35 Doppler Echocardiographic Assessment of Fetal Cardiac Failure

William J. Ott 517

Introduction	517
Fetal Cardiac Anatomy and Physiology	517
Fetal Cardiac Response to Stress	519
The Scope of Fetal Cardiac Failure	520
Duplex Doppler Evaluation of the Fetal Cardiovascular System	520
Umbilical Venous Pulsations	521
Other Studies	521
Velocity Measurements Across the Atrioventricular Valves	522

Ventricular Outflow Velocities	523
Ductus Arteriosus	523
Errors in Doppler Blood Flow Velocity Measurements	523
Clinical Conditions Associated with Fetal Heart Failure	524
Congenital Heart Disease	524
Fetal Hydrops	526
Twin–Twin Transfusion Syndrome	530
Intrauterine Growth Restriction	531
Diabetes Mellitus	531
Other Causes of Fetal Heart Failure	532
Summary and Conclusion	532
References	533
