# Fuzzy Database Modeling of Imprecise and Uncertain Engineering Information

 Springer

# Contents

|                                                                                |    |
|--------------------------------------------------------------------------------|----|
| 1 Engineering Information Modeling in Databases .....                          | 1  |
| 1.1 Introduction .....                                                         | 1  |
| 1.2 Conceptual Data Models.....                                                | 2  |
| 1.2.1 ER/EER Models .....                                                      | 2  |
| 1.2.2 UML Class Model .....                                                    | 7  |
| 1.2.3 IDEF1X Model.....                                                        | 9  |
| 1.2.4 EXPRESS Model.....                                                       | 15 |
| 1.3 Logical Database Models .....                                              | 19 |
| 1.3.1 Relational Database Model.....                                           | 19 |
| 1.3.2 Nested Relational Database Model.....                                    | 21 |
| 1.3.3 Object-Oriented Database Model .....                                     | 23 |
| 1.4 Constructions of Database Models .....                                     | 26 |
| 1.4.1 Development of Conceptual Data Models.....                               | 27 |
| 1.4.2 Development of Logical Database Models .....                             | 28 |
| 1.5 Summary.....                                                               | 29 |
| References .....                                                               | 30 |
| 2 Information Imprecision and Uncertainty in Engineering .....                 | 33 |
| 2.1 Introduction .....                                                         | 33 |
| 2.2 Imprecision and Uncertainty in Engineering .....                           | 33 |
| 2.2.1 Product Preliminary Design.....                                          | 34 |
| 2.2.2 R2R Controller Implementation .....                                      | 37 |
| 2.2.3 Production Activity Control (PAC).....                                   | 38 |
| 2.3 Representation of Imprecise and Uncertain Engineering<br>Information ..... | 42 |
| 2.4 Summary.....                                                               | 44 |
| References .....                                                               | 44 |
| 3 Fuzzy Sets and Possibility Distributions .....                               | 47 |
| 3.1 Introduction .....                                                         | 47 |
| 3.2 Imperfect Information.....                                                 | 47 |
| 3.2.1 Null and Partial Values.....                                             | 48 |
| 3.2.2 Probabilistic Values.....                                                | 49 |

|                                                                      |    |
|----------------------------------------------------------------------|----|
| 3.2.3 Fuzzy Values .....                                             | 49 |
| 3.3 Representations of Fuzzy Sets and Possibility Distributions..... | 50 |
| 3.4 Operations on Fuzzy Sets .....                                   | 52 |
| 3.4.1 Set Operations .....                                           | 52 |
| 3.4.2 Arithmetic Operations .....                                    | 53 |
| 3.4.3 Relational Operations .....                                    | 54 |
| 3.4.4 Logical Operations .....                                       | 55 |
| 3.5 Summary.....                                                     | 56 |
| References .....                                                     | 56 |
| 4 The Fuzzy ER/EER and UML Data Models.....                          | 59 |
| 4.1 Introduction .....                                               | 59 |
| 4.2 The Fuzzy ER/EER Data Models .....                               | 60 |
| 4.2.1 Three Levels of Fuzziness in ER Data Model .....               | 60 |
| 4.2.2 The Fuzzy EER Data Model.....                                  | 61 |
| 4.3 The Fuzzy UML Data Model .....                                   | 66 |
| 4.3.1 Fuzzy Class.....                                               | 66 |
| 4.3.2 Fuzzy Generalization.....                                      | 68 |
| 4.3.3 Fuzzy Aggregation .....                                        | 71 |
| 4.3.4 Fuzzy Association .....                                        | 73 |
| 4.3.5 Fuzzy Dependency .....                                         | 76 |
| 4.4 Summary.....                                                     | 76 |
| References .....                                                     | 77 |
| 5 The Fuzzy IDEF1X Models.....                                       | 79 |
| 5.1 Introduction .....                                               | 79 |
| 5.2 Fuzzy Entities and Fuzzy Entity Instances .....                  | 79 |
| 5.3 Fuzzy Attributes and Fuzzy Attribute Values.....                 | 81 |
| 5.4 Fuzzy Connection Relationships .....                             | 83 |
| 5.5 Fuzzy Non-specific Relationships .....                           | 84 |
| 5.6 Fuzzy Categorization Relationships .....                         | 85 |
| 5.7 Summary.....                                                     | 87 |
| References .....                                                     | 87 |
| 6 The Fuzzy EXPRESS Model.....                                       | 89 |
| 6.1 Introduction .....                                               | 89 |
| 6.2 Fuzziness in Basic Elements.....                                 | 90 |
| 6.2.1 Reserved Words.....                                            | 90 |
| 6.2.2 Literals.....                                                  | 90 |
| 6.3 Fuzzy Data Type Modeling with EXPRESS .....                      | 94 |
| 6.3.1 Pseudo Types.....                                              | 95 |
| 6.3.2 Simple Data Types .....                                        | 95 |

|                                                                   |     |
|-------------------------------------------------------------------|-----|
| 6.3.3 Collection Data Types .....                                 | 98  |
| 6.3.4 Enumeration Type .....                                      | 101 |
| 6.3.5 Select Type .....                                           | 102 |
| 6.4 Fuzzy Declarations .....                                      | 103 |
| 6.4.1 Constant .....                                              | 103 |
| 6.4.2 Type .....                                                  | 104 |
| 6.4.3 Entity .....                                                | 104 |
| 6.4.4 Algorithm .....                                             | 110 |
| 6.4.5 Rule .....                                                  | 111 |
| 6.4.6 Schema .....                                                | 111 |
| 6.5 Expressions with Fuzzy Information .....                      | 111 |
| 6.5.1 Arithmetic Operators .....                                  | 112 |
| 6.5.2 Relational Operators .....                                  | 114 |
| 6.5.3 Logical Operators .....                                     | 119 |
| 6.5.4 String and Binary Operators .....                           | 119 |
| 6.5.5 Aggregate Operators .....                                   | 120 |
| 6.6 Fuzzy Extensions to Interface and Executable Statements ..... | 122 |
| 6.6.1 The Interface Specification .....                           | 122 |
| 6.6.2 Executable Statements .....                                 | 123 |
| 6.7 The Fuzzy EXPRESS-G Model .....                               | 126 |
| 6.7.1 Fuzziness in Entity Level Model .....                       | 126 |
| 6.7.2 Fuzziness in Schema Level Model .....                       | 130 |
| 6.8 Applicability of the Fuzzy EXPRESS .....                      | 131 |
| 6.9 Conceptual Design of the Fuzzy EXPRESS Model .....            | 133 |
| 6.10 Summary .....                                                | 135 |
| References .....                                                  | 135 |
| 7 The Fuzzy Logical Databases .....                               | 137 |
| 7.1 Introduction .....                                            | 137 |
| 7.2 The Fuzzy Relational Databases .....                          | 137 |
| 7.2.1 The Fuzzy Relational Database Models .....                  | 138 |
| 7.2.2 Semantic Measure and Data Redundancies .....                | 140 |
| 7.3 The Fuzzy Nested Relational Database Model .....              | 144 |
| 7.4 The Fuzzy Object-Oriented Databases .....                     | 146 |
| 7.4.1 Fuzzy Objects and Fuzzy Classes .....                       | 148 |
| 7.4.2 Fuzzy Inheritance Hierarchies .....                         | 151 |
| 7.4.3 The Fuzzy Object-Oriented Database Model .....              | 154 |
| 7.5 Summary .....                                                 | 155 |
| References .....                                                  | 155 |
| 8 Conceptual Designs of the Fuzzy Databases .....                 | 159 |
| 8.1 Introduction .....                                            | 159 |
