

Table of Contents

1. Plio-Quaternary Magmatism in Italy: Introductory Overview ...	1
1.1. Introduction	1
1.2. Geochronology and Petrology	1
1.3. Regional Distribution of Magma Types	5
1.4. Regional Variation of Trace Element and Sr-Nd-Pb-O Isotopic Compositions	6
1.5. Magmatic Provinces in Italy	10
1.6. Petrogenesis and Geodynamics: a Preliminary Perspective	15
1.7. Conclusions	16
2. The Tuscany Province	17
2.1. Introduction	17
2.2. Regional Geology	17
2.3. Compositional Characteristics of Tuscany Magmatism	20
2.4. Silicic Magmatism	24
2.4.1. Effusive Rocks	24
2.4.2. Intrusive Rocks	28
2.5. Mafic Magmatism	31
2.6. Petrogenesis	38
2.6.1. Silicic Magmatism	38
2.6.2. Mafic Magmatism	39
2.6.3. Summary of Petrogenetic History	42
2.7. Geodynamic Implications	43
2.8. Conclusions	46
3. The Intra-Apennine Province	51
3.1. Introduction	51
3.2. Regional Geology	51
3.3. Compositional Characteristics of Intra-Apennine Magmatism	53
3.3.1. San Venanzo	54
3.3.2. Cupaello	56

3.3.3.	Polino	57
3.3.4.	Intra-Apennine Pyroclastic Deposits	58
3.3.5.	Colle Fabbri	60
3.4.	Petrogenesis	60
3.4.1.	Kamafugitic Rocks	61
3.4.2.	Carbonate-rich Rocks	63
3.5.	Geodynamic Implications	65
3.6.	Conclusions	66
4.	The Roman Province	69
4.1.	Introduction	69
4.2.	Regional Geology	71
4.3.	Vulsini District	72
4.3.1.	Volcanology and Stratigraphy	73
4.3.2.	Petrography and Mineral Chemistry	74
4.3.3.	Petrology and Geochemistry	77
4.4.	Vico Volcano	80
4.4.1.	Volcanology and Stratigraphy	81
4.4.2.	Petrography and Mineral Chemistry	82
4.4.3.	Petrology and Geochemistry	83
4.5.	Sabatini District	86
4.5.1.	Volcanology and Stratigraphy	87
4.5.2.	Petrography and Mineral Chemistry	88
4.5.3.	Petrology and Geochemistry	89
4.6.	Colli Albani (Alban Hills)	91
4.6.1.	Volcanology and Stratigraphy	91
4.6.2.	Petrography and Mineral Chemistry	93
4.6.3.	Petrology and Geochemistry	94
4.7.	Petrogenesis	97
4.7.1.	Fractional Crystallisation and Magma Mixing	97
4.7.2.	Magma Contamination by Crustal Rocks	98
4.7.3.	Genesis of Mafic Magmas	99
4.8.	Age of Mantle Contamination and Geodynamic Implications	102
4.9.	Conclusions	105
5.	The Ernici-Roccamonfina Province	109
5.1.	Introduction	109
5.2.	Regional Geology	109
5.3.	Monti Ernici	111
5.3.1.	Volcanology and Stratigraphy	111

5.3.2.	Petrography and Mineral Chemistry	112
5.3.3.	Petrology and Geochemistry	113
5.4.	Roccamonfina	118
5.4.1.	Volcanology and Stratigraphy	118
5.4.2.	Petrography and Mineral Chemistry	120
5.4.3.	Petrology and Geochemistry	121
5.5.	Petrogenesis	122
5.6.	Nature of Mantle Metasomatism and Geodynamic Implications.....	124
5.7.	Conclusions	126
6.	The Campania Province, Pontine Islands, Mount Vulture.....	129
6.1.	Introduction	129
6.2.	Regional Geology	130
6.3.	Campania Province	133
6.3.1.	Somma-Vesuvio	133
6.3.2.	Campi Flegrei (Phlegraean Fields)	141
6.3.3.	Ischia	146
6.3.4.	Procida and Vivara	149
6.4.	Buried Volcanism beneath the Campanian Plain	152
6.5.	Pontine Islands	152
6.5.1.	Ponza, Palmarola and Zannone	153
6.5.2.	Ventotene and Santo Stefano	155
6.6.	Mount Vulture	157
6.6.1.	Volcanology and Stratigraphy	157
6.6.2.	Petrography and Mineral Chemistry	158
6.6.3.	Petrology and geochemistry	160
6.7.	Petrogenesis of Campania, Pontine and Vulture magmas	162
6.8.	Geodynamic Setting.....	165
6.9.	Conclusions	167
7.	The Aeolian arc.....	173
7.1.	Introduction	173
7.2.	Regional Geology	173
7.3.	Alicudi	177
7.3.1.	Volcanology and Stratigraphy	177
7.3.2.	Petrography and Mineral Chemistry	177
7.3.3.	Petrology and Geochemistry	178
7.4.	Filicudi	181
7.4.1.	Volcanology and Stratigraphy	181
7.4.2.	Petrography and Mineral Chemistry	181

