Preface	V
<i>Hartmut Stadtler, Christoph Kilger</i>	
Introduction	1
<i>Hartmut Stadtler</i>	
References	5

Part I. Basics of Supply Chain Management

1 Supply Chain Management – An Overview	9
<i>Hartmut Stadtler</i>	
1.1 Definitions	9
1.2 Building Blocks	11
1.3 Origins	24
References	33
2 Supply Chain Analysis	37
<i>Christopher Sürie, Michael Wagner</i>	
2.1 Motivation and Goals	37
2.2 Process Modelling	39
2.3 Performance Measurement	49
2.4 Inventory Analysis	56
References	62
3 Types of Supply Chains	65
<i>Herbert Meyr, Hartmut Stadtler</i>	
3.1 Motivation and Basics	65
3.2 Functional Attributes	66
3.3 Structural Attributes	69
3.4 Example for the Consumer Goods Industry	71
3.5 Example for Computer Assembly	76
References	80
4 Advanced Planning	81
<i>Bernhard Fleischmann, Herbert Meyr, Michael Wagner</i>	
4.1 What is Planning?	81
4.2 Planning Tasks Along the Supply Chain	86
4.3 Examples of Type-Specific Planning Tasks and Planning Concepts	92
References	106

5 **Structure of Advanced Planning Systems** 109
 Herbert Meyr, Michael Wagner, Jens Rohde
 References 115

6 **Strategic Network Planning** 117
 Mark Goetschalckx, Bernhard Fleischmann
 6.1 Components of the Strategic Network Design Problem 121
 6.2 Review of Models in the Literature 127
 6.3 Modelling Strategic Supply Chain Design 128
 6.4 SNP Modules in Advanced Planning Systems 133
 6.5 Conclusions 134
 References 136

7 **Demand Planning** 139
 Michael Wagner
 7.1 A Demand Planning Framework 139
 7.2 Statistical Forecasting Techniques 143
 7.3 Incorporation of Judgmental Factors 148
 7.4 Additional Features 150
 References 157

8 **Master Planning** 159
 Jens Rohde, Michael Wagner
 8.1 The Decision Situation 160
 8.2 Model Building 166
 8.3 Generating a Plan 174
 References 177

9 **Demand Fulfilment and ATP** 179
 Christoph Kilger, Lorenz Schneeweiss
 9.1 Available-to-Promise (ATP) 180
 9.2 Allocated ATP 186
 9.3 Order Promising 191
 References 195

10 **Production Planning and Scheduling** 197
 Hartmut Stadler
 10.1 Description of the Decision Situation 197
 10.2 How to Proceed from a Model to a Production Schedule 198
 10.3 Model Building 201
 10.4 Updating Production Schedules 207
 10.5 Number of Planning Levels and Limitations 209
 References 213

11 Purchasing and Material Requirements Planning	215
<i>Hartmut Stadler</i>	
11.1 Basics of Material Requirements Planning	215
11.2 Generation and Timing of Uncritical Orders	217
11.3 Quantity Discounts and Supplier Selection	222
References	226
12 Distribution and Transport Planning	229
<i>Bernhard Fleischmann</i>	
12.1 Planning Situations	229
12.2 Models	235
References	243
13 Coordination and Integration	245
<i>Jens Rohde</i>	
13.1 Coordination of APS Modules	245
13.2 Integration of APS	248
13.3 Supply Chain Event Management	256
References	257
14 Collaborative Planning	259
<i>Christoph Kilger, Boris Reuter</i>	
14.1 Introduction	260
14.2 Types of Collaborations	262
14.3 A Generic Collaboration Process	270
14.4 Software Support	276
References	278

