

Contents

List of contributors	VII
Preface	IX

I. Background and basic science

<i>Lyonel G. Israels and Esther D. Israels</i> Erythropoiesis: an overview	3
<i>MaryAnn Foote</i> Studies of erythropoiesis and the discovery and cloning of recombinant human erythropoietin	15
<i>Timothy Osslund and Rashid Syed</i> Structural basis for the signal transduction of erythropoietin	25
<i>Christof Dame</i> Molecular biology of the erythropoietin receptor in hematopoietic and non-hematopoietic tissues	35
<i>Saghi Ghaffari, Lily Jun-shen Huang, Jing Zhang, and Harvey F. Lodish</i> Erythropoietin receptor signaling processes	65
<i>Anne C. Heatherington</i> Clinical pharmacokinetic properties of rHuEPO: a review	87
<i>Graham Molineux</i> Biology of erythropoietin	113
<i>Alice S. Chuck, Rohini R. Deshpande, Adrian R. Distler, Shane A. Sander, and James E. Seely</i> Commercial production of recombinant erythropoietins	133

II. Clinical use of recombinant erythropoietins

<i>Iain C. Macdougall</i> Use of recombinant erythropoietins in the setting of renal disease ...	153
---	-----

John Glaspy

Erythropoietic therapy in the practice of oncology 163

Robert T. Means, Jr.

Use of recombinant erythropoietins for the treatment of anemia
of chronic disease 185

Fred D. Cushner

Use of erythropoietins in the surgical setting 197

Don H. Catlin, Caroline K. Hatton, and Françoise Lasne

Abuse of recombinant erythropoietins by athletes 205

Patrick Mayeux and Nicole Casadevall

Antibodies to endogenous and recombinant erythropoietin 229

Steven G. Elliott

New molecules and formulations of recombinant human
erythropoietin 241

Glossary and abbreviations 259

Index 263
