

Contents

Part I Astronomical Evidence for Dark Matter

The Milky Way's Black Hole and the Central Stellar Cluster: Variable Emission from SgrA	
<i>A. Eckart et al.</i>	3
Indirect Evidence for WIMP Annihilation from Diffuse Galactic Gamma Rays	
<i>W. de Boer</i>	12
Probing Dark Objects with Gravitational Lensing	
<i>K. Griest</i>	27
Cosmological Interpretation from High Redshift Clusters Observed Within the XMM-Newton Ω-Project	
<i>A. Blanchard</i>	34
Wakes in Dark Matter Halos	
<i>B. Fuchs</i>	47
Relic Neutrino Clustering and Implications for Their Detection	
<i>A. Ringwald and Y.Y.Y. Wong</i>	62
Shadow Shapes Around the Black Hole in the Galactic Centre	
<i>A.F. Zakharov, A.A. Nucita, F. DePaolis, and G. Ingrosso</i>	77

Part II Direct Hot and Cold Dark Matter Detection Search

Neutrinoless Double Beta Decay – and Hot Dark Matter	
<i>H.V. Klapdor-Kleingrothaus</i>	93

DAMA/NaI Results on Dark Matter Particles by Annual Modulation Signature <i>R. Bernabei et al.</i>	116
DAMA/LIBRA and Beyond <i>R. Bernabei et al.</i>	138
The GENIUS-Test-Facility and the HDMS Detector in GRAN SASSO <i>H.V. Klapdor-Kleingrothaus, I.V. Krivosheina</i>	149
First CDMS II WIMP Search Results from the Soudan Underground Laboratory <i>D.S Akerib et al.</i>	163
Dark Matter Search at Boulby Mine <i>R. Lüscher (for the UK Dark Matter Collaboration)</i>	185
Prospects for the Detection of SUSY Dark Matter <i>D.B. Cline</i>	195
Status of ZEPLIN II and ZEPLIN III <i>G.J. Alner et. al.</i>	208
The XENON Dark Matter Experiment <i>E. Aprile (on behalf of the XENON Collaboration)</i>	220
Recent Status of the XMASS Project <i>C. Mitsuda</i>	234
DRIFT and Prospects for a Large Scale Directional WIMP Detector <i>J.C. Davies and N.J.C. Spooner (for the DRIFT Collaboration)</i>	246
COUPP, a Heavy-Liquid Bubble Chamber for WIMP Detection <i>J. Bolte et al.</i>	254
The SuperCDMS Experiment <i>R.W. Schnee et al.</i>	259
WIMP-Wind Detection with an Advanced Gaseous Tracking Device <i>A. Takeda et al.</i>	269
SIGN, a WIMP Detector Based on High Pressure Gaseous Neon <i>J.T. White et al.</i>	276

Exploring Novel Signatures in Direct Neutralino Searches	
<i>J.D. Vergados</i>	285

Part III Collider and Search for Dark Matter

Indirect, Direct and Collider Detection of SUSY Dark Matter	
<i>H. Baer</i>	299
Dark Matter and Colliders	
<i>R. Arnowitt et al.</i>	308
Dark Matter Limits from the g-2 Experiment	
<i>P. Cushman</i>	323
RPV Neutralino Searches from LEP to LHC	
<i>S. Costantini</i>	337
Tripling the LHC: The Path from Technology to Discovery	
<i>P. McIntyre and A. Sattarov</i>	348
Update on the MINOS Experiment at the Fermilab Main Injector	
<i>R.C. Webb (for the MINOS Collaboration)</i>	364

Part IV Cosmology, Baryogenesis, Dark Energy

Kinematics and Dark Energy from Supernovae at $z > 1$	
<i>A.G. Riess</i>	377
Low Redshift ($z < 1$) Supernova Studies	
<i>W.L. Freedman</i>	387
Liouville Cosmology	
<i>J. Ellis et al.</i>	396
How Dark is ‘Dark’? Electromagnetic Interactions in the Dark Sector	
<i>K. Sigurdson</i>	420
Leptonic CP Violation and Baryon Asymmetry	
<i>M.N. Rebelo</i>	432

XII Contents

A New Type Baryogenesis: Q-Genesis <i>J.E. Kim</i>	445
Cosmological Constant and Gravity+Matter Self-Creation in a Cosmology with an Unbounded Hamiltonian Taking into Account Negative Energy of Gravity <i>V.V. Kocharovsky, E.V. Derishev, and Vl.V. Kocharovsky</i>	454
Precise Theory of Orbits in General Relativity, the Cosmological Constant and the Perihelion Precession of Mercury <i>G.V. Kraniotis</i>	469
Dark Matter and Pulsar Kicks from a Singlet Neutrino <i>A. Kusenko</i>	480
Dealing with Dark Energy <i>E.V. Linder</i>	485
Possible Influence of Dark Energy on the Dark Matter Relic Abundance <i>A. Masiero and F. Rosati</i>	498
Supersymmetric Dark Matter Q-balls and their Interactions with Matter <i>L.C. Loveridge</i>	506
Cosmology with Chandra Cluster Data <i>A. Vikhlinin</i>	514
Intrinsically Faint Quasars: Evidence for meV Axion Dark Matter in the Universe <i>A.A. Svidzinsky</i>	523
Quantum Theory of Neutrino Spin-Light in a Dense Matter <i>A. Grigoriev, A. Studenikin and A. Ternov</i>	534
Part V SUSY/SUGRA Phenomenology in Dark Matter, New Symmetries	
Upper Limits on Sparticle Masses from WMAP Dark Matter Constraints with Modular Invariant Soft Breaking <i>U. Chattopadhyay and P. Nath</i>	547

Dark Matter Candidates in Supersymmetric Models	
<i>K.A. Olive</i>	560
On the Mixed Spin-Scalar Coupling Approach in Dark Matter Search	
<i>V.A. Bednyakov, H.V. Klapdor-Kleingrothaus</i>	583
Light Neutralino Dark Matter in Gaugino Non-Universal Models	
<i>N. Fornengo</i>	598
How Can We Make Sure We Detect Dark Matter?	
<i>P. Gondolo</i>	610
From New Geometry Towards a New Symmetry. Reflexive Numbers and Berger Graphs from Calabi-Yau Spaces	
<i>L.N. Lipatov et al.</i>	623
List of Participants	656
Author Index	663
