

Paul-Hermann Zieschang

# Theory of Association Schemes

Springer

---

# Contents

<b>1</b>	<b>Basic Facts</b>	<b>1</b>
1.1	Structure Constants	1
1.2	Symmetric Elements	5
1.3	The Complex Product	7
1.4	Complex Products and Valencies	12
1.5	Complex Products of Subsets of Cardinality 1	14
<b>2</b>	<b>Closed Subsets</b>	<b>17</b>
2.1	Basic Facts	17
2.2	Dedekind Identities	22
2.3	Structure Constants	23
2.4	Maximal Closed Subsets	28
2.5	Normalizer and Strong Normalizer	31
2.6	Conjugates of Closed Subsets	35
<b>3</b>	<b>Generating Subsets</b>	<b>39</b>
3.1	Basic Facts	40
3.2	The Thin Residue	45
3.3	Elements of Valency 2	48
3.4	Closed Subsets Generated by Involutions	51
3.5	Basic Results on Constrained Sets of Involutions	55
3.6	Basic Results on Coxeter Sets	57
<b>4</b>	<b>Quotient Schemes</b>	<b>63</b>
4.1	Basic Definitions	64
4.2	General Facts	69
4.3	Valencies	74
4.4	Hall Subsets	77
4.5	Sylow Subsets	78

<b>5</b>	<b>Morphisms</b>	83
5.1	Basic Facts	84
5.2	Isomorphisms	88
5.3	The Isomorphism Theorems	90
5.4	Composition Series	93
5.5	The Group Correspondence	95
5.6	Residually Thin Schemes	98
<b>6</b>	<b>Faithful Maps</b>	103
6.1	Basic Facts	104
6.2	Faithfully Embedded Closed Subsets	107
6.3	The Schur Group of a Closed Subset	112
6.4	Elements of Valency 2	116
6.5	More About Elements of Valency 2	122
6.6	Constrained Sets of Involutions	125
6.7	Thin Thin Residues	128
<b>7</b>	<b>Products</b>	133
7.1	Direct Products of Closed Subsets	133
7.2	Quasidirect Products of Schemes	138
7.3	Semidirect Products	144
7.4	A Characterization of Semidirect Products	149
<b>8</b>	<b>From Thin Schemes to Modules</b>	153
8.1	Rings and Modules	154
8.2	Integrality in Associative Rings with 1	161
8.3	Completely Reducibility	164
8.4	Irreducible Modules over Associative Rings with 1	168
8.5	Semisimple Associative Rings with 1	172
8.6	Characters of Associative Rings with 1	175
8.7	Roots of Unity in Integral Domains	179
<b>9</b>	<b>Scheme Rings</b>	183
9.1	Basic Facts	183
9.2	Algebraically Closed Base Fields	192
9.3	Scheme Rings over the Field of Complex Numbers	195
9.4	Closed Subsets	199
9.5	Schemes with at most Five Elements	204
9.6	Constrained Sets of Involutions	207
<b>10</b>	<b>Dihedral Closed Subsets</b>	209
10.1	General Remarks	210
10.2	The Spherical Case	213
10.3	Arithmetic of the Length Function	217
10.4	Two Characteristic Subsets	220

10.5	The Constrained Spherical Case .....	226
10.6	Dihedral Closed Subsets of Finite Valency .....	228
<b>11</b>	<b>Coxeter Sets</b> .....	<b>237</b>
11.1	Parabolic Subsets .....	238
11.2	Direct Products .....	240
11.3	Faithful Maps .....	243
11.4	The Extension Theorem .....	244
<b>12</b>	<b>Spherical Coxeter Sets</b> .....	<b>249</b>
12.1	Elements of Maximal Length .....	250
12.2	Faithful Maps .....	253
12.3	The Main Theorem .....	257
12.4	Coxeter Schemes of Finite Valency and Rank 2 .....	259
12.5	Valencies and Multiplicities .....	267
12.6	Polarities .....	271
	<b>References</b> .....	<b>277</b>
	<b>Index</b> .....	<b>281</b>
