
Contents

1 Introduction: Contexts and Challenges for Quantum Mechanics	
<i>James Evans</i>	1
2 Max Planck's compromises on the way to and from the Absolute	
<i>J. L. Heilbron</i>	21
3 Atomic Waves in Private Practice	
<i>Bruce R. Wheaton</i>	39
4 A Complementary Opposition: Louis de Broglie and Werner Heisenberg	
<i>Georges Lochak</i>	73
5 Schrödinger Against Particles and Quantum Jumps	
<i>Michel Bitbol</i>	81
6 Aspects of Nonlocality in Quantum Mechanics	
<i>Abner Shimony</i>	107
7 Decoherence and the Foundations of Quantum Mechanics	
<i>Maximilian Schlosshauer, Arthur Fine</i>	125
8 What Are Consistent Histories?	
<i>Alan Thorndike</i>	149
9 Bose–Einstein Condensation: Identity Crisis for Indistinguishable Particles	
<i>Wolfgang Ketterle</i>	159

VIII Contents

**10 Quantum Fluctuations of Light: A Modern
Perspective on Wave/Particle Duality**
Howard Carmichael 183

**11 Quantum Entanglement as a Resource for
Communication**
William K. Wootters 213

12 The Three Cases of Doctor von Neumann
Roland Omnès 231
