

Contents

- 1 Introduction** 1
- 2 Theory** 5
 - 2.1 Model Description 5
 - 2.1.1 Diffusive Motion under Lorentz Force 5
 - 2.1.2 Probabilistic Description 7
 - 2.2 Diffusion with Finite Size Effects 9
 - 2.3 Matched Asymptotic Expansion 11
 - 2.4 Collision Integral 15
 - 2.5 Single Species Model 17
 - 2.6 Final Equation 19
 - 2.7 Summary 21
- 3 Numerical Results** 23
 - 3.1 Numerical Method 23
 - 3.2 Central Derivative 25
 - 3.3 Charged versus Uncharged Particles in 2 Dimensions 28
 - 3.4 Summary 31
- 4 Self-Diffusion** 33
 - 4.1 Diffusion Coefficients 33
 - 4.1.1 Self- and Collective Diffusion 34
 - 4.1.2 Two-Species Diffusion 37
 - 4.2 Mechanism of Enhanced Self-Diffusion 40
 - 4.3 Summary 45

5	First-Principles Approach to Self-Diffusion	47
6	Conclusions and Outlook	53
	Bibliography	57
