

G. Radons · W. Just · P. Häussler (Eds.)

Collective Dynamics of Nonlinear and Disordered Systems

With 153 Figures

 Springer

Contents

Part I Pattern Formation and Growth Phenomena

Introduction to Part I	
.....	3
Kinetic Pattern Formation at Solid Surfaces	
<i>Joachim Krug</i>	5
Nonlinear Dynamics and Pattern Formation in Semiconductor Systems	
<i>Eckehard Schöll</i>	39
Group Theoretic Methods in the Theory of Pattern Formation	
<i>Rudolf Friedrich</i>	61
On Fundamental Structure-Forming Processes	
<i>Peter Häussler</i>	85

Part II Dynamics of Disordered Systems

Introduction to Part II	
.....	123
Glass Transition in Colloids and Undercooled Liquids	
<i>Reiner Zorn, Ulrich Buchenau</i>	125
Experimental Investigations of Collective Excitations in Disordered Matter	
<i>Jens-Boie Suck</i>	147
Theories of the Structural Glass Transition	
<i>Rolf Schilling</i>	171

VIII Contents

**Glassy Dynamics and Aging
in Disordered Systems**

Heinz Horner 203

Nonlinear Dynamics in Aperiodic Crystals

Ted Janssen 237

Part III Complex and Chaotic Behaviour

Introduction to Part III

..... 269

Disordered Dynamical Systems

Günter Radons 271

Lyapunov Instability of Fluids

Harald A. Posch, Christina Forster 301

**On Symbolic Dynamics
of Space-Time Chaotic Models**

Wolfram Just 339

Complex Adaptive Systems

Heinz Georg Schuster 359

Index 371
