

G.A. Holzapfel R.W. Ogden (Eds.)

Mechanics of Biological Tissue

With 212 Figures and 14 Tables

Contents

Part I Tissue Growth and Remodelling

Towards a Theory of Vascular Growth and Remodeling <i>J.D. Humphrey</i>	3
Complementary Roles of Theoretical Modeling and Computer-controlled Experimentation in Vascular Growth and Remodeling <i>R.L. Gleason, E. Wilson, J.D. Humphrey</i>	17
On the Modeling of Growth and Adaptation <i>S.C. Cowin</i>	29
Growth in Soft Biological Tissue and Residual Stress Development <i>A. Guillou, R.W. Ogden</i>	47
Characterization and Modeling of Growth and Remodeling in Tendon and Soft Tissue Constructs <i>E.M. Arruda, S.C. Calve, K. Garikipati, K. Grosh, H. Narayanan</i>	63
Modeling and Simulation of Remodeling in Soft Biological Tissues <i>E. Kuhl, A. Menzel, K. Garikipati, E. M. Arruda, K. Grosh</i>	77
Anisotropic Remodelling of Biological Tissues <i>A. Menzel</i>	91
A Mechanobiological Formulation of Bone Healing <i>M. Doblaré, J.M. García-Aznar, M.J. Gómez-Benito</i>	105

**Continuum Models of Growth with Emphasis
on Articular Cartilage**

S.M. Klisch 119

Part II Micromechanics, Cells and Matrix

Tensile Properties and Local Stiffness of Cells

K. Hayashi 137

**Microfluid-dynamics in Three-dimensional Engineered Cell
Systems**

F. Boschetti, M.T. Raimondi, F. Migliavacca, M. Cioffi, R. Pietrabissa . 153

Nonlinear Constitutive Models for Cochlear Outer Hair Cells

K. Grosh, N. Deo 165

**Prediction of Changes in Cell-substrate Contact under Cyclic
Substrate Deformation Using Cohesive Zone Modelling**

J.P. McGarry, B.P. Murphy, P.E. McHugh 177

**Micromechanics and Macromechanics of the Tensile
Deformation of Nacre**

H.J. Qi, B.J.F. Bruet, J.S. Palmer, C. Ortiz, M.C. Boyce 189

Part III Arteries in Health and Disease

Mechanical Properties of Atherosclerotic Tissues

P.D. Richardson 207

**Towards a Computational Methodology for Optimizing
Angioplasty Treatments with Stenting**

G.A. Holzapfel, M. Stadler, Th.C. Gasser 225

**Computational Modeling of Stented Arteries: Considerations
for Evolving Stent Designs**

M.R. Moreno, J. Bedoya, C. Meyer, J.E. Moore Jr. 241

**Simulation of In-stent Restenosis for the Design
of Cardiovascular Stents**

C. Lally, P.J. Prendergast 255

**Material Property Alterations with Early Atheroma
in an Animal Model**

K.B. Chandran, H. Kim, D.D. McPherson 269

Microscopic Analysis of Residual Stress and Strain in the Aortic Media Considering Anisotropy of Smooth Muscle Layer	
<i>T. Matsumoto, T. Furukawa, K. Nagayama</i>	283
Parameter Identification in Arteries Using Constraints	
<i>J. Stålhand, A. Klarbring</i>	295
Collagen Organization and Biomechanics of the Arteries and Aneurysms of the Human Brain	
<i>P.B. Canham, R.M. Korol, H.M. Finlay, R.R. Hammond, D.W. Holdsworth, G.G. Ferguson, A.R. Lucas</i>	307
Image-based Simulation of Blood Flow and Arterial Wall Interaction for Cerebral Aneurysms	
<i>M. Oshima, R. Torii, T. Takagi</i>	323

Part IV Biological Tissues

A Framework for Soft Tissue and Musculo-skeletal Modelling: Clinical Uses and Future Challenges	
<i>J.W. Fernandez, H. Schmid, P.J. Hunter</i>	339
Invariant Formulation for Dispersed Transverse Isotropy in Tissues of the Aortic Outflow Tract	
<i>D.R. Einstein, A.D. Freed, I. Vesely</i>	355
Mathematical Modelling of Cardiac Mechanoenergetics	
<i>J. Engelbrecht, M. Vendelin</i>	369
Creep and Relaxation in Ligament: Theory, Methods and Experiment	
<i>A.L. Oza, R. Vanderby, R.S. Lakes</i>	379
Viscoelastic Constitutive Law Based on the Time Scale of the Mechanical Phenomena	
<i>D.P. Pioletti</i>	399
A Coupled FE Analysis of the Intervertebral Disc Based on a Multiphasic TPM Formulation	
<i>W. Ehlers, B. Markert, N. Karajan, A. Acartürk</i>	405
Is the Free Energy of Hydrogel the Sum of Elastic Energy and Ionic Energy?	
<i>R.W. Roos, J.M. Huyghe, F.P.T. Baaijens</i>	421

In Vivo Experiments to Characterize the Mechanical Behavior of the Human Uterine Cervix	
<i>E. Mazza, A. Nava, M. Bauer, R. Winter, M. Bajka, G.A. Holzapfel . . .</i>	431
Viscoelastic Response of Vocal Fold Tissues and Scaffolds at High Frequencies	
<i>R.J. Clifton, X. Jia, T. Jiao, C. Bull, M.S. Hahn</i>	445
An Alternative Fabric-based Yield and Failure Criterion for Trabecular Bone	
<i>Ph. Zysset, L. Rincón</i>	457
Part V Image-based Analysis	
Functional Micro-imaging at the Interface of Bone Mechanics and Biology	
<i>R. Müller, A. Nazarian, P. Schneider, M. Stauber, P. Thurner, G.H. van Lenthe, R. Voide</i>	473
Strain Measurement Using Deformable Image Registration	
<i>J.A. Weiss, A.I. Veress, G.T. Gullberg, N.S. Phatak, Q. Sun, D. Parker, R.D. Rabbitt</i>	489
Image-based Hierarchical Analysis and Design of Tissue Engineering Scaffolds	
<i>S.J. Hollister, C.Y. Lin, C.Y. Lin</i>	503
Index	517