Part III. Implementing Advanced Planning Systems

15 The Definition of a Supply Chain Project	281
<i>Christoph Kilger</i>	
15.1 Supply Chain Evaluation	283
15.2 Supply Chain Potential Analysis	291
15.3 Project Roadmap	297
References	300
16 The Selection Process	303
<i>Christoph Kilger, Ulrich Wetterauer</i>	
16.1 Creation of a Short List	304
16.2 APS Requirements	309
16.3 Implementation and Integration	311
16.4 Post-implementation Effort and Support Model	315
References	316

17 The Implementation Process	317
<i>Ulrich Wetterauer, Herbert Meyr</i>	
17.1 The APS Implementation Project	317
17.2 Modelling Phases of an APS-Project	332
References	337

Part IV. Actual APS and Case Studies

18 Architecture of Selected APS	341
<i>Herbert Meyr, Jens Rohde, Michael Wagner, Ulrich Wetterauer</i>	
18.1 i2 Technologies – i2 Six.One	341
18.2 Peoplesoft – EnterpriseOne TM Supply Chain Planning	346
18.3 SAP – APO	350
References	353

19 SCM in a Pharmaceutical Company	355
<i>Frank Altrichter, Tanguy Caillet</i>	
19.1 Case Description	355
19.2 Objectives of Project	358
19.3 Planning Processes	361
19.4 Results and Lessons Learned	369

20 Food and Beverages	371
<i>Michael Wagner, Herbert Meyr</i>	
20.1 Case Description	371
20.2 Aim of the Project	377
20.3 Model Building in Peoplesoft Strategic Network Optimization ...	377
20.4 Implementing the Master Planning model	381
20.5 Results and Lessons Learned	387
References	388

21 Computer Assembly	389
<i>Christoph Kilger, Lorenz Schneeweiss</i>	
21.1 Description of the Computer Assembly Case	389
21.2 Scope and Objectives	393
21.3 Planning Processes in Detail	395
21.4 Summary and Lessons Learned	405
References	406

22 Demand Planning of Styrene Plastics	407
<i>Boris Reuter</i>	
22.1 Description of the Supply Chain	407
22.2 The Architecture of the Planning System	408
22.3 Model Building with SAP APO Demand Planning	410
22.4 The Demand Planning Process of the Styrene Plastics Division ..	415

22.5 Concluding Remarks	419
References	420
23 Semiconductor Manufacturing	421
<i>Lorenz Schneeweiss, Ulrich Wetterauer</i>	
23.1 Case Description	421
23.2 Objectives of Project	425
23.3 Model Building with the i2 Factory Planner	427
23.4 Lessons Learned	434
24 Scheduling of Synthetic Granulate	435
<i>Marco Richter, Volker Stockrahm</i>	
24.1 Case Description	435
24.2 Objectives	437
24.3 Modelling the Production Process in APO PP/DS	437
24.4 Planning Process	448
24.5 Results and Lessons Learned	449

Part V. Conclusions and Outlook

25 Conclusions and Outlook	455
<i>Hartmut Stadler</i>	
References	458

Part VI. Supplement

26 Forecast Methods	461
<i>Herbert Meyr</i>	
26.1 Forecasting for Seasonality and Trend	461
26.2 Initialization of Trend and Seasonal Coefficients	467
References	471
27 Linear and Mixed Integer Programming	473
<i>Hartmut Stadler</i>	
27.1 Linear Programming	473
27.2 Pure Integer and Mixed Integer Programming	477
27.3 Remarks and Recommendations	481
References	483
28 Genetic Algorithms	485
<i>Robert Klein</i>	
28.1 General Idea	485
28.2 Populations and Individuals	486
28.3 Evaluation and Selection of Individuals	488
28.4 Recombination and Mutation	490

28.5	Conclusions	491
	References	492
29	Constraint Programming	493
	<i>Robert Klein</i>	
29.1	Overview and General Idea	493
29.2	Constraint Satisfaction Problems	494
29.3	Constraint Propagation	495
29.4	Search Algorithms	497
29.5	Concluding Remarks	498
	References	499
	Index	501
	About Contributors	509