7.4.3.	Petrology and Geochemistry	182
7.5.	Salina	183
7.5.1.	Volcanology and Stratigraphy.....	183
7.5.2.	Petrography and Mineral Chemistry	184
7.5.3.	Petrology and geochemistry	184
7.6.	Lipari	185
7.6.1.	Volcanology and Stratigraphy.....	185
7.6.2.	Petrography and Mineral Chemistry	186
7.6.3.	Petrology and Geochemistry	187
7.7.	Vulcano.....	190
7.7.1.	Volcanology and Stratigraphy.....	190
7.7.2.	Petrography and Mineral Chemistry	191
7.7.3.	Petrology and Geochemistry	192
7.8.	Panarea.....	194
7.8.1.	Volcanology and Stratigraphy.....	194
7.8.2.	Petrography and Mineral Chemistry	194
7.8.3.	Petrology and Geochemistry	195
7.9.	Stromboli	198
7.9.1.	Volcanology and Stratigraphy.....	198
7.9.2.	Petrography and Mineral Chemistry	200
7.9.3.	Petrology and Geochemistry	200
7.10.	Aeolian Seamounts	202
7.11.	Petrogenesis	202
7.11.1.	Genesis of Mafic Magmas.....	204
7.11.2.	Along-arc Compositional Variations.....	206
7.12.	Geodynamic Setting	208
7.13.	Conclusions	209
8.	The Sicily Province	215
8.1.	Introduction	215
8.2.	Regional Geology	215
8.3.	Etna.....	217
8.3.1.	Volcanology and Stratigraphy.....	218
8.3.2.	Petrography and Mineral Chemistry	220
8.3.3.	Petrology and Geochemistry	222
8.4.	Iblei.....	225
8.4.1.	Volcanology, Stratigraphy and Petrography	226
8.4.2.	Petrology and Geochemistry	228
8.5.	Pantelleria	230
8.5.1.	Volcanology and Stratigraphy.....	231
8.5.2.	Petrography and Mineral chemistry	232

8.5.3.	Petrology and Geochemistry	234
8.6.	Linosa	236
8.6.1.	Volcanology and Stratigraphy	236
8.6.2.	Petrography and Mineral Chemistry	236
8.6.3.	Petrology and Geochemistry	237
8.7.	Sicily Channel Seamounts	239
8.8.	Ustica	241
8.8.1.	Volcanology and Stratigraphy	242
8.8.2.	Petrography and Mineral Chemistry	242
8.8.3.	Petrology and Geochemistry	243
8.9.	Petrogenesis	244
8.10.	Geodynamic Setting.....	248
8.11.	Conclusions	251
9.	Sardinia and the Southern Tyrrhenian Sea	257
9.1.	Introduction	257
9.2.	Sardinia.....	258
9.2.1.	Regional Geology.....	258
9.2.2.	Plio-Quaternary Volcanism.....	261
9.2.3.	Petrogenesis.....	269
9.3.	Southern Tyrrhenian Sea	271
9.3.1.	Regional Geology.....	271
9.3.2.	MORB-type Rocks.....	273
9.3.3.	OIB-type Rocks.....	276
9.3.4.	Arc-type Rocks.....	278
9.3.5.	Petrogenesis.....	281
9.4.	Geodynamic Setting.....	283
9.5.	Conclusions	285
10.	Petrogenesis and Geodynamics in Italy	291
10.1.	Introduction	291
10.2.	Compositional and Structural Characteristics of Volcanism in Italy.....	291
10.3.	Petrogenetic Constraints for Italian Plio-Quaternary Magmatism.....	300
10.4.	Geodynamic Evolution of the Western Mediterranean and Tyrrhenian Sea.....	304
10.5.	Relationship between Petrogenesis and Geodynamics	306
10.5.1.	Passive-rifting-related Hypotheses.....	307
10.5.2.	Plume-related Hypotheses.....	308
10.5.3.	Subduction-related Hypotheses.....	311

10.6. Conclusions	315
Appendix: Classification and Petrogenesis of K-rich Rocks.....	317
Classification and Nomenclature.....	317
Petrogenesis of potassium-rich magmas.....	320
References.....	323
Subject Index.....	361
