Preface for the Second Edition **V**

Preface for the First Edition **VII**

1 Foundation **1**

1.1 Knowledge **3**

 1.1.1 Knowledge in Organizational Settings **4**

 1.1.2 Definition **15**

1.2 Knowledge Work **21**

 1.2.1 Definition and Characteristics **22**

 1.2.2 Traditional Work versus Knowledge Work **24**

1.3 Knowledge Management **28**

 1.3.1 Roots of Knowledge Management **28**

 1.3.2 From Data to Knowledge Management **29**

 1.3.3 Definition **32**

1.4 Knowledge Management Instruments **33**

 1.4.1 Definition **34**

 1.4.2 Product-oriented Instruments **36**

 1.4.3 Process-oriented Instruments **39**

 1.4.4 Knowledge Maturing **42**

1.5 Information System Architectures **45**

 1.5.1 System Architectures **47**

 1.5.2 Enterprise Architectures **56**

1.6 Knowledge Infrastructures **64**

 1.6.1 Definition **64**

 1.6.2 Knowledge Management Services **69**

 1.6.3 Architecture of Knowledge Infrastructures **75**

2 Infrastructure **83**

2.1 Network Infrastructure **84**

 2.1.1 Topologies **85**

 2.1.2 Geographical Expansion **88**

 2.1.3 Layered Network Architecture **89**

2.2 Network Standards	91
2.2.1 Physical and Data Link Layer	91
2.2.2 Network and Transport Layer	100
2.2.3 Application Layer	105
2.2.4 Network Management	110
2.2.5 Network Hardware	112
2.3 Infrastructure Services	114
2.3.1 Storage	114
2.3.2 Security	126
2.3.3 Application Infrastructure	137
 3 Integration Services	 151
3.1 Data Integration	153
3.1.1 Semi-structured Data	154
3.1.2 Uniform Resource Identifier and Unicode	156
3.1.3 Extensible Markup Language (XML)	157
3.1.4 XML Schema	162
3.1.5 XSL Transformation	165
3.2 Meta-data-based Integration	172
3.2.1 Meta-data Standards	175
3.2.2 Resource Description Framework (RDF)	178
3.2.3 Storing and Querying Meta-data	183
3.2.4 Meta-data Dimensions	191
3.3 Ontology-based Integration	205
3.3.1 Ontology	206
3.3.2 RDF Schema	210
3.3.3 Web Ontology Language (OWL)	213
3.3.4 Higher Levels of the Semantic Web Stack	218
3.4 Function and Process Integration	219
3.4.1 Function Integration	219
3.4.2 Process Integration	225
3.4.3 Web Service Composition	231
3.4.4 Semantic Web Services	234
 4 Knowledge Services	 241
4.1 Investigation Services	242
4.1.1 Foundation	244
4.1.2 Exploration	246
4.1.3 Search	257
4.1.4 Presentation	264
4.1.5 Monitoring	267

4.2 Individuation Services	271
4.2.1 Foundation	272
4.2.2 Experience	273
4.2.3 Expression	276
4.2.4 Competence	278
4.2.5 Expertise	281
4.3 Interaction Services	285
4.3.1 Foundation	286
4.3.2 Initiation	290
4.3.3 Networking	292
4.3.4 Communication	294
4.3.5 Community	301
4.4 In-form-ation Services	305
4.4.1 Foundation	306
4.4.2 Capturing	312
4.4.3 Manipulation	318
4.4.4 Translation	321
4.4.5 Archiving	326
4.5 Instruction Services	331
4.5.1 Foundation	333
4.5.2 Enriching	341
4.5.3 Composition	346
4.5.4 Consumption	353
4.5.5 Assessment	357
 5 Access Services	 365
5.1 Server-side Access Technologies	366
5.1.1 Portals	366
5.1.2 Personalization	370
5.2 Client-side Access Technologies	374
5.2.1 Thin Clients	374
5.2.2 Rich Thin Clients	378
5.2.3 Rich Clients	380
5.2.4 Desktop Integration	382
5.3 Mobile Access	390
5.3.1 Mobile Computing	390
5.3.2 Mobile Devices	394
5.3.3 Mobile Applications	399

6 Conclusion 407

6.1 Situation-oriented Support of Knowledge Work 408

6.2 Context Factors for Knowledge Sharing 412

6.3 State-of-Practice of Knowledge Management 416

6.4 Centralized versus Distributed Architectures 420

6.5 Chances and Risks of Web 2.0 from a Knowledge Perspective 424

6.6 The Future of Knowledge Infrastructures 429

Bibliography 433
