The Earth's Magnetism

An Introduction for Geologists

With 167 Figures and 6 Tables

Springer

Contents

1	The Earth's Magnetic Field	1
1.1	Observations and Geomagnetic Measurements	2
1.1.1	The Magnetic Dipole	2
1.1.2	Elements of the Earth's Magnetic Field	5
1.1.3	Early Measurements of the Earth's Magnetic Field	7
1.1.4	Modern Magnetic Measurements	11
1.2	Mathematical Description	16
1.2.1	Spherical Harmonic Analysis	16
1.2.2	Methods for g_n^m and h_n^m Computation	21
1.2.3	Results of Spherical Harmonic Analysis	23
1.2.4	A Predominantly Dipolar Field	24
1.2.5	Geomagnetic Coordinates	27
1.2.6	Harmonic Power Spectra of the Geomagnetic Field	31
1.3	Time Variations	33
1.3.1	Secular Variation	34
1.3.2	Magnetic Tomography and Interpretation of Secular Variation	39
1.3.3	Geomagnetic Jerks	40
1.3.4	External Origin Time Variations	42
1.4	Essentials on the Origin of the Earth's Magnetic Field	48
1.4.1	Toroidal and Poloidal Fields	49
1.4.2	Fundamental Equations of Magnetohydrodynamics	50
1.4.3	Elementary Dynamo Models	53
1.4.4	Dynamo Energy	56
1.5	Magnetic Observatories, Reference Field Models and Indices	59
1.5.1	Geomagnetic Observatories	59
1.5.2	Geomagnetic Field Reference Models	61
1.5.3	Geomagnetic Indices	62
	Suggested Readings and Sources of Figures	66
2	Basic Principles of Rock Magnetism	67
2.1	Magnetic Properties of Solids	69
2.1.1	Diamagnetism	69
2.1.2	Paramagnetism	69
2.1.3	Ferromagnetism	72
2.1.4	Conclusion	76

2.2	Magnetic Remanence	76
2.2.1	Magnetic Energies	77
2.2.2	Magnetic Hysteresis	80
2.2.3	Remanence Acquisition	82
2.2.4	Magnetic Domains	83
2.2.5	Remanence vs. Time	85
2.3	Magnetic Properties of Minerals	88
2.3.1	Magnetic Susceptibility	88
2.3.2	Fe-Ti Oxides	90
2.3.3	Fe Sulfides	92
2.4	Ferromagnetic Minerals in Rocks	93
2.4.1	Igneous Rocks	93
2.4.2	Sedimentary Rocks	95
2.4.3	Metamorphic Rocks	96
	Suggested Readings and Sources of Figures	97
3	Magnetic Prospecting	99
3.1	Instruments and Surveying Procedures	100
3.2	Magnetic Anomalies	102
3.2.1	Data Processing	103
3.2.2	Summary of Operations	104
3.3	Significance of Magnetic Anomalies	105
3.3.1	Forward Modeling	107
3.3.2	Inverse Modeling	111
3.3.3	Spectral Characteristics	113
3.3.4	Other Frequently Used Techniques	116
3.4	Satellite Magnetic Measurements	118
3.5	Applications of Magnetic Anomalies	119
	Suggested Readings and Sources of Figures	126
4	Paleomagnetism	127
4.1	Magnetic Remanence in Rocks	127
4.1.1	Thermal Remanent Magnetization (TRM)	127
4.1.2	Chemical Remanent Magnetization (CRM)	130
4.1.3	Detrital and Post-Depositional Remanent Magnetization (DRM, pDRM)	132
4.1.4	Isothermal Remanent Magnetization (IRM)	135
4.1.5	Viscous Remanent Magnetization (VRM)	137
4.1.6	Other Remanent Magnetizations	137
4.1.7	Timing of Remanence Acquisition	138
4.2	Sampling Techniques	139
4.3	Laboratory Techniques	140
4.3.1	Remanence Measurements	140
4.3.2	Demagnetization	141
4.3.3	Identification of Magnetic Minerals	147
4.4	Paleomagnetic Directions and Poles	150
4.4.1	Statistical Analysis	151

4.4.2	Field Tests	154
4.4.3	Tilt Correction and Paleomagnetic Direction	156
4.4.4	Virtual Geomagnetic Pole (VGP) and Paleopole	157
4.5	Paleomagnetic Information	159
4.5.1	Geodynamics and Paleogeography	159
4.5.2	Regional Tectonics	164
4.5.3	Volcanism	167
4.5.4	Prospection	169
4.5.5	Paleofield	170
	Suggested Readings and Sources of Figures	175
5	Magnetic Fabric of Rocks	177
5.1	Magnetic Anisotropy	177
5.2	Laboratory Techniques	183
5.3	Magnetic Fabric	186
5.3.1	Sedimentary Rocks	186
5.3.2	Igneous Rocks	188
5.3.3	Magnetic Fabric and Deformation	194
5.4	Anisotropy and Remanence	198
	Suggested Readings and Sources of Figures	201
6	Magnetic Signature of the Earth's Crust	203
6.1	Oceanic Crust	205
6.2	Continental Crust	210
6.3	Global Maps of the Earth's Field	213
	Suggested Readings and Sources of Figures	216
7	Magnetic Chronology	217
7.1	Geomagnetic Polarity Time Scale (GPTS)	218
7.2	Magnetic Stratigraphy	225
7.3	Paleosecular Variation	227
7.4	Archaeomagnetism	231
	Suggested Readings and Sources of Figures	234
8	Environmental Geomagnetism	235
8.1	Environmental Prospecting	235
8.2	Enviromagnetic Parameters and Techniques	238
8.3	Magnetic Climatology	241
8.4	Magnetism and Pollution	246
8.5	Seismo- and Volcanomagnetism	248
	Suggested Readings and Sources of Figures	252
9	Historical Notes	253
9.1	The Very Ancient Times	253
9.2	A Light in the Middle Ages	255
9.3	The Discovery of Declination and Inclination	256
9.4	Geomagnetism in Gilbert's Epoch	258

9.5	Secular Variation	259
9.6	Geomagnetism from Gauss Onwards	261
9.7	Rock Magnetism	262
	Suggested Readings and Sources of Figures	264
Appendix – Magnetic Quantities, SI and cgs Units, Conversion Factors		265
