## I. Chapters of general nature

|                                                                                                                                         |    |
|-----------------------------------------------------------------------------------------------------------------------------------------|----|
| 1) How to handle biological specimens . . . . .                                                                                         | 1  |
| 2) Alternative specimens . . . . .                                                                                                      | 9  |
| 3) Pitfalls and cautions in analysis of drugs and poisons. . . . .                                                                      | 17 |
| 4) Pretreatments of human specimens . . . . .                                                                                           | 25 |
| 5) Detection methods . . . . .                                                                                                          | 33 |
| 6) A computer system for diagnosis of causative drugs and poisons developed<br>by the Japan Poison Information Center (Tokyo) . . . . . | 45 |
| 7) Practical use of the poison-net developed by the Japan Poison Information<br>Network (Hiroshima) . . . . .                           | 51 |
| 8) Problems in toxin analysis in emergency medicine . . . . .                                                                           | 59 |
| 9) Analyses of chemical warfare agents and their related compounds. . . . .                                                             | 69 |

## II. Chapters on specific toxins

|                                                   |     |
|---------------------------------------------------|-----|
| <i>1. Volatile compounds</i>                      |     |
| 1) Carbon monoxide . . . . .                      | 91  |
| 2) Hydrogen sulfide and its metabolite. . . . .   | 101 |
| 3) Cyanide. . . . .                               | 113 |
| 4) Methanol and formic acid . . . . .             | 123 |
| 5) Ethanol . . . . .                              | 135 |
| 6) Chloroform and dichloromethane. . . . .        | 143 |
| 7) Toluene, benzene, xylene and styrene . . . . . | 149 |
| 8) Alkyl nitrites . . . . .                       | 153 |
| 9) Components of gasoline and kerosene . . . . .  | 159 |
| <i>2. Controlled drugs</i>                        |     |
| 1) Amphetamines and their metabolites . . . . .   | 171 |
| 2) Cannabinoids and their metabolites. . . . .    | 187 |
| 3) Morphine and its analogues . . . . .           | 195 |
| 4) Cocaine and its metabolites . . . . .          | 207 |
| 5) Pentazocine . . . . .                          | 219 |
| 6) Lysergic acid diethylamide (LSD) . . . . .     | 225 |

|                                                               |     |
|---------------------------------------------------------------|-----|
| 7) 3,4-Methylenedioxyamphetamines . . . . .                   | 229 |
| 8) Phencyclidine . . . . .                                    | 241 |
| 9) $\gamma$ -Hydroxybutyric acid . . . . .                    | 247 |
| <br>3. <i>Psychopharmaceuticals and hypnotics</i>             |     |
| 1) Phenothiazines . . . . .                                   | 255 |
| 2) Butyrophenones . . . . .                                   | 263 |
| 3) Tricyclic and tetracyclic antidepressants . . . . .        | 271 |
| 4) Benzodiazepines . . . . .                                  | 283 |
| 5) Bromisovalum . . . . .                                     | 293 |
| 6) Barbiturates . . . . .                                     | 301 |
| <br>4. <i>General drugs</i>                                   |     |
| 1) Diphenylmethane antihistaminics . . . . .                  | 315 |
| 2) Propionic acid derivative analgesic-antipyretics . . . . . | 325 |
| 3) Acetaminophen (paracetamol) . . . . .                      | 335 |
| 4) Acetylsalicylic acid . . . . .                             | 343 |
| 5) Antiepileptics . . . . .                                   | 351 |
| 6) Muscle relaxants . . . . .                                 | 359 |
| 7) $\beta$ -Blockers . . . . .                                | 369 |
| 8) Local anaesthetics . . . . .                               | 377 |
| 9) Salicylic acid . . . . .                                   | 391 |
| 10) $\beta$ -Lactam antibiotics . . . . .                     | 395 |
| <br>5. <i>Chemicals of daily necessities</i>                  |     |
| 1) Hypochlorite . . . . .                                     | 403 |
| 2) Benzalkonium chlorides . . . . .                           | 407 |
| 3) Hair dyes . . . . .                                        | 415 |
| 4) Permethrin . . . . .                                       | 425 |
| 5) Boric acid . . . . .                                       | 431 |
| 6) Naphthalene . . . . .                                      | 437 |
| 7) <i>p</i> -Dichlorobenzene . . . . .                        | 443 |
| 8) Ethylene glycol . . . . .                                  | 449 |
| <br>6. <i>Natural toxins and alkaloids</i>                    |     |
| 1) Aconite toxins . . . . .                                   | 455 |
| 2) Mushroom toxins . . . . .                                  | 469 |
| 3) Tetrodotoxin . . . . .                                     | 481 |
| 4) Methylxanthine derivatives . . . . .                       | 491 |
| 5) Nicotine and cotinine . . . . .                            | 499 |
| 6) Tropane alkaloids . . . . .                                | 509 |
| 7) Oleander toxins . . . . .                                  | 519 |
| <br>7. <i>Pesticides</i>                                      |     |
| 1) Simultaneous analysis of pesticides by GC/MS . . . . .     | 527 |
| 2) Organophosphorus pesticides . . . . .                      | 535 |

3) Glufosinate and glyphosate. . . . . 545

4) Carbamate pesticides . . . . . 559

5) Paraquat and diquat. . . . . 571

6) Cresol. . . . . 581

7) Diazine and triazine herbicides . . . . . 591

8) Coumarin rodenticides . . . . . 599

  

8. *Miscellaneous*

1) Sarin and its decomposition products. . . . . 609

2) VX and its decomposition products. . . . . 619

3) Sodium azide . . . . . 629

4) Arsenic compounds and other inorganic poisons . . . . . 637

5) Nitrate and nitrite compounds. . . . . 649

6) Methemoglobin . . . . . 655

  

Subject index. . . . . 659
