

Chang Wook Ahn

Advances in Evolutionary Algorithms

Theory, Design and Practice

 Springer

Contents

1	Introduction	1
1.1	Motivation	2
1.2	Objectives	3
1.3	Outline	4
2	Practical Genetic Algorithms	7
2.1	Genetic Algorithms: Simple to Competent	7
2.1.1	Overview of Genetic Algorithms	7
2.1.2	Design-Decomposition Theory	9
2.2	Practical Design Guidelines	11
2.3	Practical Population-Sizing Model	14
2.3.1	Review of Population-Sizing Models	14
2.3.2	Harik's Decision Model	15
2.3.3	Practical Decision Model	15
2.3.4	Practical Population-Sizing Model	17
2.3.5	Experimental Verification	19
2.4	Summary	22
3	Real-World Application: Routing Problem	23
3.1	Motivation	23
3.2	Existing GA-Based Approaches	24
3.3	Proposed GA-based Routing Algorithm	26
3.3.1	Chromosomal Representation	26
3.3.2	Population Initialization	27
3.3.3	Fitness Function	28
3.3.4	Genetic Operators	28
3.3.5	Repair Function	31
3.3.6	Population Size	33
3.4	Experiments and Discussion	33
3.4.1	Results for a Fixed Network with 20 Nodes	33
3.4.2	Results for Random Networks	35

3.4.3	Experimental Verification of the Population-Sizing Model	39
3.5	Summary	42
4	Elitist Compact Genetic Algorithms	45
4.1	A Family of Compact Genetic Algorithms	46
4.2	Compact Genetic Algorithm and Elitism	48
4.2.1	Compact Genetic Algorithm	48
4.2.2	Elitism	49
4.3	Elitism-Based Compact Genetic Algorithms	50
4.3.1	Persistent Elitist Compact Genetic Algorithm	50
4.3.2	Nonpersistent Elitist Compact Genetic Algorithm	53
4.4	Speedup Model	56
4.5	Experimental Results and Discussion	59
4.5.1	Results for the Problems Involving Lower Order BBs ..	60
4.5.2	Results for the Problems Involving Higher Order BBs ..	64
4.5.3	Results for Continuous and Multimodal Problems	68
4.5.4	Comparison Results with Evolutionary Strategies	73
4.5.5	Effects of the Scope of Inheritance	75
4.5.6	Real-World Applications: Ising Spin-Glasses (ISG) Systems	80
4.6	Summary	81
5	Real-coded Bayesian Optimization Algorithm	85
5.1	Estimation of Distribution Algorithms	86
5.2	Real-coded Bayesian Optimization Algorithm	89
5.3	Learning of Probabilistic Models	91
5.3.1	Model Selection	91
5.3.2	Model Fitting	94
5.4	Sampling of Probabilistic Models	99
5.5	Scalability Analysis	99
5.5.1	Preliminaries	99
5.5.2	Population Complexity	101
5.5.3	Convergence Time Complexity	108
5.5.4	Scalability of rBOA	109
5.6	Real-valued Test Problems	109
5.6.1	Decomposable Problems	109
5.6.2	Traditional Optimization Benchmarks	111
5.7	Experimental Results and Discussion	113
5.7.1	Experiment Setup	113
5.7.2	Results for the rBOA Performance	114
5.7.3	Verification of rBOA Scalability	120
5.8	Summary	123

6	Multiobjective Real-coded Bayesian Optimization	
	Algorithm	125
6.1	Multiobjective Optimization	126
6.2	Multiobjective Genetic and Evolutionary Algorithms	127
6.3	Multiobjective Real-coded Bayesian Optimization Algorithm	129
6.4	Selection Strategy	131
6.4.1	Ranking	131
6.4.2	Adaptive Sharing	132
6.4.3	Dynamic Crowding	133
6.4.4	Fitness Assignment	135
6.4.5	Elitism	136
6.5	Real-valued Multiobjective Optimization Problems	136
6.5.1	Decomposable Multiobjective Optimization Problems	136
6.5.2	Traditional Multiobjective Optimization Problems	139
6.6	Experimental Results and Discussion	140
6.6.1	Performance Measures	140
6.6.2	Experiment Setup	142
6.6.3	Results and Discussion	143
6.7	Summary	151
7	Conclusions	153
7.1	Summary	153
7.2	Future Work	155
7.2.1	Incorporating Efficiency-Enhancement Techniques	155
7.2.2	Challenging to Hierarchical Difficulty	156
7.3	Concluding Remarks	156
	References	159
