
4.2 A case study of energy access inequities in rural northern India . . .	75
4.2.1 Energy access trends among the marginalised	75
4.2.2 Differences in access and supply trends across the full dataset	77
4.2.3 Differences in supply trends for SDG 7.1 households	80
Synthesis	83
