
Contents

The Rosetta Stone of L-functions <i>Enrico Bombieri</i>	1
New Encounters in Combinatorial Number Theory: From the Keakeya Problem to Cryptography <i>J. Bourgain</i>	17
Perspectives and Challenges to Harmonic Analysis and Geometry in High Dimensions: Geometric Diffusions as a Tool for Harmonic Analysis and Structure Definition of Data <i>R.R. Coifman</i>	27
Open Questions on the Mumford–Shah Functional <i>Guy David</i>	37
Multi-scale Modeling <i>Björn Engquist</i>	51
Mass in Quantum Yang–Mills Theory (Comment on a Clay Millennium Problem) <i>L. D. Faddeev</i>	63
On Scaling Properties of Harmonic Measure <i>Peter W. Jones</i>	73
The Heritage of Fourier <i>Jean-Pierre Kahane</i>	83
The Quantum-Mechanical Many-Body Problem: The Bose Gas <i>Elliott H. Lieb, Robert Seiringer, Jan Philip Solovej, Jakob Yngvason</i> ...	97

Meromorphic Inner Functions, Toeplitz Kernels and the Uncertainty Principle	
<i>N. Makarov, A. Poltoratski</i>	185
Heat Measures and Unitarizing Measures for Berezinian Representations on the Space of Univalent Functions in the Unit Disk	
<i>Paul Malliavin</i>	253
On Local and Global Existence and Uniqueness of Solutions of the 3D Navier–Stokes System on \mathbb{R}^3	
<i>Ya. G. Sinai</i>	269
Analysis on Lie Groups: An Overview of Some Recent Developments and Future Prospects	
<i>Nicholas Th. Varopoulos</i>	283
Encounters with Science: Dialogues in Five Parts	
<i>Lars Gårding</i>	295
